**Principles of Emergency Management and Emergency Operations Centers (EOC)** Jan 28 2020

Emergency operations centers (EOCs) are a key component of coordination efforts during incident planning as well as reaction to natural and human-made events. Managers and their staff coordinate incoming information from the field, and the public, to support pre-planned events and field operations as they occur. This book looks at the function and role of EOCs and their organizations. The highly anticipated second edition of *Principles of Emergency Management and Emergency Operations Centers (EOC)* provides an updated understanding of the coordination, operation of EOCs at local, regional, state, and federal operations. Contributions from leading experts provide contemporary knowledge and best practice learned through lived experience. The chapters collectively act as a vital training guide, at both a theoretical and practical level, providing detailed guidance on handling each phase and type of emergency. Readers will emerge with a blueprint of how to create effective training and exercise programs, and thereby develop the skills required for successful emergency management. Along with thoroughly updated and expanded chapters from the first edition, this second edition contains new chapters on: The past and future of emergency management, detailing the evolution of emergency management at the federal level, and potential future paths. Communicating with the public and media, including establishing relations with, and navigating, the media, and the benefits this can provide if successfully managed. In-crisis communications. Leadership and decision-making during disaster events. Facilitating and managing interagency collaboration, including analysis of joint communications, and effective resource management and deployment when working with multiple agencies. Developing and deploying key skills of management, communication, mental resilience. Planning for terrorism and responding to complex coordinated terrorist attacks. Developing exercises and after-action reports (AARs) for emergency management.

**Meeting the Challenges to Measurement in an Era of Accountability** Nov 18 2021

Under pressure and support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools, as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English/language arts with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests, as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. The NCME series editorial board is comprised of Michael J. Kolen, Chair; Robert L. Brennan; Wayne Camara; Edward H. Haertel; Suzanne Lane; and Rebecca Zwick.

The Charismatic Principle in Social Life Jul 02 2020 Max Weber laid the foundations for the meaning of 'charisma' in modern secular usage. This new volume argues for the importance of the 'charismatic principle' in history, economics and society. This volume brings together a number of contributors at the cross section between economics, theology, sociology and politics in order to set a research agenda for the following issues: What does it mean to have a 'charism'? How does it work in society? How

might one distinguish a 'charism' from a talent? Are 'charism's given only to "special" people, or are they also present in ordinary people? Is a 'charism' necessarily associated with religion, or, is it, as we submit, possible to imagine 'charisms' at work within a secular perspective? Which are the principle perspectives of the role of 'charisms' in social history? How have the 'charisms' of noted personalities (e.g., Benedict, Francis, Gandhi) changed economic and social history? What insights might be drawn from 'civil charisms' such as the cooperative movement, non-profit organizations, social economy, and values-based organizations? This book seeks to answer these questions through the employment of an interdisciplinary perspective, which examines the theme of the charismatic principle in social life in different fields of application.

**Atlanta Compromise** Sep 23 2019 The Atlanta Compromise was an address by African-American leader Booker T. Washington on September 18, 1895. Given to a predominantly White audience at the Cotton States and International Exposition in Atlanta, Georgia, the speech has been recognized as one of the most important and influential speeches in American history. The compromise was announced at the Atlanta Exposition Speech. The primary architect of the compromise, on behalf of the African-Americans, was Booker T. Washington, president of the Tuskegee Institute. Supporters of Washington and the Atlanta compromise were termed the "Tuskegee Machine." The agreement was never written down. Essential elements of the agreement were that blacks would not ask for the right to vote, they would not retaliate against racist behavior, they would tolerate segregation and discrimination, that they would receive free basic education, education would be limited to vocational or industrial training (for instance as teachers or nurses), liberal arts education would be prohibited (for instance, college education in the classics, humanities, art, or literature). After the turn of the 20th century, other black leaders, most notably W. E. B. Du Bois and William Monroe Trotter - (a group Du Bois would call The Talented Tenth), took issue with the compromise, instead believing that African-Americans should engage in a struggle for civil rights. W. E. B. Du Bois coined the term "Atlanta Compromise" to denote the agreement. The term "accommodationism" is also used to denote the essence of the Atlanta compromise. After Washington's death in 1915, supporters of the Atlanta compromise gradually shifted their support to civil rights activism, until the modern Civil rights movement commenced in the 1950s. Booker Taliaferro Washington (April 5, 1856 - November 14, 1915) was an African-American educator, author, orator, and advisor to presidents of the United States. Between 1890 and 1915, Washington was the dominant leader in the African-American community. Washington was of the last generation of black American leaders born into slavery and became the leading voice of the former slaves and their descendants, who were newly oppressed by disfranchisement and the Jim Crow discriminatory laws enacted in the post-Reconstruction Southern

states in the late 19th and early 20th centuries. In 1895 his Atlanta compromise called for avoiding confrontation over segregation and instead putting more reliance on long-term educational and economic advancement in the black community.

**The Jungle** Jun 01 2020 The Jungle is a 1906 novel written by the American journalist and novelist Upton Sinclair (1878–1968). Sinclair wrote the novel to portray the lives of immigrants in the United States in Chicago and similar industrialized cities. Many readers were most concerned with his exposure of health violations and unsanitary practices in the American meatpacking industry during the early 20th century, based on an investigation he did for a socialist newspaper. The book depicts working class poverty, the lack of social supports, harsh and unpleasant living and working conditions, and a hopelessness among many workers. These elements are contrasted with the deeply rooted corruption of people in power. A review by the writer Jack London called it, "the Uncle Tom's Cabin of wage slavery." Sinclair was considered a muckraker, or journalist who exposed corruption in government and business. He first published the novel in serial form in 1905 in the Socialist newspaper, Appeal to Reason, between February 25, 1905, and November 4, 1905. In 1904, Sinclair had spent seven weeks gathering information while working incognito in the meatpacking plants of the Chicago stockyards for the newspaper. It was published as a book on February 26, 1906 by Doubleday and in a subscribers' edition.

**EC Membership and the Judicialization of British Politics** Jun 13 2021 The Law Lords in 'Factortame' based their acceptance of the supremacy of European Community law on an 'entirely voluntary' surrender of sovereignty by Parliament. This interdisciplinary study tells the story, from the parliamentary perspective, of how Parliament's sovereignty came to be lost. It charts the evolution of MPs' constitutional understandings by analyzing the parliamentary debates on UK attempts to join the Community, the passage of the 1972 Act and the approval of subsequent Treaty revisions. The book's pervasive theme is the transformation from a UK constitution based on politics to one based increasingly on law. It assesses the extent to which MPs understood that EC membership entailed a shift in power from legislature to courts. This is a study with profound implications for the legitimacy of Parliament as a law-making body. The book also offers two comparisons. First the understandings of British MPs are contrasted with those of Irish parliamentarians, to establish whether Ireland's more law-based constitutional culture had an effect on politicians' understandings of EC implications. Secondly, the book analyses the history of the Bill of Rights debate culminating in the passage of the Human Rights Act 1998, to investigate whether (and why) themes of parliamentary sovereignty and judicial empowerment were clearer in this context than in the EC context.

**Three Days Till EOC** Apr 30 2020 It is the year 2100 and water, the thing that matters to all life, is wiping out life itself. The ice sheets have melted, the Earth has passed its last cataclysmic tipping point, and now there are only three days till EOC: the End of Civilization. Climate scientist Graham Allison, one of the last 1,000 humans left on the planet, is racing against the odds to save the world before the last rescue shuttle leaves for the Mars colonies. Will he manage to persuade the leaders of the past to change their behavior so that the present can be different? Or will it be precious networks of family relationships across time and space that actually save humanity? This gripping work of climate fiction is 12-year-old Abhimanyu Sukhdial's first novella. It won Stone Soup Magazine's 2019 Book Contest.

**Ages of American Capitalism** Mar 22 2022 A leading economic historian traces the evolution of American capitalism from the colonial era to the present—and argues that we've reached a turning point that will define the era ahead. "A monumental achievement, sure to become a classic."—Zachary D. Carter, author of *The Price of Peace* In this ambitious single-volume history of the United States, economic historian Jonathan Levy reveals how capitalism in America has evolved through four distinct ages and how the country's economic evolution is inseparable from the nature of American life itself. The Age of Commerce spans the colonial era through the outbreak of the Civil War, and the Age of Capital traces the lasting impact of the industrial revolution. The volatility of the Age of Capital ultimately led to the Great Depression, which sparked the Age of Control, during which the government took on a more active role in the economy, and finally, in the Age of Chaos, deregulation and the growth of the finance industry created a booming economy for some but also striking inequalities and a lack of oversight that led directly to the crash of 2008. In *Ages of American Capitalism*, Levy proves that capitalism in the United States has never been just one thing. Instead, it has morphed through the country's history—and it's likely changing again right now. "A stunning accomplishment . . . an indispensable guide to understanding American history—and what's happening in today's economy."—*Christian Science Monitor* "The best one-volume history of American capitalism."—Sven Beckert, author of *Empire of Cotton*

**The Tyranny of Merit** Feb 27 2020 A TLS, GUARDIAN AND NEW STATESMAN BOOK OF THE YEAR 2020 The new bestseller from the acclaimed author of Justice and one of the world's most popular philosophers "Astute, insightful, and empathetic...A crucial book for this moment" Tara Westover, author of Educated These are dangerous times for democracy. We live in an age of winners and losers, where the odds are stacked in favour of the already fortunate. Stalled social mobility and entrenched inequality give the lie to the promise that "you can make it if you try". And the consequence is a brew of anger and frustration that has fuelled populist protest, with the triumph of Brexit and election of Donald Trump. Michael J. Sandel argues that to overcome the polarized politics of our time, we must rethink the attitudes toward success and failure that have accompanied globalisation and rising inequality. Sandel highlights the hubris a meritocracy generates among the winners and the harsh judgement it imposes on those left behind. He offers an alternative way of thinking about success - more attentive to the role of luck in human affairs, more conducive to an ethic of humility, and more hospitable to a politics of the common good.

**Training School Principals as Talent Developers** Nov 06 2020 Training School Principals as Talent Developers: An International Perspective focuses on how to prepare school principals to lead their schools by training and supporting teachers in their craft. The main goal of schools is improving teaching and learning in order to maximize students’ potential to be college ready and career ready. Principals play significant role in improving the instructions which improves students’ learning. In order to do so, we need inspiring principals to be talent developers. The book is comprised of chapters written by faculty and researchers from various countries and offers multiple perspectives on training and developing principals to be talent developers. In the ten chapters of this edited book, we wanted to address the perspectives of “who is the role model of a principal, what are the qualities needed to make a good principal and what are the challenges that the talent developer principals encounter to achieve their goals. We also wanted to broaden the lens by addressing these perspectives in the United States and globally.
