The Glass Painting Mar 20
2022 A SHOCKING NOVEL OF
SEX AND HORROR The old
painting was done on glass,
and found beneath the ruins of
the ancient, decaying French
mansion that Emily Hastings'
sister, Irene, had inherited
from the estate of the Marquis
de Garac. The cold and distant
Monsieur Philippe Gastion
informed them that the
painting was a forgotten
masterpiece and should be
given a place of honor. Soon
afterwards, Irene became
mysteriously ill, and other
signs of imminent danger
pointed directly toward Emily.
There were rumors of the
cruelty and unbridled sexuality
of the long-deceased owners. A
strange black cat haunted the
house, and the crumbling
mausoleum out back was never
to be visited. And then the
image on the glass painting
began to change!

[Beneath the Moors and Darker Places](#) Oct 15 2021 In addition to his stellar Necroscope series, Brian Lumley is highly regarded for his short fiction, for which he has won the British Fantasy Award. *Beneath the Moors and Darker Places*, a companion to *The Whisperer and Other Voices*, collects nine lengthy exemplars of the best of Lumley's short works, many of them unavailable for decades in any form. *The Cthulhu Mythos of the immortal H.P. Lovecraft* provides inspiration for much of Lumley's work, including "Dagon's Bell" and "Big C," both included here. The explosive creation of a new volcanic island off Iceland in 1967 led to "Rising with Surtsey," a homage not just to Lovecraft but to the great August Derleth. "David's Worm"--which takes an interesting view of "you are what you eat"--was published in a Year's Best Horror Stories and later adapted for radio in Europe. The collection also includes the macabre "The Second Wish," published here for the first time with the author's original, intended ending, and "The Fairground Horror," first published in *The Disciples of Cthulhu* twenty-five years ago and not seen since save for a small press edition. The title tale, *Beneath the Moors*, a complete short novel, has been unavailable in the United States since its first publication by Arkham House.

short short stories by Brian Lumley, works that have never before appeared in book form. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Haggopian and Other Stories Jan 06 2021 Prior to the first American publication of Brian Lumley's ground-breaking, dead-waking, best-selling Necroscope in 1988—the first novel in a long-lived, much-loved series—this British author had for twenty years been earning himself something of a reputation writing short stories, novellas, and a series of novels set against H. P. Lovecraft's cosmic Cthulhu Mythos backdrop. A soldier in 1967, serving in Berlin with the Royal Military Police, Lumley jumpstarted his literary career by writing to August Derleth, the then-dean of macabre publishers at his home in Sauk City, Wisconsin, telling of his fascination with the Mythos, and purchasing books by the "Old Gentleman of Providence, RI." In addition, he sent a page or two of written work allegedly culled from the various forbidden or "black books" of the Mythos. Suitably impressed, the master of Arkham House invited Lumley to write something solid in the Mythos as a possible contribution to a new volume he was currently contemplating, to be titled—what else but?—Tales of the Cthulhu Mythos. And as might well be imagined, that set everything in motion. Years have passed since then and a good many words of Mythos

The Hastur Cycle Jul 12 2021 The stories in this book evoke a tracery of evil rarely rivaled in horror writing. They represent the whole evolving trajectory of such notions as Hastur, the King in Yellow, Carcosa, the Yellow Sign, the Black Stone, Yuggoth, and the Lake of Hali. A succession of writers from Ambrose Bierce to Ramsey Campbell and Karl Edward Wagner have explored and embellished these concepts so that the sum of the tales has become an evocative tapestry of hypnotic dread and terror, a mythology distinct from yet overlapping the Cthulhu Mythos. The Evolution Underground: Burrows, Bunkers, and the Marvelous Subterranean

World Beneath our Feet Nov

04 2020 What is the best way to survive when the going gets tough? Hiding underground.

From penguins to dinosaurs, trilobites, and humans, Anthony Martin reveals the subterranean secret of survival. Humans have "gone underground" for survival for thousands of years, from underground cities in Turkey to Cold War-era bunkers. But our burrowing roots go back to the very beginnings of animal life on earth. Without burrowing, the planet would be very different today. Many animal lineages alive now—including our own—only survived a cataclysmic meteorite strike

65 million years ago because they

went underground. On a grander scale, the chemistry of the planet itself had already been transformed many millions of years earlier by the first animal burrows, which altered whole ecosystems.

Every day we walk on an earth filled with an under-ground wilderness teeming with life. Most of this life stays hidden, yet these animals and their subterranean homes are ubiquitous, ranging from the deep sea to mountains, from the equator to the poles. Burrows are a refuge from predators, a safe home for raising young, or a tool to ambush prey. Burrows also protect animals against all types of natural disasters: fires, droughts, storms, meteorites, global warmings—and coolings. In a book filled with spectacularly diverse fauna, acclaimed paleontologist and ichnologist Anthony Martin reveals this fascinating, hidden world that will continue to influence and transform life on this planet.

Ecological and Environmental Physiology of Mammals Apr 28 2020

Mammals are the so-called "pinnacle" group of vertebrates, successfully colonising virtually all terrestrial environments as well as the air (bats) and sea (especially pinnipeds and cetaceans). How mammals function and survive in these diverse environments has long fascinated mammalogists, comparative physiologists and ecologists. Ecological and Environmental Physiology of Mammals explores the physiological mechanisms and

evolutionary necessities that have made the spectacular adaptation of mammals possible. It summarises our current knowledge of the complex and sophisticated physiological approaches that mammals have for survival in a wide variety of ecological and environmental contexts: terrestrial, aerial, and aquatic.

The authors have a strong comparative and quantitative focus in their broad approach to exploring mammal ecophysiology. As with other books in the Ecological and Environmental Physiology Series, the emphasis is on the unique physiological characteristics of mammals, their adaptations to extreme environments, and current experimental techniques and future research directions are also considered. This accessible text is suitable for graduate level students and researchers in the fields of mammalian comparative physiology and physiological ecology, including specialist courses in mammal ecology. It will also be of value and use to the many professional mammalogists requiring a concise overview of the topic.

Singers of Strange Songs Oct 03 2020 Most readers acknowledge Brian Lumley as the superstar of British horror writers. With the great popularity of his Necroscope series, he is one of the best known horror authors in the world. Devoted fans know that his roots are deep in the Cthulhu Mythos, with which most of his early work deals. This volume contains eleven new tales in that vein, as well as three reprints of excellent but little-known stories by Mr. Lumley.

At the Mountains of Madness Mar 28 2020 At the Mountains of Madness, Lovecraft's incontrovertible masterpiece, written in February-March 1931, is a story details the events of a disastrous expedition to the barren, windswept Antarctic continent, where the secret history of our planet is

preserved, amidst the ruins of its first civilization, in September 1930, and what was found there by a group of explorers led by the narrator, Dr. William Dyer of Miskatonic University. Throughout the story, Dyer details a series of previously untold events in the hope of deterring another group of explorers who wish to return to the continent. It uncovers strange fossils and mind-blasting terror. Since it was originally serialized in the February, March, and April 1936 issues of *Astounding Stories* during the classic pulp era, 'At the Mountains of Madness' has influenced both horror and science fiction worldwide. Lovecraft scholar S.T. Joshi describes the novella as representing the decisive "demythology" of the Cthulhu Mythos by reinterpreting Lovecraft's earlier supernatural stories in a science fiction paradigm.
