Legitimacy and Power Politics Oct 19 2021 This book examines the causes and consequences of a major transformation in both domestic and international politics: the shift from dynastically legitimated monarchical sovereignty to popularly legitimated national sovereignty. It analyzes the impact of Enlightenment discourse on politics in eighteenth-century Europe and the United States, showing how that discourse facilitated new authority struggles in Old Regime Europe, shaped the American and French Revolutions, and influenced the relationships between the revolutionary regimes and the international system. The interaction between traditional and democratic ideas of legitimacy transformed the international system by the early nineteenth century, when people began to take for granted the desirability of equality, individual rights, and restraint of power. Using an interpretive, historically sensitive approach to international relations, the author considers the complex interplay between elite discourses about political legitimacy and strategic power struggles within and among states. She shows how culture, power, and interests interacted to produce a crucial yet poorly understood case of international change. The book not only shows the limits of liberal and realist theories of international relations, but also demonstrates how aspects of these theories can be integrated with insights derived from a constructivist perspective that takes culture and legitimacy seriously. The author finds that cultural contests over the terms of political legitimacy constitute one of the central mechanisms by which the character of sovereignty is transformed in the international system--a conclusion as true today as it was in the eighteenth century.

Women, Power, and Political Representation Mar 31 2020 Delving into the pressing topic of gender and politics, this volume provides fresh comparative perspectives on "what works" to promote women in politics today. Inspiring and informative, *Women, Power, and Political Representation* offers a comprehensive overview of the role women play in contemporary politics, and pinpoints the reasons behind their underrepresentation. Discussing the challenges and opportunities women face when running for office, as well as their experiences as political leaders, this book offers a broad and thoughtful overview of the pitfalls encountered by women, from gender biases to sexual harassment, in the notoriously male dominated political arena. Featuring a range of voices that articulate a path towards women's political advancement and equality, *Women, Power, and Political Representation* is an important and timely resource for scholars, students, and women working professionally in Canadian and international politics.

Power, Politics, and Paranoia May 02 2020 Why are people frequently suspicious of their political and corporate leaders? This book examines the psychological roots of political paranoia.

Power and Politics in Sustainable Consumption Research and Practice Jun 26 2022 With growing awareness of environmental deterioration, atmospheric pollution and resource depletion, the last several decades have brought

increased attention and scrutiny to global consumption levels. However, there are significant and well documented limitations associated with current efforts to encourage more sustainable consumption patterns, ranging from informational and time constraints to the highly individualizing effect of market-based participation. This volume, featuring essays solicited from experts engaged in sustainable consumption research from around the world, presents empirical and theoretical illustrations of the various means through which politics and power influence (un)sustainable consumption practices, policies and perspectives. With chapters on compelling topics including collective action, behaviour-change and the transition movement, the authors discuss why current efforts have largely failed to meet environmental targets and explore promising directions for research, policy and practice. Featuring contributions that will help the reader open up politics and power in ways that are accessible and productive and bridge the gaps with current approaches to sustainable consumption, this book will be of great interest to students and scholars of sustainable consumption and the politics of sustainability.

Mathematics and Politics Aug 17 2021 interest in a particular application, however, often depends on his or her general interest in the area in which the application is taking place. My experience at Union College has been that there is a real advantage in having students enter the course knowing that virtually all the applications will focus on a single discipline—in this case, political science. The level of presentation assumes no college-level mathematical or social science prerequisites. The philosophy underlying the approach we have taken in this book is based on the sense that we (mathematicians) have tended to make two errors in teaching non-science students:

we have overestimated their comfort with computational material, and we have underestimated their ability to handle conceptual material. Thus, while there is very little algebra (and certainly no calculus) in our presentation, we have included numerous logical arguments that students in the humanities and the social sciences will find accessible, but not trivial. The book contains five main topics: a model of escalation, game theoretic models of international conflict, yes-no voting systems, political power, and social choice. The first part of the text is made up of a single chapter devoted to each topic. The second part of the text revisits each topic, again with a single chapter devoted to each. The organization of the book is based on pedagogical considerations, with the material becoming somewhat more sophisticated as one moves through the ten chapters. On the other hand, within any given chapter there is little reliance on material from earlier chapters, except for those devoted to the same topic.

Cities, Politics & Power Mar 12 2021 Traditionally, the study of 'power in the city' was confined to the institutions of urban government and the actors involved in contesting and making political decisions in and for metropolitan societies. Increasingly, however, attention has turned to the function of the city not only as a centre of urban governance but as a major economic, social, cultural and strategic force in its own right. *Cities, Politics and Power* combines this traditional concern with how the cities in which we live are organized and run with a broader focus on cities and urban regions as multiple sites and agents of power. This book is divided into five sections, with a short introduction outlining the argument and organisation of the text. Part two charts the development of the urban polity and considers the ways in which coercion and force continue to be used to segregate, oppress and annihilate urban populations. Part three critically examines the key collective actors and processes that compete for and organise political power within cities, and how urban governance operates and interacts with lesser and greater scales of government and networks of power. Part four then explores the ways in which 'the political' is constituted by urban inhabitants, and how social identity, information and communication networks, and the natural and built environment all comprise intersecting fields of urban power. The conclusion calls for a broader theoretical and thematic approach to the study of urban politics. This book makes extensive use of comparative and historical case studies, providing broad coverage of politics and urban movements in both the Global North and the Global South, with a particular focus on the UK, USA, Canada, Latin America and China. It is written in an accessible and lucid style and provides suggestions for further reading at the end of each chapter.

Power and Politics in World Athletics Oct 07 2020 This book provides the first detailed history of one of the most powerful international sport organisations, the International Association of Athletics Federations (IAAF), since 2019 known as World Athletics. The book critically assesses the internal power relations within the IAAF by focusing on the IAAF leadership. Based on extensive archival research, *Power and Politics in World Athletics* offers a nuanced analysis of the institutionalised strategies that developed as a reflection of the IAAF's interests and aims to create a broader understanding of the global sport system. With only six presidents in over a century of existence, the IAAF's leaders had profound impacts on other international institutions, national stakeholders and sporting participants. Through four sections, the book identifies various key turning points in the history of the governing body of athletics, and explores the IAAF's foundation, the policies of past IAAF presidents, and controversial issues such as doping, corruption and manipulation through a socio-historical lens. The book shows that while anyone could take part in athletics, policies enacted by each president served to ostracize those groups who did not fit into the IAAF's vision of an equal playing field. This book is essential reading for anyone with an interest in sport history, sport sociology, the politics of sport, sport management, sport governance, or international organisations.

Power and Organizations Jun 22 2019 "A marvelous addition to the literature on both organizations and power. It is

well-grounded in the research on these topics and especially the wide-range of relevant theorizing... The book is terrific at bringing together theory, research and the world of organizations." - George Ritzer, Distinguished University Professor, University of Maryland "This book tirelessly illuminates the nooks and crannies of the power literature...taking readers on an audacious tour of power's multiple conceptualizations and expressions." - Hugh Willmott, Diageo Professor of Management Studies, University of Cambridge "Clegg and his associates expose the power dynamics that lie at the heart of all political and organizational arenas, and in so doing, they shed light on the underbelly along with the creative potentialities in organizational life." -Joyce Rothschild, Professor of Sociology, Virginia Polytechnic Institute and State University "Strange but true - most studies of organizational hierarchies downplay the issue of power or uncritically assume more is better, while ignoring its pernicious effects. Stewart Clegg, David Courpasson and Nelson Phillips set the record straight." - Joanne Martin, Merrill Professor of Organizational Behavior and, by courtesy, Sociology Stanford University Graduate School of Business, Stanford In this tour de force, Stewart Clegg, David Courpasson and Nelson Phillips provide a comprehensive account of power and organizations, unlocking power as the central relation of modern organizations and society. The authors present an excellent synthesis of organization, social and political theory to offer an overview of power and organizations that is historically informed, addresses current issues and is comprehensive in scope. Power and Organizations reviews the evolution of theories on power and organization, presenting not only the theorists who identify power as positive, but also dealing with the negativity of power and the real horror of which organizations are capable, which has thus far been underplayed in organization theory. At the core of organizational power projects are organizational elites, whose politics and projects are examined extensively in the book. The book concludes by examining the implications for organizations and their elites of the trends, tendencies, and theories considered in the course of the book. This book is required reading for graduate students and researchers in areas such as organizational, social and political theory.

Power Politics Feb 29 2020 This account of state-systems, which derives not from theoretical models but from the study of state-systems that have actually existed, emphasizes their moral or normative bases. It argues that a system of states presupposes a common culture. The essays deal with the concept of systems of states: the state-systems of Hellas; Hellas and Persia; the geographical and chronological boundaries of the modern states-system; international legitimacy; and triangles and duels. An introductory chapter by Hedley Bull draws the essays together and provides an account of Martin Wright's life and thought.

Power in World Politics Apr 24 2022 This book engages the view that students of International Relations need to break with the habit of defining power in terms of military capabilities of states. Featuring contributions from both upcoming and distinguished scholars, including Steven Lukes, Joseph Nye, and Stefano Guzzini, it explores the nature and location of 'power' in international politics through a variety of conceptual lenses. With a particular focus on the phenomenon of 'soft' power and different types of actors in a globalizing world, fifteen chapters assess the meaning of 'power' from the perspectives of realism, constructivism, global governance, and development studies, presenting discussions ranging from conceptual to practical oriented analyses. Power in World Politics attempts to broaden theoretical horizons to enrich our understanding of the distribution of power in world politics, thereby also contributing to the discovery and analysis of new political spaces. This is essential reading for all advanced students and scholars of international relations.

Aid Power and Politics Feb 20 2022 Aid Power and Politics delves into the political roots of aid policy, demonstrating how and why governments across the world use aid for global influence, and exploring the role it plays in present-day global governance and international relations. In reconsidering aid as part of international relations, the book argues that the interplay between domestic and international development policy works in both directions, with individual countries having the capacity to shape global issues, whilst at the same time, global agreements and trends, in turn, shape the political behaviour of individual countries. Starting with the background of aid policy and international relations, the book goes on to explore the behaviour of both traditional and emerging donors (the US, the UK, the Nordic countries, Japan, Spain, Hungary, Brazil, and the European Union), and then finally looks at some big international agendas which have influenced donors, from the liberal consensus on democracy and good governance, to gender equality and global health. Aid Power and Politics will be an important read for international development students, researchers, practitioners and policy makers, and for anyone who has ever wondered why it is that countries spend so much money on the well-being of non-citizens outside their borders.

Power and Politics in Poststructuralist Thought Nov 07 2020 This book explores the impact of poststructuralism on contemporary political theory by focussing on problems and issues central to politics today. Drawing on the theoretical concerns brought to light by the 'poststructuralist' thinkers Foucault, Derrida, Lacan, Deleuze and Max Stirner, Newman provides a critical examination of new developments in contemporary political theory: post-Marxism, discourse analysis, new theories of ideology and power, hegemony, radical democracy and psychoanalytic theory. He re-examines the political in light of these developments in theory to suggest new ways of thinking about politics through a reflection on the challenges that confront it. This volume will be of great interest to students of

postmodernism and poststructuralist theory in political science, philosophy, sociology, philosophy and cultural studies.

People, Power and Politics Dec 21 2021 'First-rate . . . The text has a little for everyone and could suit the political ideas people, the humanists, and the behavioralists. And there is enough of a nuts and bolts approach to this book to satisfy those who want students to come away from the course as 'master mechanics' of political dilemmas.'-David W. Dent, Towson State University

Politics Is for Power Feb 08 2021 A brilliant condemnation of political hobbyism—treating politics like entertainment—and a call to arms for well-meaning, well-informed citizens who consume political news, but do not take political action. Who is to blame for our broken politics? The uncomfortable answer to this question starts with ordinary citizens with good intentions. We vote (sometimes) and occasionally sign a petition or attend a rally. But we mainly “engage” by consuming politics as if it’s a sport or a hobby. We soak in daily political gossip and eat up statistics about who’s up and who’s down. We tweet and post and share. We crave outrage. The hours we spend on politics are used mainly as pastime. Instead, we should be spending the same number of hours building political organizations, implementing a long-term vision for our city or town, and getting to know our neighbors, whose votes will be needed for solving hard problems. We could be accumulating power so that when there are opportunities to make a difference—to lobby, to advocate, to mobilize—we will be ready. But most of us who are spending time on politics today are focused inward, choosing roles and activities designed for our short-term pleasure. We are repelled by the slow-and-steady activities that characterize service to the common good. In *Politics Is for Power*, pioneering and brilliant data analyst Eitan Hersh shows us a way toward more effective political participation. Aided by political theory, history, cutting-edge social science, as well as remarkable stories of ordinary citizens who got off their couches and took political power seriously, this book shows us how to channel our energy away from political hobbyism and toward empowering our values.

Politics and Power in the Multinational Corporation Jun 14 2021 This book was first published in 2011. The current financial and economic crisis has negatively underlined the vital role of multinational companies (MNCs) in our daily lives. The breakdown and crisis of flagship MNCs, such as Enron, WorldCom, Lehman Brothers, Toyota and General Motors, does not merely reveal the problems of corporate malfeasance and market dysfunction. It also raises important questions, both for the public and the academic community, about the use and misuse of power by MNCs in the wider society, as well as the exercise of power by key actors within internationally operating firms. This book examines how issues of power and politics affect MNCs at three different levels; the macro-level, the meso-level and the micro-level. This wide-ranging analysis shows not only that power matters but also how and why it matters, pointing to the political interactions of key power holders and actors within the MNC, both managers and employees.

Power, Politics, and Culture Jul 04 2020 Edward Said has long been considered one of the world’s most compelling public intellectuals, taking on a remarkable array of topics with his many publications. But no single book has encompassed the vast scope of his stimulating erudition quite like *Power, Politics, and Culture*, a collection of interviews from the last three decades. In these twenty-eight interviews, Said addresses everything from Palestine to Pavarotti, from his nomadic upbringing under colonial rule to his politically active and often controversial adulthood, and reflects on Austen, Beckett, Conrad, Naipaul, Mahfouz, and Rushdie, as well as on fellow critics Bloom, Derrida, and Foucault. The passion Said feels for literature, music, history, and politics is powerfully conveyed in this indispensable complement to his prolific life's work.

How Artifacts Afford Jan 22 2022 A conceptual update of affordance theory that introduces the mechanisms and conditions framework, providing a vocabulary and critical perspective. Technological affordances mediate between the features of a technology and the outcomes of engagement with that technology. The concept of affordances, which migrated from psychology to design with Donald Norman's influential 1988 book, *The Design of Everyday Things*, offers a useful analytical tool in technology studies—but, Jenny Davis argues in *How Artifacts Afford*, it is in need of a conceptual update. Davis provides just such an update, introducing the mechanisms and conditions framework, which offers both a vocabulary and necessary critical perspective for affordance analyses. The mechanisms and conditions framework shifts the question from what objects afford to how objects afford, for whom, and under what circumstances. Davis shows that through this framework, analyses can account for the power and politics of technological artifacts. She situates the framework within a critical approach that views technology as materialized action. She explains how request, demand, encourage, discourage, refuse, and allow are mechanisms of affordance, and shows how these mechanisms take shape through variable conditions—perception, dexterity, and cultural and institutional legitimacy. Putting the framework into action, Davis identifies existing methodological approaches that complement it, including critical technocultural discourse analysis (CTDA), app feature analysis, and adversarial design. In today's rapidly changing sociotechnical landscape, the stakes of affordance analyses are high. Davis's mechanisms and conditions framework offers a timely theoretical reboot, providing tools for the crucial tasks of both analysis and design.

The Archaeology of Power and Politics in Eurasia May 14 2021 For thousands of years, the geography of Eurasia has facilitated travel, conquest and colonization by various groups, from the Huns in ancient times to the Union of Soviet Socialist Republics in the past century. This book brings together archaeological investigations of Eurasian regimes and revolutions ranging from the Bronze Age to the modern day, from Eastern Europe and the Caucasus in the west to the Mongolian steppe and the Korean Peninsula in the east. The authors examine a wide-ranging series of archaeological studies in order to better understand the role of politics in the history and prehistory of the region. This book re-evaluates the significance of power, authority and ideology in the emergence and transformation of ancient and modern societies in this vast continent.

The Politics and Economics of Power Apr 12 2021 The Politics and Economics of Power looks at the emerging interface between economics and politics. The analysis of power relations - traditionally the preserve of political science - is increasingly being adopted by economists in order to aid understanding of concepts such as the 'contested nature' of market exchanges. The papers examine power relations in the firm and market-place, and offer an economic perspective on power relations.

Music, Power, and Politics May 26 2022 Music, Power, and Politics presents sixteen different cultural perspectives on the concept of music as a site of socio-political struggle. Essays by scholars from around the world explore the means by which music's long-acknowledged potential to persuade, seduce, indoctrinate, rouse, incite, or even silence listeners, has been used to advance agendas of power and protest. The essays included examine: music used to convey political ideology in Nazi Germany, apartheid-era South Africa, and modern-day North Korea postcolonial musical efforts to reclaim ethnic heritage in Serbia and the Caribbean music as a means of establishing new cultural identities for recently empowered social groups in the UK and Brazil the subversion of racial stereotypes through popular music in the USA music as a tool of popular resistance to oppressive government policies in modern day Iran and the Bolivian Andes

People Power and Political Change Mar 24 2022 This book examines the upsurge in mass popular protest against undemocratic regimes. Relating early revolutions to recent global trends and protests, it examines the significance of 'people power' to democracy. Taking a comparative approach, this text analyses unarmed uprisings in Iran 1977-79, Latin America and Asia in the 1980s, Africa from 1989-1992, 1989 in Eastern Europe and ex-Soviet states after 2000, right up to the 2011 'Arab Spring'. The author assesses the influence on people power of global politics and trends, such as the growth of international governmental organizations and international law, citizen networks operating across borders, and emerging media (like Twitter and Wikileaks). Although stressing the positive potential of people power, this text also examines crucial problems of repression, examples of failure and potential political problems, disintegration of empires and the role of power rivalries. Drawing from contemporary debates about democratization and literatures on power, violence and nonviolence, from both academic sources and media perspectives, this text builds an incisive analytical argument about the changing nature of power itself. People Power and Political Change is a must read for students and scholars of democratic theory, international politics and current affairs.

The Ideology of Power and the Power of Ideology Aug 24 2019 GÜran Therborn's study is an original and decisive contribution to the contemporary debate on the central Marxist concept of ideology. Beginning with some critical reflections on Louis Althusser's writings of the late sixties, Therborn develops a theory of the formation of human subjects; considers the problem of ideological change and the ideological construction of classes; and turns finally to questions of state power and political struggle.

The Political Power of Business Aug 05 2020 Investigates to what extent business can get what it wants politically as firms and trade associations have a better understanding of the likely effects of policy than politicians and because their decisions partly determine these effects.

Language and Communication at Work Jan 28 2020 This book examines language and communication as an inherent part of on-going organizational processes. It explores language and communication as constitutive of work; analyses how they actually 'work'; and examines their role as part of strategic and institutional work in and around organizational phenomena.

Power and Architecture Jun 02 2020 Capital cities have been the seat of political power and central stage for their state's political conflicts and rituals throughout the ages. In the modern era, they provide symbols for and confer meaning to the state, thereby contributing to the "invention" of the nation. Capitals capture the imagination of natives, visitors and outsiders alike, yet also express the outcomes of power struggles within the political systems in which they operate. This volume addresses the reciprocal relationships between identity, regime formation, urban planning, and public architecture in the Western world. It examines the role of urban design and architecture in expressing (or hiding) ideological beliefs and political agenda. Case studies include "old" capitals such as Rome, Vienna, Berlin and Warsaw; "new" ones such as Washington DC, Ottawa, Canberra, Ankara, Bonn, and Brasília;

and the "European" capital Brussels. Each case reflects the authors' different disciplinary backgrounds in architecture, history, political science, and urban studies, demonstrating the value of an interdisciplinary approach to studying cities.

Asian Power and Politics Sep 17 2021 In a major new book, Lucian Pye reconceptualizes Asian political development as a product of cultural attitudes about power and authority. He contrasts the great traditions of Confucian East Asia with the Southeast Asian cultures and the South Asian traditions of Hinduism and Islam, and explores the national differences within these larger civilizations. Breaking with modern political theory, Pye believes that power differs profoundly from one culture to another. In Asia the masses of the people are group-oriented and respectful of authority, while their leaders are more concerned with dignity and upholding collective pride than with problem-solving. As culture decides the course of political development, Pye shows how Asian societies, confronted with the task of setting up modern nation-states, respond by fashioning paternalistic forms of power that satisfy their deep psychological craving for security. This new paternalism may appear essentially authoritarian to Western eyes, but Pye maintains that it is a valid response to the people's needs and will ensure community solidarity and strong group loyalties. He predicts that we are certain to see emerging from Asia's accelerating transformation some new version of modern society that may avoid many of the forms of tension common to Western civilization but may also produce a whole new set of problems. This book revitalizes Asian political studies on a plane that comprehends the large differences between Asia and the West and at the same time is sensitive to the subtle variations among the many Asian cultures. Its comparative perspective will provide indispensable insights to anyone who wishes to think more deeply about the modern Asian states.

Power, politics and influence at work Sep 29 2022 This book explores how power operates in workplace settings at local, national and transnational levels. It argues that how people are valued in and out of work is a political dynamic, which reflects and shapes how societies treat their citizens. Offering vital resources for activists and students on labour rights, employment issues and trade unions, this book argues that the influence workers can exert is changing dramatically and future challenges for change can be positive and progressive.

Power, Politics, and Organizational Change Jul 28 2022 Most managers view organization politics as a routine part of their job, and as an important contributor to career success, as well as to personal and organizational performance. This eagerly anticipated Second Edition has been updated to reflect new research and current perspectives on this integral part of organizational life. *Power, Politics, and Organizational Change* focuses on the manager acting as internal change agent. The authors emphasize the context in which managers initiate change, how this is achieved, and how actions are accounted for.

States and Power in Africa Jul 24 2019 Theories of international relations, assumed to be universally applicable, have failed to explain the creation of states in Africa. There, the interaction of power and space is dramatically different from what occurred in Europe. In *States and Power in Africa*, Jeffrey Herbst places the African state-building process in a truly comparative perspective. Herbst's bold contention—that the conditions now facing African state-builders existed long before European penetration of the continent—is sure to provoke controversy, for it runs counter to the prevailing assumption that colonialism changed everything. This revised edition includes a new preface in which the author links the enormous changes that have taken place in Africa over the past fifteen years to long-term state consolidation. The final chapter on policy prescriptions has also been revised to reflect the evolution of African and international responses to state failure.

Property, Power and Politics Oct 31 2022 Globalization is an extraordinary phenomenon affecting virtually everything in our lives. And it is imperative that we understand the operation of economic power in a globalized world if we are to address the most challenging issues our world is facing today, from climate change to world hunger and poverty. This revolutionary work rethinks globalization as a power system feeding from, and in competition with, the state system. Cutting across disciplines of law, politics and economics, it explores how multinational enterprises morphed into world political organisations with global reach and power, but without the corresponding responsibilities. In illuminating how the concentration of property rights within corporations has led to the rejection of democracy as an ineffective system of government and to the rise in inequality, Robé offers a clear pathway to a fairer and more sustainable power system.

Money, Power and Politics in Early Islamic Syria Sep 25 2019 The transformation of the eastern provinces of the Roman empire from the middle of the seventh century CE under the impact of Islam has attracted a good deal of scholarly attention in recent years, and as more archaeological material becomes available, has been subject to revision and rethinking in ways that radically affect what we know or understand about the area, about state-building and the economy and society of the early Islamic world, and about issues such as urbanisation, town-country relations, the ways in which a different religious culture impacted on the built environment, and about politics. This volume represents the fruits of a workshop held at Princeton University in May 2007 to discuss the ways in which recent work has affected our understanding of the nature of economic and exchange activity in particular, and the broader implications of these advances for the history of the region.

De-Facing Power Sep 05 2020 A sophisticated new view of power as a network of social boundaries.

Power, Politics and International Events. Oct 26 2019 Although the event management field has grown considerably over the last decade, critical, social-scientific studies of the international events industry are rare. This book intends to help fill this void. It focuses on power, social and political relations, conflicts and controversies in the context of international events, popular festivals and famous spectacles. It draws on recent primary research and offers a diverse range of new and intriguing case studies, for example the Arirang Festival in North Korea, the Gay Games, the Gymnastrada, horse-racing events, the London 2012 Olympics, regional and rural festivals, the World Baseball Classic, World Fairs/Expos and U2 concerts. The main aim of this volume is to bring the critical, social-scientific analysis of events, festivals and spectacles more into the core of the teaching of events management degree programmes. The book draws extensively upon the disciplines of politics, sociology, cultural studies and history. In the process, it addresses key themes such as: • political economy • politics of popular culture • the global and the local • regionalism and globalization • nations and nationalism • international relations and foreign policy. This groundbreaking collection of essays is unique and innovative. It will be an essential source for students, researchers and academics with a keen interest in critical, social-scientific analyses of events.

Managing With Power Nov 19 2021 Although much has been written about how to make better decisions, a decision by itself changes nothing. The big problem facing managers and their organizations today is one of implementation—how to get things done in a timely and effective way. Problems of implementation are really issues of how to influence behavior, change the course of events, overcome resistance, and get people to do things they would not otherwise do. In a word, power. *Managing With Power* provides an in-depth look at the role of power and influence in organizations. Pfeffer shows convincingly that its effective use is an essential component of strong leadership. With vivid examples, he makes a compelling case for the necessity of power in mobilizing the political support and resources to get things done in any organization. He provides an intriguing look at the personal attributes—such as flexibility, stamina, and a high tolerance for conflict—and the structural factors—such as control of resources, access to information, and formal authority—that can help managers advance organizational goals and achieve individual success.

Power, Politics and the Emotions Jul 16 2021 How can we rethink ideas of policy failure to consider its paradoxes and contradictions as a starting point for more hopeful democratic encounters? Offering a provocative and innovative theorisation of governance as relational politics, the central argument of *Power, Politics and the Emotions* is that there are sets of affective dynamics which complicate the already materially and symbolically contested terrain of policy-making. This relational politics is Shona Hunter's starting point for a more hopeful, but realistic understanding of the limits and possibilities enacted through contemporary governing processes. Through this idea Hunter prioritises the everyday lived enactments of policy as a means to understand the state as a more differentiated and changeable entity than is often allowed for in current critiques of neoliberalism. But Hunter reminds us that focusing on lived realities demands a melancholic confrontation with pain, and the risks of social and physical death and violence lived through the contemporary neoliberal state. This is a state characterised by the ascendancy of neoliberal whiteness; a state where no one is innocent and we are all responsible for the multiple intersecting exclusionary practices creating its unequal social orderings. The only way to struggle through the central paradox of governance to produce something different is to accept this troubling interdependence between resistance and reproduction and between hope and loss. Analysing the everyday processes of this relational politics through original empirical studies in health, social care and education the book develops an innovative interdisciplinary theoretical synthesis which engages with and extends work in political science, cultural theory, critical race and feminist analysis, critical psychoanalysis and post-material sociology.

Power, Policy and Profit Nov 27 2019 *Power, Policy and Profit* investigates the manifold ways in which corporate actors attempt to broadly influence political activities. With intensified globalization of markets, the restructuring of provisions of welfare services and accumulation of private capital opportunities for corporate influence in politics affairs have multiplied. Bringing together scholars from different fields in the study of global governance, the volume addresses the rising influence and power of corporate actors on the national and transnational political scene.

Power, Politics, and Society Dec 29 2019 *Power, Politics & Society: An Introduction to Political Sociology* discusses how sociologists have organized the study of politics into conceptual frameworks, and how each of these frameworks foster a sociological perspective on power and politics in society. This includes discussing how these frameworks can be applied to understanding current issues and other "real life" aspects of politics. The authors connect with students by engaging them in activities where they complete their own applications of theory, hypothesis testing, and forms of inquiry.
