Making forest concessions in the tropics work to achieve the 2030 Agenda Aug 01 2022 The specific objective of these Voluntary Guidelines is to promote the sustainable management of public production natural forests in tropical countries through forest concessions, thereby fulfilling their potential contribution to the achievement of Agenda 2030. Forest concession regimes are treated here as forest policy instruments, and should be aligned with the sustainable forest management objectives agreed by countries in the UNFF. The current Guidelines intend to serve as guidance for making forest concessions an effective economic instrument of forest policy in the context of the 2030 Agenda, transforming them into an instrument capable of delivering sustainable forest management in all its dimensions, and generating socio-economic benefits to relevant stakeholders.
