Violent Acts and Urban Space in Contemporary Tel Aviv Jul 14 2021 Violent acts over the past fifteen years have profoundly altered civil rituals, cultural identity, and the meaning of place in Tel Aviv. Three events in particular have shed light on the global rule of urban space in the struggle for territory, resources, and power: the assassination of Prime Minister Rabin in 1995 in the city council square; the suicidal bombing at the Dolphinarium Discothèque along the shoreline in 2001; and bombings in the Neve Shaanan neighborhood in 2003. Tali Hatuka uses an interdisciplinary framework of urban theory and sociopolitical theory to shed light on the discourse regarding violent events to include an analysis of the physical space where these events take place. She exposes the complex relationships among local groups, the state, and the city, challenging the national discourse by offering a fresh interpretation of contesting forces and their effect on the urban environment. Perhaps the most valuable contribution of this book is its critical assessment of the current Israeli reality, which is affected by violent events that continually alter the everyday life of its citizens. Although these events have been widely publicized by the media, there is scant literature focusing on their impact on the urban spaces where people live and meet. In addition, Hatuka shows how sociopolitical events become crucial defining moments in contemporary lived experience, allowing us to examine universal questions about the way democracy, ideology, and memory are manifested in the city.

Secret Key Cryptography Sep 04 2020 Explore the fascinating and rich world of Secret Key cryptography! This book provides practical methods for encrypting messages, an interesting and entertaining historical perspective, and an incredible collection of ciphers and codes—including 30 unbreakable methods. In Secret Key Cryptography: Ciphers, from simple to unbreakable you will: Measure the strength of your ciphers and learn how to guarantee their security Construct and incorporate data-compression codes Generate true random numbers in bulk Construct huge primes and safe primes Add an undetectable backdoor to a cipher Defeat hypothetical ultracomputers that could be developed decades from now Construct 30 unbreakable ciphers Secret Key Cryptography gives you a toolbox of cryptographic techniques and Secret Key methods. The book 's simple, non-technical language is easy to understand and accessible for any reader, even without the advanced mathematics normally required for cryptography. You 'll learn how to create and solve ciphers, as well as how to measure their strength. As you go, you 'll explore both historic ciphers and groundbreaking new approaches—including a never-before-seen way to implement the uncrackable One-Time Pad algorithm. Whoever you are, this book is for you! History buffs will love seeing the evolution of sophisticated cryptographic methods, hobbyists will get a gentle introduction to cryptography, and engineers and computer scientists will learn the principles of constructing secure ciphers. Even professional cryptographers will find a range of new methods and concepts never published before. About the technology From the Roman empire 's Caesar cipher to the WWII Enigma machine, secret messages have influenced the course of history. Today, Secret Key cryptography is the backbone of all modern computing infrastructure. Properly designed, these algorithms are efficient and practical. Some are actually unbreakable, even using supercomputers or quantum technology! About the book Secret Key Cryptography teaches you how to create Secret Key ciphers, ranging from simple pen-and-paper methods to advanced techniques used in modern computer-based cryptography. It reveals both historic examples and current innovations. You 'll learn how to efficiently encrypt large files with fast stream ciphers, discover alternatives to AES encryption, and avoid strong-looking but weak ciphers. Simple language and fun-to-solve mini-ciphers make learning serious concepts easy and engaging. What's inside Construct 30 unbreakable ciphers Measure the strength of your ciphers and guarantee their security Add an undetectable backdoor to a cipher Defeat hypothetical ultracomputers of the future About the reader For professional engineers, computer scientists, and cryptography hobbyists. No advanced math knowledge is required. About the author Frank Rubin has been doing cryptography for over 50 years. He holds an MS in Mathematics, and a PhD in Computer Science. Good Morning Message Jan 08 2021 This daily devotional book has been a God-led inspiration from its very start-up; from its original Bible verse and note of encouragement to some coworkers and family members to people around the world via my email network. Our God is so awesome! I've had people return emails to me or speak to me and ask, "How did you know that I needed that today?" or "How did you know I was going through this?" That is when I thankfully remind them that God inspired each and every one of these devotionals. I am just being faithful and following His directions. Now I'm led to put them into a year of daily devotions book to reach others. Occasionally, my emailed devotionals have colored photographs that I take as God inspired message for the day. Unfortunately, I couldn't include those in this book. I did include a photo in grayscale at the beginning of each month; the cover photo is a God-blessed look at an Alaskan sunset. I am so thankful that God is working in my life. I want to encourage each of you to grasp hold of whatever gift He has blessed you with and step out in trust and faith to go forth and to share it with others. When you feel down, just start counting each of the blessings God has touched you with in your life; and you will feel His Presence and comfort to encourage you. We are never alone; He is just a prayer away; nothing is impossible for our God. He is not done with us yet. He is asking us to be obedient in our service to Him, and He will help us grow in our faith. Trust in Him, and you will be astounded at what He has in store for you.

100 Days of April-May Jul 22 2019 April-May is back, and this time she's brought friends! April-May is back for another year at Trinity College, and she still hasn't changed her socks. Sebastian, aka Edward, aka the boy with the lime-green eyes, is still drop-dead gorgeous and totally bad news. But then Fatty turns up. A giant of a boy who eats stew sandwiches and cries when no one's looking. And he's best friends with Sebastian. Awkward. Juggling the evil teacher Mrs Ho as her new live-in mom, along with a new brother (the devious Sam Ho), and a house with half a roof, April-May's life is as much of a mess as the crummy extension Fluffy is building out back. Before she knows it April-May is in an all-night dance-off and she's adopted a dog called Alistair. The less said about him the better. No wonder April-May's in counselling. It's a shame that she's the one giving all the guidance. 100 DAYS OF APRIL-MAY is the hilarious one-eyebrow-raised sequel to A MONTH WITH APRIL-MAY as she finds love, loses a dog and wins the World Cup.
