Manual on Irrigation

Engineering Sep 10 2020

The irrigation water is considered as the essential input for crop production. Over exploitation of natural water resources has caused a menace for the future human generations. The depletion of underground water table in high productivity areas and under utilization of the water resources in rain fed areas of the country, poor irrigation efficiency and high

seepage losses from conveyance system, poor land development and mismanagement of the irrigation water resources has acquired alarming proportions. As the share of water for agriculture in future is going to reduce, there will be tremendous pressure to produce more per drop of water in order to meet the food and other requirements of burgeoning population of the country. The existing irrigation water resources are not utilized judiciously and their mismanagement has lead to problems like low production efficiency, salinization, water logging and degradation of land. To manage these problems and increase the production efficiency of irrigation, it is pertinent to adopt judicious methods of irrigation water use, by efficient on-farm irrigation management based on scientific approach. Therefore, a comprehensive knowledge of available soil moisture and its constants, scheduling and quality of irrigation water are

with five defined levels of quality have been developed that cover the key areas of architecture, environmental engineering, user comfort conditions, whole-life costs, detail design and user satisfaction. These can be scored by a visual survey and professional judgement and then augmented by scientific measurement where possible (e.g. temperature, lighting and sound levels). The resultant scores allow comparisons in terms of overall and specific aspects of building performance and design quality. The Manual covers schools, hospitals and housing and offers a set of criteria by which to judge a broad range of design values; it focuses the design team on the needs of the end user and on the overall building performance.

associates were evaluating a new cockroach control product in a high-rise housing project. Cockroach populations were high, even though the apartment they were in was squeaky clean. The three small children that shared a twin bed there looked different, but no one was sure why. Dr.

Frishman pointed out that they didn't have any eyebrows or lashes, and then he exposed thousands of roaches hiding behind the headboard. Some things you never forget. Having Paul Bello, an industry expert himself with years of practical experience, team up with Dr. Cockroach makes The Cockroach Combat Manual II a must-read because cockroach control is deserving of our best efforts.
