Office-Based Infertility Practice Apr 02 2020 An invaluable resource to all physicians treating infertile couples. The text emphasises the practice of infertility in the office setting, reflecting the current trend away from the hospital into the outpatient environment, with the most current and advanced therapies available discussed by recognised experts in the field. The first half of the book is devoted to the evaluation and work-up of the infertile couple, including evaluation of the infertility factors, and the roles of ultrasound, endometrium saline sonography, fallopscopy and diagnostic laparoscopy and hysteroscopy. The second half of the book presents the treatment and operative procedures, including ovulation induction, IUI, tubal cannulation, treatment of cervical stenosis, the use of office laparoscopy and therapeutic hysteroscopy, male treatment as support for IVF, vas reversals, and testicular biopsy, as well as routine IVF, intratubal gamete transfer, and micromanipulation. With 200 illustrations, this book is a must for all infertility specialists, obstetrician-gynaecologists, fellows, and residents.

Charlie Chan Carries On May 04 2020 "Charlie Chan Carries On" by Earl Derr Biggers. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten?or yet undiscovered

gems?of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Accelerando May 16 2021 His most ambitious novel to date, ACCELERANDO is a multi-generational saga following a brilliant clan of 21st-century posthumans. The year is some time between 2010 and 2015. The recession has ended, but populations are ageing and the rate of tech change is accelerating dizzyingly. Manfred makes his living from spreading ideas around, putting people in touch with one another and leaving a spray of technologies in his wake. He lives at the cutting edge of intelligence amplification technology, but even Manfred can take on too much. And when his pet robot cat picks up some interesting information from the SETI data, his world - and the world of his descendants - is turned on its head.

Farm Journal Jun 24 2019

Unit Field Sanitation Team Aug 26 2019 The purpose of this field manual (FM) is to provide doctrine and training procedures for unit field sanitation teams (FST). In addition, a training program in the application of personal protective measures (PPM) is included for personnel appointed as members of the FST for each company, troop, or battery. This publication contains a proposed 20-hour master training schedule which may be adjusted as necessary; a text that may serve as reference material for the FST instructor; and supporting illustrations for the instructors assigned the training task. This publication provides guidance to the commanders, unit leaders, and soldiers for implementing unit field sanitation and preventive medicine (PVNTMED) measures in the field. This publication is written to further aid the commander and his unit leaders in the continuing effort of reducing the disease and nonbattle injury (DNBI) rates during deployments. This publication provides information on PPM for the unit FST on applying unit-level PPM.

Engineering Review Aug 07 2020

The Sand Pebbles Oct 28 2019 The critically acclaimed New York Times–bestseller and the basis for the Academy Award– and Golden Globe–nominated film starring Steve McQueen. As a spirit of nationalism inspired by Chiang Kai-shek’s leadership begins to sweep through China, the river gunship San Pablo is ordered to patrol the region and to protect US citizens. Jack Holman is a machinist aboard the San Pablo, who has joined the navy in order to avoid jail time. Because he is so fiercely independent, Jake remains a relative loner and is uncomfortable with navy protocol and discipline. McKenna’s independent mind chafes against military hierarchy and also ensures that he does not share his shipmates’ disdain for the Chinese.

Instead, McKenna is fascinated with the culture and the people that surround him and develops emotional bonds that prove quite thorny when the circumstances become more tumultuous and more dire. The perspective of *The Sand Pebbles* is therefore both panoramic as well as personal. Like *Lawrence of Arabia*, the tension explored here is between the self as individual against the broader spectrum of social and historical forces against which we are all measured. "A bold well-written book, inclusive in its concepts, memorable in character and incident, fearlessly impartial in its delineation of the incompatible sets of values held by the men on all sides." —Kirkus Reviews

Rockets and People Volume I (NASA History Series. NASA Sp-2005-4110) Jul 06 2020 Much has been written in the West on the history of the Soviet space program, but few Westerners have read direct first-hand accounts of the men and women who were behind the many Russian accomplishments in exploring space. The memoir of academician Boris Chertok, translated from the original Russian, fills that gap. Chertok began his career as an electrician in 1930 at an aviation factory near Moscow. Thirty years later, he was deputy to the founding figure of the Soviet space program, the mysterious "Chief Designer" Sergey Korolev. Chertok's 60-year-long career and the many successes and failures of the Soviet space program constitute the core of his memoirs, *Rockets and People*. In these writings, spread over four volumes (volumes two through four are forthcoming), academician Chertok not only describes and remembers, but also elicits and extracts profound insights from an epic story about a society's quest to explore the cosmos. This book was edited by Asif Siddiqi, a historian of Russian space exploration, and General Tom Stafford contributed a foreword touching upon his significant work with the Russians on the Apollo-Soyuz Test Project. Overall, this book is an engaging read while also contributing much new material to the literature about the Soviet space program.

The Blue Bird Flower Oct 21 2021 This book is a collection of interesting characters that inhabit letters written to Mrs. Ainsworth by an unidentified character named Chuck. Chuck uses a clever trick by pawning his stories off on letters to Mrs. Ainsworth. Come and read about the boy who found infinity, invented 3D paint and a perpetual motion machine! Meet Drummond the Runt dog and see what the Brass Rat is all about and what about Light'nin' an Ringtail, odd names for dogs. What in the world is a Reciprocity Machine and how does it work? The Shrouded Monk so mysterious, and what was it about him that gave him an age of over 200 years? Why was there one squirrel too many, and did a wound to Jessie's throat really end the Civil War?

The Elements of Style Mar 26 2022 The Elements of Style William

Strunk concentrated on specific questions of usage—and the cultivation of good writing—with the recommendation "Make every word tell"; hence the 17th principle of composition is the simple instruction: "Omit needless words." The book was also listed as one of the 100 best and most influential books written in English since 1923 by Time in its 2011 list.

Things I Wish I'd Known Before I Started Sailing Jan 30 2020

Approachable, informative and entertaining, John Vigor writes an alphabetical reference that shares the wealth of his experience and helps sailors new and old avoid unfortunate mistakes aboard their vessel. Fun to browse and easy to search.

The Solar Greenhouse Book Jun 04 2020

Prudent Practices in the Laboratory Nov 09 2020 Prudent Practices in the Laboratory-the book that has served for decades as the standard for chemical laboratory safety practice-now features updates and new topics. This revised edition has an expanded chapter on chemical management and delves into new areas, such as nanotechnology, laboratory security, and emergency planning. Developed by experts from academia and industry, with specialties in such areas as chemical sciences, pollution prevention, and laboratory safety, Prudent Practices in the Laboratory provides guidance on planning procedures for the handling, storage, and disposal of chemicals. The book offers prudent practices designed to promote safety and includes practical information on assessing hazards, managing chemicals, disposing of wastes, and more. Prudent Practices in the Laboratory will continue to serve as the leading source of chemical safety guidelines for people working with laboratory chemicals: research chemists, technicians, safety officers, educators, and students.

Urbanization Without Cities Feb 10 2021 The city at its best is an eco-community. Urbanization is not only a social and cultural fact of historic proportions; it is a tremendous ecological fact as well. We must explore modern urbanization and its impact on the natural environment, as well as the changes urbanization has produced in our sensibility towards society and toward the natural world. If ecological thinking is to be relevant to the modern human condition, we need a social ecology of the city.

Nuclear War Survival Skills Dec 23 2021 A field-tested guide to surviving a nuclear attack, written by a revered civil defense expert. This edition of Cresson H. Kearny's iconic Nuclear War Survival Skills (originally published in 1979), updated by Kearny himself in 1987 and again in 2001, offers expert advice for ensuring your family's safety should the worst come to pass. Chock-full of practical instructions

and preventative measures, Nuclear War Survival Skills is based on years of meticulous scientific research conducted by Oak Ridge National Laboratory. Featuring a new introduction by ex-Navy SEAL Don Mann, this book also includes: instructions for six different fallout shelters, myths and facts about the dangers of nuclear weapons, tips for maintaining an adequate food and water supply, a foreword by "the father of the hydrogen bomb," physicist Dr. Edward Teller, and an "About the Author" note by Eugene P. Wigner, physicist and Nobel Laureate. Written at a time when global tensions were at their peak, Nuclear War Survival Skills remains relevant in the dangerous age in which we now live.

Chilton's Import Car Manual Nov 02 2022 Covers all major cars imported into the U.S. and Canada and includes specifications, a troubleshooting guide, and maintenance and repair instructions.

Butchering, Processing and Preservation of Meat Aug 19 2021 This book is written primarily for the family to help solve the meat problem and to augment the food supply. Producing and preserving meats for family meals are sound practices for farm families and some city folks as well-they make possible a wider variety of meats, which can be of the best quality, at less cost. Meat is an essential part of the American diet. It is also an expensive food. With the costs high, many persons cannot afford to buy the better cuts; others are being forced to restrict the meat portion of the diet to a minimum, or to use ineffectual substitutes. Commercially in the United States, meat means the flesh of cattle, hogs, and sheep, except where used with a qualifying word such as reindeer meat, crab meat, whale meat, and so on. Meat in this book is used in a broader sense, although not quite so general as to comprise anything and everything eaten for nourishment either by man or beast. To be sure, it includes the flesh of domestic animals and large and small game animals as well; also poultry, domestic fowl raised for their meat and eggs, and game birds, all wild upland birds, shore birds, and waterfowl; and fish.

California Friendly Dec 11 2020 California Friendly® is California's future. Water reliability is dependent on using water wisely. We need to create sustainable gardens that rely on less water. This maintenance guide will help you support California's future: *Uncover the secrets of efficient irrigation. *Explore the techniques for irrigating with recycled water. *Get the maintenance tips for hundreds of California Friendly® plants. *Discover the methods and means of managing weed and pest infestations. *Learn how to maintain rainwater capture opportunities. This book has been written for every landscaper, gardener and land manager in Southern California. It has been produced

by the very first collaboration between three Southern California organizations, LADWP, MWD and SoCalGas. Grab a copy--they are free--use the information in your garden and help us create a beautiful, thriving and sustainable future.

Popular Mechanics Sep 19 2021 Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Rapture of the Nerds Apr 14 2021 At the dusk of the twenty-first century, Welsh technophobe Huw is one of the billion or so hominids left on Earth, living in a preserve at the bottom of a gravity well. The rest have emigrated, uploading their consciousness to a vast cloud that fogs the inner solar system with a dust of molecular machinery, and occasionally spams Earth with plans for cataclysmically disruptive technologies. Wary of anything more sophisticated than his bicycle, Huw jumps at the chance to attend tech jury service and defend the Earth from the scum of the post-singularity patent office. But his long-awaited stint is cut short when he becomes infected with an itchy technovirus, and unwittingly becomes the last hope of the entire universe.

The Homeowner's Guide to Renewable Energy Oct 09 2020 From the author of Power from the Sun, the complete guide to switching to clean, affordable, renewable energy resources. Energy bills have skyrocketed in the United States, and traditional energy sources can be as damaging to the environment as they are to your pocketbook. The Homeowner's Guide to Renewable Energy will show you how to slash your home energy costs while dramatically reducing your carbon footprint. Completely revised and updated, this new edition describes the most practical and affordable methods for significantly improving in-home energy efficiency and tapping into clean, affordable, renewable energy resources. If implemented, these measures will save the average homeowner tens of thousands of dollars over the coming decades. Focusing on the latest technological advances in residential renewable energy, this guide examines each alternative energy option available including: · Solar hot water and solar hot air systems · Passive and active solar retrofits for heating and cooling · Electricity from solar, wind, and microhydro · Hydrogen, fuel cells, methane digesters, and biodiesel This well-illustrated and accessible guide is an essential resource for those wanting to enter the renewable energy field. Packed with practical tips and guidelines, it gives readers sufficient knowledge to hire and communicate effectively with contractors and is a must-read for anyone interested in saving money and achieving energy independence. "If you're thinking about investing in a renewable energy system for your home . . . The Homeowner's Guide

to Renewable Resources helps clarify the decision-making process . . .
. Dan guides you through everything you need to choose which renewable
options to integrate into your lifestyle. A great addition to my
bookshelf!" —Mick Sagrillo, Sagrillo Power & Light
