*General Aviation Aircraft Reliability Study* Mar 17 2021 This reliability study estimates Complex General Aviation (GA) Aircraft System reliability. As part of an effort to successfully improve the safety and reliability of the next generation of GA aircraft, a benchmarking of the current reliability of GA Aircraft Systems was performed. Specifically, Complex GA Aircraft System reliability was estimated using data obtained from the logbooks of a random sample of the Complex GA Aircraft population. The results of this analysis provide insight into the current reliability of Complex GA Aircraft Systems (i.e., Airframe, Electrical, Powerplant, Flight Control and Ground Control Sytems). In addition, an estimate of Cockpit Instrumentation reliability, performed in an earlier report, is also presented.
