The Classic British Seagull Jun
26 2019 The British Seagull
outboard motor has been
manufactured and distributed
by England for over sixty years.
During that time the engine
has been known to be "The
Best Outboard Motor for the
World" and has gained a
reputation for their reliability
and durability. "The Classic
British Seagull" mainly deals
with engines that are built
between 1955 and to about
1996, but can also be used for
the earlier 102's and the later
EFRN's models. This service
manual is divided into three
sections. The first is for general
running and operation of the
motor, which includes: how to
mount the motor on your
transom, starting procedures,

running the motor in different
weather conditions, general
information and maintenance.
The next section is on how to
trouble-shoot a non-working
engine and gives some
suggestions on what to look
for. The third and final section
is on servicing and the
technical repair for different
sections or parts of the motor.
The Classic British Seagull has
a unique and different
approach in trouble-shooting
and servicing then from
previously written manuals. In
doing so, many of the hidden
trade secrets are revealed. In
addition this manual will
probably give you the reason
why something has happened
and provide proven techniques
to repair and prevent the
damage from happening again.
Besides this the manual offers
some insightful general
mechanical and boating
knowledge. This manual is a
must for all those boaters that
still have these famous motors,
as it is the best trouble
shooting and repair manual
that has ever been published
for them.
