Passion and Entrepreneurship Jul 28 2019 Providing new perspectives on the interface between passion and entrepreneurship, this book recognizes that entrepreneurship is not just based on the search for profit. Instead, the entrepreneurial experience incorporates more complex processes, often based on less rational behavior motivated by reasons other than revenue. 'Passion' refers both to emotional elements that may fuel an entrepreneurial effort as well as something that feeds the business. The book challenges established views and shows the complexity of the link between passion and entrepreneurship. The authors discuss the main implications for businesses, and explore how passion at the individual and community level influences entrepreneurial efforts. Offering case studies from multiple sectors alongside conceptual frameworks, this edited volume is a useful tool for scholars, practitioners, and policymakers working on entrepreneurship.
