The Order of the Stick Apr 15 2021 These volumes are print compilations of of the popular online comic The Order of the Stick! plus pages of never-before-seen bonus stories and material. Taking place in a magical world that loosely operates by the rules of 3.5 edition Dungeons and Dragons, the comic follows the sometimes farcical exploits of six adventurers as they strive to save the world from an evil lich. Much of the comic's humor stems from these characters either being aware of the game rules that affect their lives or having anachronistic knowledge of modern culture, which in turn is often used by the author to parody various aspects of role-playing games and fantasy fiction.

Sufism Sep 28 2019 This engaging and well-researched narrative provides an insider's understanding of Islam in all its aspects. It elaborates on how Sufism is the preserved spiritual path that forms the heart of Islam. Drawing from an in-depth study of Muslim texts and traditions, the author articulates that Sufism is not an innovation, but the continuity of a thought process that links Muslims to their religious predecessors all the way to Prophet Muhammad. It offers an insightful look at the complex relationship of Sufism with both Muslim and non-Muslim societies.

[Celebrating Parenting](#) Dec 24 2021 "As a young mother; I was always overwhelmed. And fearful. I had so many questions; and no answers. Of course; Dr. Benjamin Spock; Adele Faber and their ilk held my hand for a while; but could not assuage my fears. Not totally. I read the best books on parenting; written by trained child psychologists; Ph.Ds and M.Ds; but they were speaking to the western world. I needed to hear from someone who knew my world; my challenges; my insecurities and my social milieu. I missed having a book by my bedside; which I could leaf through and find answers. This is how this book came about. Hope you find some of your answers here." —Shabnam Gupta

Object Thinking Nov 30 2019 In OBJECT THINKING, esteemed object technologist David West contends that the mindset makes the programmer—not the tools and techniques. The Radiological Accident in Soreq May 17 2021 On 21 June 1990 a fatal radiological accident occurred at an industrial irradiation facility at Soreq, Israel. An operator entered the irradiation room by circumventing safety systems and was acutely exposed, with an estimated whole body dose of 10-20 Gy. The accident, like earlier accidents at similar irradiators, was the consequence of the contravention of operating procedures. An IAEA review team investigated the causes of the accident. This report presents its findings and recommendations and describes the clinical management of the patient, particularly of the haematological phase. The medical treatment included the use of emerging therapies with haematopoietic growth factor drugs which may rescue the overexposed patient, albeit in this case only temporarily. The report is intended for regulatory authorities responsible for the regulation and inspection of irradiators, operating organizations and physicians who may need to treat overexposed patients.

Why Architecture Matters Jan 13 2021 Why Architecture Matters is not a work of architectural history or a guide to the styles or an architectural dictionary, though it contains elements of all three. The purpose of Why Architecture Matters is to come to grips with how things feel to us when we stand before them, with how architecture affects us emotionally as well as intellectually—with its impact on our lives. Architecture begins to matter, writes Paul Goldberger, when it brings delight and sadness and perplexity and awe along with a roof over our heads. He shows us how that works in examples ranging from a small Cape Cod cottage to the vast, flowing Prairie houses of Frank Lloyd Wright, from the Lincoln Memorial to the highly sculptural Guggenheim Bilbao and the Church of Sant'Ivo in Rome, where simple geometries . . . create a work of architecture that embraces the deepest complexities of human imagination. Based on decades of looking at buildings and thinking about how we experience them, the distinguished critic raises our awareness of fundamental things like proportion, scale, space, texture, materials, shapes, light, and memory. Upon completing this remarkable architectural journey, readers will enjoy a wonderfully rewarding new way of seeing and experiencing every aspect of the built world.
