Robert's Rules of Order Sep 14 2021 Robert's Rules of Order by Henry M. Robert There appears to be much needed a work on parliamentary law, based, in its general principles, upon the rules and practice of Congress, and adapted, in its details, to the use of ordinary societies. Such a work should give, not only the methods of organizing and conducting the meetings, the duties of the officers and the names of the ordinary motions, but in addition, should state in a systematic manner, in reference to each motion, its object and effect; whether it can be amended or debated; if debatable, the extent to which it opens the main question to debate; the circumstances under which it can be made, and what other motions can be made while it is pending. This Manual has been prepared with a view to supplying the above information in a condensed and systematic manner, each rule being either complete in itself, or giving references to every section that in any way qualifies it, so that a stranger to the work can refer to any special subject with safety. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. International Employee Equity Plans Nov 23 2019

World Law Group Series Volume 4 Although the economic downturns of 2001 and 2002 have threatened to dampen enthusiasm for employee equity participation in business enterprises, such plans continue to be offered by employers in nearly all major national jurisdictions. The time is ripe, in fact, to clarify and elucidate the legal complexities of extending such plans across borders to employees working in other countries. This is the first book to provide in-depth, country-by-country coverage of the national law issues that must be considered by an employer implementing (or considering the implementation of) a multinational employee equity plan. For each of thirty countries, International Employee Equity Plans presents a detailed survey of applicable law, trends, and customs affecting employee participation. Each chapter is written by practicing employment lawyers in that particular jurisdiction, ensuring that the critical issues, potential pitfalls, and likely changes are incisively dealt with. Among the matters described and analysed for each country are the following: the most advantageous (and disadvantageous) types of plans; relevant securities offering rules; all legal compliance steps; available exemptions and reliefs and the conditions upon which they are offered; the fine line between informing and advising; taxation of employee benefits and other tax rules; and the extent to which local courts will recognize foreign law in all pertinent matters. The wealth of guidance and information in this book will help many more organisations to follow the lead of those companies that have already achieved remarkable success in this important area of international business. Roles of the Organs and Officers of an Incorporated Company Aug 01 2020 Project Report from the year 2016 in the subject Business economics - Business Management,

Corporate Governance, course: LAW, language: English, abstract: This is a research work on the "roles of the organs and officers of an incorporated company". In it, the organs are identified as the General Meeting (shareholders), and the Board of Directors, while the officers are identified as the directors, secretary, auditor, legal adviser. The company's organs take the key critical resolutions cum decisions that sway the company for better or worse. And these resolutions cum decision are implemented through corporate management or governance by the officers of the company. As legal personality, the company has a separate existence from the founders. Yet it is operated by human beings. The company functions through its Memorandum and Articles of Association, which can be altered through resolution passed by the majority of the company members at the General Meeting. Similarly, the company's performance is also regulated by other statutory law, for example the Companies and Allied Matters Act, otherwise known as CAMA. Most of the company's officers are appointed by the Board of Directors. However, this is subject to confirmation at the General Meeting. Consequently, as a going concern/business, the company is prosperous when there is a healthy relationship between the organs, and officers, and particularly between the General Meeting (Shareholders), and the Board of Directors. Though the General Meeting works by the resolutions passed by the majority members, yet there are exceptions to this when the court enforces an individual member(s) action against the majority's decisions. This is an exception to the rule in Foss v Harbottle.

The aim is to check fraud and ultra vires activities in the company. To be valid, an officer's acts shall be done in good faith, diligently, and with care; and the company shall hold the officer liable for such acts. Essentially, the common law held the view that company's officers owed their services to the company only, and not individual shareholders. However, this position has been rejected by the modern company practice and knowledge. Hence, the roles of the contemporary company officers have been enlarged to embrace serving the company which employs them, the individuals shareholders under relevant circumstances, as well as the generality of the public that benefits or is affected by the activities of the company. Fundamentally, company practices in Nigeria are bedeviled by the apathy of the stakeholders in corporate governance, except when there is a selfs
