Hearings Jul 19 2021

John Holt Sep 01 2022 John Holt, the American educator, was passionate about the need for alternatives to traditional institutional schooling, seeing schools as often hindering children from learning rather than helping them; he became an important proponent of homeschooling or 'unschooling', was a pioneer in youth rights theory and had a profound influence on school reform in particular and educational philosophy in general. Here, Roland Meighan challenges the often held notion that Holt's work was 'romantic' and impractical within the context of compulsory schooling. He brings together the work and thinking of John Holt into applicable theory for education students, enabling readers to appreciate the view that individuals outside the education system can influence and change what is happening within it.

But soon after the final gavel comes down, the actor's secretary vanishes and the antiques dealer is found dead, apparently having taken his own life. Molly's not sold on the coroner's verdict of suicide, though, and she can't help but start digging for clues to what she suspects is foul play. As she begins to delve into the private life of her friend and his connections with the actor's staff, Molly slowly discovers that the dealer was far more unscrupulous than she ever imagined and that nearly everyone who knew him had a motive for murder. And when another body turns up and the devious killer begins leaving mysterious clues to taunt Molly and the police, Molly finds herself facing a cunning culprit who wants to see her going, going, gone . . . Why Does the World Exist?: An Existential Detective Story

Nov 03 2022 The Washington Post Notable Non-Fiction of 2013 “I can imagine few more enjoyable ways of thinking than to read this book.”—Sarah Bakewell, New York Times Book Review, front-page review Tackling the “darkest question in all of philosophy” with “raffish erudition” (Dwight Garner, New York Times), author Jim Holt explores the greatest metaphysical mystery of all: why is there something rather than nothing? This runaway bestseller, which has captured the imagination of critics and the public alike, traces our latest efforts to grasp the origins of the universe. Holt adopts the role of cosmological detective, traveling the globe to interview a host of celebrated scientists, philosophers, and writers, “testing the contentions of one against the theories of the other” (Jeremy Bernstein, Wall Street Journal). As he interrogates his list of ontological culprits, the brilliant yet slyly humorous Holt contends that we might have been too narrow in limiting our suspects to God versus the Big Bang. This “deft and consuming” (David Ulin, Los Angeles Times) narrative humanizes the profound questions of meaning and existence it confronts.

When Einstein Walked with Gödel: Excursions to the Edge of Thought. Does time exist? What is infinity? Why do mirrors reverse left and right but not up and down? In this scintillating collection, Holt explores the human mind, the cosmos, and the thinkers who've tried to encompass the latter with the former. With his trademark clarity and humor, Holt probes the mysteries of quantum mechanics, the quest for the foundations of mathematics, and the nature of logic and truth. Along the way, he offers intimate biographical sketches of celebrated and neglected thinkers, from the physicist Emmy Noether to the computing pioneer Alan Turing and the discoverer of fractals, Benoit Mandelbrot. Holt offers a painless and playful introduction to many of our most beautiful but least understood ideas, from Einsteinian relativity to string theory, and also invites us to consider why the greatest logician of the twentieth century believed the U.S. Constitution contained a terrible contradiction—and whether the universe truly has a future.

We Answer to Another Nov 22 2021 The quest to escape authority has been a persistent feature of the modern world, animating liberals and Marxists, Westerners and non-Westerners alike. Yet what if it turns out that authority is intrinsic to humanity? What if authority is characteristic of everything we are and do as those created in God's image, even when we claim to be free of it? What if kings and commoners, teachers and students, employers and employees all possess authority? This book argues that authority cannot be identified with mere power, is not to be played off against freedom, and is not a mere social construction. Rather it is resident in an office given us by God himself at creation. This central office is in turn dispersed into a variety of offices relevant to our different life activities in a wide array of communal
