

websites. The website can be accessed at: <http://people.hofstra.edu/geotrans> This text is an essential resource for undergraduates studying transport geography, as well as those interested in economic and urban geography, transport planning and engineering.

Debates in Geography Education Jun 27 2019 Debates in Geography Education encourages early career teachers, experienced teachers and teacher educators to engage with and reflect on key issues, concepts and debates. It aims to enable readers to reach their own informed judgements with deeper theoretical knowledge and understanding. The second edition is fully updated in light of the latest research, policy and practice in the field, as well as key changes to the curriculum and examination specifications. Expert contributors provide a range of perspectives on international, historical and policy contexts in order to deepen our understanding of significant debates in geography education. Key debates include: geography's identity as an academic discipline; what constitutes knowledge in geography; places and regional geography; what it means to think geographically; constructing the curriculum; how we link assessment to making progress in geography; the contribution of fieldwork and outdoor experiences; technology and the use of Geographical Information; school geography and employability; understanding the gap between school and university geography; evidence-based practice and research in geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, will help support and shape further research and writing. Debates in Geography Education is a key resource that is essential reading for all teachers and researchers who wish to extend their grasp of the place of geography in education. Mark Jones is Senior Lecturer in Education at the University of the West of England, Bristol, UK David Lambert is Professor of Geography Education at UCL Institute of Education, London, UK

Cities Made of Boundaries Feb 02 2020 Cities Made of Boundaries presents the theoretical foundation and concepts for a new social scientific urban morphological mapping method, Boundary Line Type (BLT) Mapping. Its vantage is a plea to establish a frame of reference for radically comparative urban studies positioned between geography and archaeology. Based in multidisciplinary social and spatial theory, a critical realist understanding of the boundaries that compose built space is operationalised by a mapping practice utilising Geographical Information Systems (GIS). Benjamin N. Vis gives a precise account of how BLT Mapping can be applied to detailed historical, reconstructed, contemporary, and archaeological urban plans, exemplified by sixteenth to twenty-first century Winchester (UK) and Classic Maya Chunchucmil (Mexico). This account demonstrates how the functional and experiential difference between compact western and tropical dispersed cities can be explored. The methodological development of Cities Made of Boundaries will appeal to readers interested in the comparative social analysis of built environments, and those seeking to expand the evidence-base of design options to structure urban life and development.

Cambridge IGCSE Geography Nov 05 2022 An investigative approach to Cambridge IGCSE Geography, written in partnership with the Geographical Association. Encourage students to make links between case studies and their own local contexts as well as exploring the core themes and skills of the 0460 syllabus in the context of global case studies and processes. Prepare for exam success with full coverage of the core themes of Paper 1 (Population and Settlement, The Natural Environment, Economic Development and the Use of Resources) as well as the geographical and fieldwork skills elements of Papers 2, 3 and 4. Help students focus on achieving the best grades with excellent exam support for each Paper, with exam-style questions, answers at different levels and accompanying comments. Be confident in the content and approach - this resource is written by highly experienced Geography teachers, consulted edited by a CIE Principal Examiner, and produced in partnership with the UK Geographical Association - the home of best practice in Geography teaching.

Databases and Information Systems VIII Nov 24 2021 Databases and information systems are the backbone of modern information technology and are crucial to the IT systems which support all aspects of our everyday life; from government, education and healthcare, to business processes and the storage of our personal photos and archives. This book presents 22 of the best revised papers accepted following stringent peer review for the 11th International Baltic Conference on Databases and Information Systems (Baltic DB&IS 2014), held in Tallinn, Estonia, in June 2014. The conference provided a forum for the exchange of scientific achievements between the research communities of the Baltic countries and the rest of the world in the area of databases and information systems, bringing together researchers, practitioners and Ph.D. students from many countries. The subject areas covered at the conference focused on big data processing, data warehouses, data integration and services, data and knowledge management, e-government, as well as e-services and e-learning.

A Fair Deal on Talent - Fostering Just Migration Governance Aug 02 2022 If well managed, migration generates benefits for migrants, their countries of origin and the countries they settle in. For migrants, it can help them expand their skill sets and improve their standard of living. For destination countries, it can alleviate demographic pressures and foster cultural diversity. For origin countries, it can bring benefits associated with remittances and knowledge transfers. However, in reality, these benefits are rarely achieved, as migration policy failures frequently lead to suboptimal or even negative outcomes. Realizing the full potential of migration therefore demands we foster a paradigm shift toward the fair management of migration. Fair migration is driven by the desire

to achieve a triple-win for migrants, destination countries and origin countries. In addition to outlining the key challenges and opportunities associated with fair migration, this volume examines the good practices of a variety of countries and institutions which highlight aspects of fair migration. The volume concludes with policy recommendations for effective and fair migration policymaking at the national and international levels. As a conceptual and empirical contribution to both national and international debates on managing migration, this volume aims to enrich discussions among policymakers, business leaders, civil society actors and scholars alike.

Indian and World Geography Oct 12 2020

Atlas of Knowledge Dec 02 2019 The power of mapping: principles for visualizing knowledge, illustrated by many stunning large-scale, full-color maps. Maps of physical spaces locate us in the world and help us navigate unfamiliar routes. Maps of topical spaces help us visualize the extent and structure of our collective knowledge; they reveal bursts of activity, pathways of ideas, and borders that beg to be crossed. This book, from the author of *Atlas of Science*, describes the power of topical maps, providing readers with principles for visualizing knowledge and offering as examples forty large-scale and more than 100 small-scale full-color maps. Today, data literacy is becoming as important as language literacy. Well-designed visualizations can rescue us from a sea of data, helping us to make sense of information, connect ideas, and make better decisions in real time. In *Atlas of Knowledge*, leading visualization expert Katy Börner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis. Drawing on fifteen years of teaching and tool development, she introduces a theoretical framework meant to guide readers through user and task analysis; data preparation, analysis, and visualization; visualization deployment; and the interpretation of science maps. To exemplify the framework, the Atlas features striking and enlightening new maps from the popular "Places & Spaces: Mapping Science" exhibit that range from "Key Events in the Development of the Video Tape Recorder" to "Mobile Landscapes: Location Data from Cell Phones for Urban Analysis" to "Literary Empires: Mapping Temporal and Spatial Settings of Victorian Poetry" to "Seeing Standards: A Visualization of the Metadata Universe." She also discusses the possible effect of science maps on the practice of science.

Research and Debate in Primary Geography Apr 29 2022 This book brings together recent papers which make important contributions to understanding and developing primary geography. It considers primary teachers' and trainee teachers' knowledge of geography; how the primary curriculum uses geography; teachers' planning of geography teaching; the way in which aspects of geography are taught; what high quality geography might look like; and children's geographical understanding and voices. Though geography curricula change quite often in countries around the world, the core matters noted above remain of constant and vital importance. The papers in this book either concern research with primary teachers and children, or consider key concerns in primary geography, providing important perspectives for thinking about future developments in geography teaching and curriculum initiatives in primary schools. This is a stimulating and enticing collection written by leading exponents of, and experts in, primary geography education. This book was originally published as a special issue of *Education 3-13*. *Knowledge Intensive Business Services and Regional Competitiveness* Sep 10 2020 Research interest in the service sector has boomed in recent years as deindustrialisation became entrenched. Instead of being regarded as merely supplementary to traditional industry and manufacturing, services have generated progressively rising levels of growth in developed economies while at the same time coming to be recognised as major drivers of innovation. Among the factors which have helped service companies notch up swifter growth rates than all other sectors are the outsourcing of such services by other sectors, including the development of information and communication technologies, and changes to the regulatory, legal and market frameworks as well as globalisation and internationalisation. The result is a cluster of highly innovative firms which can loosely be grouped under the heading of Knowledge Intensive Business Services (KIBS). *Knowledge Intensive Business Services and Regional Competitiveness* charts the development of these firms and explores their success through four mutually linked parts: KIBS and industrial dynamics; KIBS and their context; KIBS and their contribution to regional competitiveness and economic development; and finally, KIBS and public policy. This book is suitable for researchers and policy makers interested in the rise of these influential actors and their influence on regional competitiveness.

Issues in Transportation Research and Application: 2013 Edition Oct 04 2022 *Issues in Transportation Research and Application: 2013 Edition* is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Transport Geography. The editors have built *Issues in Transportation Research and Application: 2013 Edition* on the vast information databases of ScholarlyNews.™ You can expect the information about Transport Geography in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of *Issues in Transportation Research and Application: 2013 Edition* has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

New Challenges in Energy Security Oct 31 2019 We are faced with the twin urgent challenges of delivering a low carbon and secure energy system. The last few years have seen Britain moving from being a net exporter to a net importer of energy. The threat of climate change has led to the slow but inexorable inclusion of environmental concerns in mainstream energy policy. Against this backdrop, economic and political power around the globe has altered, creating a complex, multipolar world. Rising concerns about the long term availability and price of oil, gas and uranium only add to the challenges facing Britain. This timely volume brings together key researchers and practitioners from a wide range of disciplines, including energy policy, international relations and supply chains, to explore the practical policy options in addressing energy security in Britain.

The Political Economy and Media Coverage of the European Economic Crisis May 07 2020 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent, it has failed to revive economies. The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light, even if the latter's aim has been to shift the burden of adjustment onto citizens. This book explains how and why, using a critical political economic perspective and focusing on the case of Ireland.

Throughout, Ireland is compared with contemporary and historical examples to contextualise the arguments made. The book covers the housing bubble that led to the crash, the rescue of financial institutions by the state, the role of the European institutions and the International Monetary Fund, austerity, and the possibility of leaving the eurozone for Europe's peripheral countries. Through a systematic analysis of Ireland's main newspapers, it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis.

GCSE Geography Edexcel B Sep 03 2022 A student-friendly and engaging resource for the 2016 Edexcel GCSE Geography B specification, this brand new course is written to match the demands of the specification. As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress.

Local and Regional Development Aug 29 2019 Actors and institutions in localities and regions across the world are seeking prosperity and well-being amidst tumultuous and disruptive shifts and transitions generated by: an increasingly globalised, knowledge-intensive capitalism; global financial instability, volatility and crisis; concerns about economic, social and ecological sustainability, climate change and resource shortages; new multi-actor and multi-level systems of government and governance and a re-ordering of the international political economy; state austerity and retrenchment; and, new and reformed approaches to intervention, policy and institutions for local and regional development. Local and Regional Development provides an accessible, critical and integrated examination of local and regional development theory, institutions and policy in this changing context. Amidst its rising importance, the book addresses the fundamental issues of 'what kind of local and regional development and for whom?', its purposes, principles and values, frameworks of understanding, approaches and interventions, and integrated approaches to local and regional development throughout the world. The approach provides a theoretically informed, critical analysis of contemporary local and regional development in an international and multi-disciplinary context, grounded in concrete empirical analysis from experiences in the global North and South. It concludes by identifying what might constitute holistic, inclusive, progressive and sustainable local and regional development, and reflecting upon its limits and political renewal.

Carceral Geography Jun 19 2021 The 'punitive turn' has brought about new ways of thinking about geography and the state, and has highlighted spaces of incarceration as a new terrain for exploration by geographers. Carceral geography offers a geographical perspective on incarceration, and this volume accordingly tracks the ideas, practices and engagements that have shaped the development of this new and vibrant subdiscipline, and scopes out future research directions. By conveying a sense of the debates, directions, and threads within the field of carceral geography, it traces the inner workings of this dynamic field, its synergies with criminology and prison sociology, and its likely future trajectories. Synthesizing existing work in carceral geography, and exploring the future directions it might take, the book develops a notion of the 'carceral' as spatial, emplaced, mobile, embodied and affective.

Mastering Primary Geography Aug 10 2020 Mastering Primary Geography introduces the primary geography curriculum and helps trainees and teachers learn how to plan and teach inspiring lessons that make learning geography irresistible. Topics covered include: · Current developments in geography · Geography as an irresistible activity · Geography as a practical activity · Skills to develop in geography · Promoting curiosity · Assessing children in geography · Practical issues This guide includes examples of children's work, case studies, readings to reflect upon and reflective questions that all help to show students and teachers what is considered to be best and most innovative practice, and how they can use that knowledge in their own teaching to the greatest effect. The book draws on the experience of two leading professionals in primary geography, Anthony Barlow and Sarah Whitehouse, to provide the essential guide to teaching geography for all trainee and qualified primary teachers.

Diversified Development Sep 22 2021 This report is about the twelve countries of the former Soviet Union (Eurasia). About 85 percent of the region's economic output is in six resource-rich economies. Today, 85 percent of

Eurasia's 280 million people are no longer poor. But academics who study resource-based economies debate whether these countries are cursed or blessed. And Eurasia's policymakers long for the day when their economies are less extractive and more innovative. These observations prompt questions: Are resources a blessing or a curse? If it is one of these things, what would make it into the other? How much should Eurasia try to diversify their exports and economies away from natural resources? Are there ways to make Eurasian economies both extractive and innovative? The answers: a large majority of Eurasia's people should consider themselves blessed. To make sure that this blessing does not become a curse, Eurasian economies have to become efficient—more productive, job-creating, and stable. But efficiency is not the same as diversification: there is little evidence that more concentrated economies have slower productivity growth, fewer jobs, or much more economic volatility. Governments need to worry less about the composition of exports and production and more about asset portfolios—natural resources, built capital, and economic institutions. They have much to do. Eurasia's portfolios are heavy in tangibles like oil and gas and roads and railways and light in intangibles such as the institutions for managing resource earnings, providing social services, and regulating enterprise. But tangibles are not what distinguish success from failure—investments in intangibles, early in their development, have made some resource-rich countries both extractive and innovative.

Financialising City Statecraft and Infrastructure Dec 14 2020 *Financialising City Statecraft and Infrastructure* addresses the struggles of national and local states to fund, finance and govern urban infrastructure. It develops fresh thinking on financialisation and city statecraft to explain the socially and spatially uneven mixing of managerial, entrepreneurial and financialised city governance in austerity and limited decentralisation across England. As urban infrastructure fixes for the London global city-region risk undermining national 'rebalancing' efforts in the UK, city statecraft in the rest of the country is having uneasily to combine speculation, risk-taking and prospective venturing with co-ordination, planning and regulation.

Geography Unbound Aug 22 2021 At the end of the eighteenth century, French geographers faced a crisis. Though they had previously been ranked among the most highly regarded scientists in Europe, they suddenly found themselves directionless and disrespected because they were unable to adapt their descriptive focus easily to the new emphasis on theory and explanation sweeping through other disciplines. Anne Godlewska examines this crisis, the often conservative reactions of geographers to it, and the work of researchers at the margins of the field who helped chart its future course. She tells her story partly through the lives and careers of individuals, from the deposed cabinet geographer Cassini IV to Volney, von Humboldt, and Letronne (innovators in human, physical, and historical geography), and partly through the institutions with which they were associated such as the *Encyclopédie* and the Jesuit and military colleges. *Geography Unbound* presents an insightful portrait of a crucial period in the development of modern geography, whose unstable disciplinary status is still very much an issue today.

Protest, Property and the Commons Mar 29 2022 *Protest, Property and the Commons* focuses on the alternative property narratives of 'social centres', or political squats, and how the spaces and their communities create their own – resistant – form of law. Drawing on critical legal theory, legal pluralism, legal geography, poststructuralism and new materialism, the book considers how protest movements both use state law and create new, more informal, legalities in order to forge a practice of resistance. Invaluable for anyone working within the area of informal property in land, commons, protest and adverse possession, this book offers a ground-breaking account of the integral role of time, space and performance in the instituting processes of law and resistance.

Subaltern Urbanisation in India Apr 05 2020 ?This volume decentres the view of urbanisation in India from large agglomerations towards smaller urban settlements. It presents the outcomes of original research conducted over three years on subaltern processes of urbanization. The volume is organised in four sections. A first one deals with urbanisation dynamics and systems of cities with chapters on the new census towns, demographic and economic trajectories of cities and employment transformation. The interrelations of land transformation, social and cultural changes form the topic of the "land, society, belonging" section based on ethnographic work in various parts of India (Karnataka, Himachal Pradesh, Arunachal Pradesh and Tamil Nadu). A third section focuses on public policies, governance and urban services with a set of macro-analysis based papers and specific case studies. Understanding the nature of production and innovation in non-metropolitan contexts closes this volume. Finally, though focused on India, this research raises larger questions with regard to the study of urbanisation and development worldwide.

The Geography of International Investment Nov 12 2020 Multinationals have become increasingly important to the world economy. Overseas production by U.S. affiliates is three times U.S. exports, for example. Who is investing where, for sales where?

Calendar Feb 13 2021

Geography Education Research in the UK: Retrospect and Prospect May 31 2022 This book provides a unique assessment of the development of research in geography education and its future prospects, offering a challenging critique of subject-based education research, with particular reference to geography education across a range of different jurisdictions. It covers a range of topics, including the changing role of research in geography education; the relationship between education research and professional practice, with special reference to geography education research; the place of academic subject knowledge in geography education research; critiques of the functions of

research in geography education; and the key issues for education policy and policymakers concerning educational research at national and international levels. Importantly, in a period marked by radical change for education research and researchers, the book offers a timely appraisal of possible ways forward for geography education research. Addressing the needs of academics, research students, policymakers, and education practitioners who undertake, use or shape the future of research in geography education, it comprehensively explores the forces that have driven the development of geography education research and pedagogy. Further, by positioning its analysis in the context of education policy debates in the UK, and further afield, it assesses the role and function of research in education, and offers an outlook on its future. This book is essential reading for all those who wish to understand the sporadic and increasingly uncertain development of subject-based research in education

UGC-NET (Paper-I) Previous Years' Papers (Solved) Jan 03 2020 This immensely valuable book of Solved Previous Years' Papers is specially published for the aspirants of UGC-NET (Paper-I) of Junior Research Fellowship and Assistant Professor Eligibility Exam. The book comprises several Solved Previous Years' Papers of UGC-NET Paper-I. Explanatory Answers are presented in such a manner to be useful for study and self-practice. The book is aimed to help you prepare well and sharpen your problem-solving skills by practising through numerous questions in these solved papers and face the exam with confidence, successfully.

Social Geographies Dec 26 2021 Marking the renaissance of social geographies in recent years, this major textbook showcases the breadth of conceptual and empirical approaches that scholars now utilize to understand contemporary social issues through a spatial lens. The book is collectively authored by one of the largest groups of social geographers in the world. It develops a vision of social geographies that is rooted in the commitments that have characterised the sub-discipline for at least half a decade (e.g. society-space relations, justice, equality), while incorporating new approaches, theories and concerns (e.g. emotions, performance, and the more-than-human). Embracing the increasing porosity of our work with neighbouring economic, cultural, political and environmental geographies, the book provides a round-up of the state of the sub-discipline, capturing recent directions and charting new questions and challenges for theory, research and practice. It makes sense of the bewildering variety of contemporary social geographical interests, from longstanding topics (e.g. race, class and gender) to more recent interests (e.g. sustainability, digital worlds and social change). Above all, it makes clear the relevance and contributions of social geographies not only to understanding a wide range of global and local issues, but to social change alongside communities, policy-makers and social movements. Each chapter offers an introduction to current work in social geographies, providing an overview and in-depth examples. The book has these key features that make it an essential resource for any social geography course: An accessible and engaging style that is ideal for entry level students Definitions of key terms and carefully explained concepts and ideas A range of exciting contemporary examples from a wide variety of geographical settings, including those drawn from the authors' recent research Cross-referencing between chapters to help students expand learning Illustration with photos, tables, diagrams and other material Suggestions for further reading in each chapter "Real world research" and "real world theory" textboxes providing examples of research projects and theoretical perspectives, bringing topics alive and exploring challenges on the ground

New directions in telecollaborative research and practice: selected papers from the second conference on telecollaboration in higher education Jan 27 2022 This collection of papers, consisting of 39 delegate contributions and three keynote articles from "New directions in telecollaborative research and practice: the second conference on telecollaboration in higher education" hosted by Trinity College Dublin in April 2016, offers a window on a rapidly evolving form of learning. Telecollaboration is used in many formats and contexts, but has as a defining feature the ability to unite learners from classrooms around the world in meaningful computer-mediated tasks and activities. This cross-disciplinary overview discusses telecollaboration in support of language and culture, teacher training, student mobility, and other disciplines and skills from a range of analytical perspectives. It will be of interest to anyone working in HE as an educator, researcher, educational designer, mobility officer, decision maker or administrator.

Global Perspectives on Contemporary Marketing Education Jul 01 2022 A successful marketing department has the power to make or break a business. Today, marketing professionals are expected to have expertise in a myriad of skills and knowledge of how to remain competitive in the global market. As companies compete for international standing, the value of marketing professionals with well-rounded experience, exposure, and education has skyrocketed. *Global Perspectives on Contemporary Marketing Education* addresses this need by considering the development and education of marketing professionals in an age of shifting markets and heightened consumer engagement. A compendium of innovations, insights, and ideas from marketing professors and professionals, this title explores the need for students to be prepared to enter the sophisticated global marketplace. This book will be invaluable to marketing or business students and educators, business professionals, and business school administrators.

The Revenge of Geography May 19 2021 NEW YORK TIMES BESTSELLER • In this provocative, startling book, Robert D. Kaplan, the bestselling author of *Monsoon* and *Balkan Ghosts*, offers a revelatory new prism

through which to view global upheavals and to understand what lies ahead for continents and countries around the world. Bestselling author Robert D. Kaplan builds on the insights, discoveries, and theories of great geographers and geopolitical thinkers of the recent and distant past to look back at critical pivots in history and then to look forward at the evolving global scene. Kaplan traces the history of the world's hot spots by examining their climates, topographies, and proximities to other embattled lands. He then applies the lessons learned to the present crises in Europe, Russia, China, the Indian Subcontinent, Turkey, Iran, and the Arab Middle East. The result is a holistic interpretation of the next cycle of conflict throughout Eurasia, a visionary glimpse into a future that can be understood only in the context of temperature, land allotment, and other physical certainties. A brilliant rebuttal to thinkers who suggest that globalism will trump geography, this indispensable work shows how timeless truths and natural facts can help prevent this century's looming cataclysms. Praise for *The Revenge of Geography* "[An] ambitious and challenging new book . . . [The Revenge of Geography] displays a formidable grasp of contemporary world politics and serves as a powerful reminder that it has been the planet's geophysical configurations, as much as the flow of competing religions and ideologies, that have shaped human conflicts, past and present."—Malise Ruthven, *The New York Review of Books* "Robert D. Kaplan, the world-traveling reporter and intellectual whose fourteen books constitute a bedrock of penetrating exposition and analysis on the post-Cold War world . . . strips away much of the cant that suffuses public discourse these days on global developments and gets to a fundamental reality: that geography remains today, as it has been throughout history, one of the most powerful drivers of world events."—*The National Interest* "Kaplan plunges into a planetary review that is often thrilling in its sheer scale . . . encyclopedic."—*The New Yorker* "[The Revenge of Geography] serves the facts straight up. . . . Kaplan's realism and willingness to face hard facts make *The Revenge of Geography* a valuable antidote to the feel-good manifestoes that often masquerade as strategic thought."—*The Daily Beast*

Computers in Railways XV Jan 15 2021 This title incorporates the 15th proceedings of the very successful International Conference on Railway Engineering Design and Operation (COMPRAIL) series, which began in Frankfurt 1987 and continued in Rome (1990); Washington (1992); Madrid (1994); Berlin (1996); Lisbon (1998); Bologna (2000); Lemnos (2002); Dresden (2004); Prague (2006); Toledo (2008); Beijing (2010); the New Forest, home of the Wessex Institute (2012) and, again in Rome in 2014. The papers presented at this conference aim to update the use of advanced systems, promoting their general awareness throughout the management, design, manufacture and operation of railways and other emerging passenger, freight and transit systems. With the conference attracting a variety of specialists, including railway engineers, designers of advanced train control systems and computer specialists, the book particularly emphasises the use of computer systems in advanced railway engineering. Topics include but are not restricted to: Advanced train control Operations quality; Risk management; Planning and policy; Energy supply and consumption; Communications and signalling; Operational planning; Interface management; Systems integration; Maglev; High speed technology; Interoperability; Passenger flow management; Computer simulations and Driverless and automatic train operation.

The Unions' Response to Globalization Apr 17 2021 Globalization is commonly described in trade and cultural terms but its impact on unions and collective bargaining is seldom assessed. The few studies of unions and globalization are mostly collections of cases studies of how unions can work together or with other alliance partners to defend against the power of multinational corporations. This book goes beyond the current research by asking how unions have tried to deal with globalization and how globalization might threaten the fundamental union mission of taking wages, hours and conditions of employment out of competition. The introductory chapter defines globalization and uses the case of the Detroit Three automakers (GM, Chrysler and Ford) to show how globalization can affect employment and union size, influence and relevancy. The second chapter shows how unions deal globalization through collective bargaining regarding outsourcing, alliances, strikes and political action, including lobbying and international work standards. The final chapter argues that the unions cannot continue unchanged in this age of globalization and asks what they must do to be effective and relevant.

The Geography of Bosnia and Herzegovina Jul 21 2021 This monograph provides a comprehensive overview of fundamental scientific insights into the geographical features of a country which was and still is in the centre of the geopolitical battle of the large world powers and especially neighboring countries. The book presents the scientifically proven reserves of individual resources such as: mineral riches, land, forests, flora and fauna, water and climate features, to the extent needed, through statistical indicators and geographic maps. The authors point to features and specifics of the existing interdependence of economic and political development and impact of natural resources on spatial development which can be useful for potential investors, spatial planners, decision makers, politicians, geographers, students, large Bosnian diaspora and anyone interested in area of Bosnia and Herzegovina. This book fills the gap in geographical literature on Bosnia and Herzegovina in the English language. The monograph appeals to researchers and scholars of all levels in the fields of geography, geopolitics, history and related fields and everyone interested in this country between East and West.

For Creative Geographies Jun 07 2020 This book provides the first sustained critical exploration, and celebration, of the relationship between Geography and the contemporary Visual Arts. With the growth of research in the

Geohumanities and the Spatial Humanities, there is an imperative to extend and deepen considerations of the form and import of geography-art relations. Such reflections are increasingly important as geography-art intersections come to encompass not only relationships built through interpretation, but also those built through shared practices, wherein geographers work as and with artists, curators and other creative practitioners. For *Creative Geographies* features seven diverse case studies of artists' works and exhibitions made towards the end of the twentieth and the beginning of the twentieth-first century. Organized into three analytic sections, the volume explores the role of art in the making of geographical knowledge; the growth of geographical perspectives as art world analytics; and shared explorations of the territory of the body. In doing so, Hawkins proposes an analytic framework for exploring questions of the geographical "work" art does, the value of geographical analytics in exploring the production and consumption of art, and the different forms of encounter that artworks develop, whether this be with their audiences, or their makers.

The Nature of the Environment Jul 29 2019 Discusses the components of the environment, the interactions between man and nature, and recent theories and research, proceeding from the global scale to more local scales.

Geography for CCEA GCSE Mar 17 2021 This title covers the complete GCSE Geography course from CCEA. It features: an introduction to each section with points from the specification and a key word box; activities to text students and provide structured notes on each section; and maps, diagrams, tables, satellite images and photos to enhance and reinforce learning.

Insight Turkey 2015? ?- Fall 2015 (Vol. 17, No. 4) Feb 25 2022 Last year was the year of elections in Turkey with two parliamentary elections and months-long electoral campaigns that dominated the political agenda of the country. The parliamentary elections of June 7, 2015 brought an end to the AK Party's 12-year long era of parliamentary majority and single-party government in Turkey. Nevertheless, the endeavors to form a coalition government could not be concluded successfully and another election appeared on the horizon. The country was ruled by an AK Party-led interim government and the elections were repeated five months later on November 1, 2015. While close in time, the two elections were quite distant with regard to the political contexts in which they were carried out, and in their respective results. The November elections witnessed a comeback for the AK Party, which increased its votes by over 9 points with the addition of five million new votes in the ballot box.

Carceral Spaces Oct 24 2021 This book draws together the work of a new community of scholars with a growing interest in carceral geography: the geographical study of practices of imprisonment and detention. It combines work by geographers on 'mainstream' penal establishments where people are incarcerated by the prevailing legal system, with geographers' recent work on migrant detention centres, where irregular migrants and 'refused' asylum seekers are detained, ostensibly pending decisions on admittance or repatriation. Working in these contexts, the book's contributors investigate the geographical location and spatialities of institutions, the nature of spaces of incarceration and detention and experiences inside them, governmentality and prisoner agency, cultural geographies of penal spaces, and mobility in the carceral context. In dialogue with emergent and topical agendas in geography around mobility, space and agency, and in relation to international policy challenges such as the (dis)functionality of imprisonment and the search for alternatives to detention, this book presents a timely addition to emergent interdisciplinary scholarship that will prompt dialogue among those working in geography, criminology and prison sociology.
