The ISIS Apocalypse Jul 29 2022 The Islamic State is one of the most lethal and successful jihadist groups in modern history, surpassing even al-Qaeda. Thousands of its followers have marched across Syria and Iraq, subjugating millions, enslaving women, beheading captives, and daring anyone to stop them. Thousands more have spread terror beyond the Middle East under the Islamic State's black flag. How did the Islamic State attract so many followers and conquer so much land? By being more ruthless, more apocalyptic, and more devoted to state-building than its competitors. The shrewd leaders of the Islamic State combined two of the most powerful yet contradictory ideas in Islam-the return of the Islamic Empire and the end of the world-

into a mission and a message that shapes its strategy and inspires its army of zealous fighters. They have defied conventional thinking about how to wage wars and win recruits. Even if the Islamic State is defeated, jihadist terrorism will never be the same. Based almost entirely on primary sources in Arabic-including ancient religious texts and secret al-Qaeda and Islamic State letters that few have seen - William McCants' *The ISIS Apocalypse* explores how religious fervor, strategic calculation, and doomsday prophecy shaped the Islamic State's past and foreshadow its dark future. *Islamic History* Apr 01 2020 Discusses Islamic history, from the formation of Islam and the life of the prophet Muhammad to the spread of the faith throughout the world and its modern revival.

practiced by approximately one-fifth of the world's population. Unlike most religions that only consist of acts of worship, rituals, and a set of beliefs, it also offers a just socio-politico-economic system, which is especially important today as we continue to make significant material and scientific progress. However, although it presents real solutions to problems faced by the whole of mankind, factors such as worldwide media propaganda and the current condition of the Muslim community have seriously distorted the public image of Islam. Adeel Zeerak hopes that his book *Islam: A Superior System of Life* will help change all that. He says that after careful study, even those with non-Muslim unprejudiced minds will appreciate the beauty of his religion's teachings. To prove the superiority of Islamic system over other systems, he provides concrete data obtained from authentic sources and refrains from using boastful or exaggerative language. Chapters in *Islam: A Superior System of Life* include:

- This is Islam
- Characteristics of the Islamic System
- Spiritual System
- Social System
- Economic System
- Political System

The Prophet, peace be upon him, the Message, and the Ummah “Despite commendable progress in the field of science and technology, this world is full of evil, exploitation, and injustice,” says Zeerak, who believes any effort to find a solution to our problems continually fails because we choose to ignore the light of Divine Guidance. We all know what happened to prophet Noah's people

when they rejected this guidance, but we, thankfully, still exist in this world to follow our Lord and accept Islam. Written for the Muslim and non-Muslim, *Islam: A Superior System of Life* is for readers interested in Islam, the prophet Muhammad (PBUH), the Islamic view of women, the concept of Khilafat, Islamic finance, Islamic spirituality, and Islamic history. The author promises that our obedience to Allah, subhanahu wa-ta'ala, will result in endless favors and blessings both in this world and the hereafter. Revolutionary Iran Jan 23 2022 In *Revolutionary Iran*, Michael Axworthy guides us through recent Iranian history from shortly before the 1979 Islamic revolution through the summer of 2009, when Iranians poured into the streets of Tehran by the hundreds of thousands, demanding free, democratic government. Axworthy explains how that

outpouring of support for an end to tyranny in Iran paused and then moved on to other areas in the region like Egypt and Libya, leaving Iran's leadership unchanged. The Iranian Revolution of 1979 was a defining moment of the modern era. Its success unleashed a wave of Islamist fervor across the Middle East and signaled a sharp decline in the appeal of Western ideologies in the Islamic world. Axworthy takes readers through the major periods in Iranian history over the last thirty years: the overthrow of the old regime and the creation of the new one; the Iran-Iraq war; the reconstruction era following the war; the reformist wave led by Mohammed Khatami; and the present day, in which reactionaries have re-established control. Throughout, he emphasizes that the Iranian revolution was centrally important in modern history because it provided the world with a clear model of development that was not rooted in Western ideologies. Whereas the world's major revolutions of the previous two centuries had been fuelled by Western, secular ideologies, the Iranian Revolution drew its inspiration from Islam. Revolutionary Iran is both richly textured and from one of the leading authorities on the region; combining an expansive scope with the most accessible and definitive account of this epoch in all its humanity.

Islamic Science and the Making of the European Renaissance Oct 20 2021 The rise and fall of the Islamic scientific tradition, and the relationship of Islamic science to

European science during the Renaissance. The Islamic scientific tradition has been described many times in accounts of Islamic civilization and general histories of science, with most authors tracing its beginnings to the appropriation of ideas from other ancient civilizations—the Greeks in particular. In this thought-provoking and original book, George Saliba argues that, contrary to the generally accepted view, the foundations of Islamic scientific thought were laid well before Greek sources were formally translated into Arabic in the ninth century. Drawing on an account by the tenth-century intellectual historian Ibn al-Nadīm that is ignored by most modern scholars, Saliba suggests that early translations from mainly Persian and Greek sources outlining elementary scientific ideas for the use of government departments were the impetus for the development of the Islamic scientific tradition. He argues further that there was an organic relationship between the Islamic scientific thought that developed in the later centuries and the science that came into being in Europe during the Renaissance. Saliba outlines the conventional accounts of Islamic science, then discusses their shortcomings and proposes an alternate narrative. Using astronomy as a template for tracing the progress of science in Islamic civilization, Saliba demonstrates the originality of Islamic scientific thought. He details the innovations (including new mathematical tools) made by the Islamic astronomers from the thirteenth to sixteenth

centuries, and offers evidence that Copernicus could have known of and drawn on their work. Rather than viewing the rise and fall of Islamic science from the often-narrated perspectives of politics and religion, Saliba focuses on the scientific production itself and the complex social, economic, and intellectual conditions that made it possible.

The Islamic Law of Nations Aug 30 2022 From its origins Islam has been an expansionist religion, understanding itself as a matter of faith to be in a permanent state of war with the non-Muslim world. After the initial consolidation of the Islamic caliphate, however, it soon became apparent that constant military hostilities could not be sustained and that other forms of relationship with non-Muslim nations would be necessary. To reconcile the imperatives of faith with the limits of military power, Islamic scholars developed elaborate legal doctrines. In the second century of the Muslim era (eighth century C.E.), hundreds of years before the codification of international law in Europe by Grotius and others, Muhammad ibn al-Hasan al-Shaybani, an eminent jurist of the Hanafite school in present-day Iraq, wrote the first major Islamic treatise on the law of nations, *Kitab al-Siyar al-Kabir*. Translated with an

extensive commentary by Majid Khadduri, Shaybani's *Siyar* describes in detail conditions for war (jihad) and for peace, principles for the conduct of military action and of diplomacy, and rules for the treatment of non-Muslims in Muslim lands. A foundational text of the leading school of law in Sunni Islam, it provides essential insights into relations between Islamic nations and the larger world from their earliest days up to the present.

Europe and the Islamic World Oct 08 2020 A sweeping history of Islam and the West from the seventh century to today *Europe and the Islamic World* sheds much-needed light on the shared roots of Islamic and Western cultures and on the richness of their inextricably intertwined histories, refuting once and for all the misguided notion of a "clash of civilizations" between the Muslim world and Europe. In this landmark book, three eminent historians bring to life the complex and tumultuous relations between Genoans and Tunisians, Alexandrians and the people of Constantinople, Catalans and Maghrebis—the myriad groups and individuals whose stories reflect the common cultural, intellectual, and religious heritage of Europe and Islam. Since the seventh century, when the armies of Constantinople and Medina fought for control of

Syria and Palestine, there has been ongoing contact between the Muslim world and the West. This sweeping history vividly recounts the wars and the crusades, the alliances and diplomacy, commerce and the slave trade, technology transfers, and the intellectual and artistic exchanges. Here readers are given an unparalleled introduction to key periods and events, including the Muslim conquests, the collapse of the Byzantine Empire, the commercial revolution of the medieval Mediterranean, the intellectual and cultural achievements of Muslim Spain, the crusades and Spanish reconquest, the rise of the Ottomans and their conquest of a third of Europe, European colonization and decolonization, and the challenges and promise of this entwined legacy today. As provocative as it is groundbreaking, this book describes this shared history in all its richness and diversity, revealing how ongoing encounters between Europe and Islam have profoundly shaped both.

This analogy highlights the importance and value of his argument that was proposed during the First World War in British India. That how he

The Islamic Context of The Thousand and One Nights Sep 18 2021 In this fascinating study, Muhsin J. al-Musawi shows how deeply Islamic heritage and culture is embedded in the tales of The Thousand and One Nights (known to many as the Arabian Nights) and how this integration invites readers to make an Islamic milieu.

Conservative Islam dismisses *The Thousand and One Nights* as facile popular literature, and liberal views disregard the rich Islamic context of the text. Approaching the text with a fresh and unbiased eye, al-Musawi reads the tales against Islamic schools of thought and theology and recovers persuasive historical evidence to reveal the cultural and religious struggle over Islam that drives the book's narrative tension and binds its seemingly fragmented stories. Written by a number of authors over a stretch of centuries, *The Thousand and One Nights* depicts a burgeoning, urban Islamic culture in all its variety and complexity. As al-Musawi demonstrates, the tales document their own places and periods of production, reflecting the Islamic individual's growing exposure to a number of entertainments and temptations and their conflict with the obligations of faith. Aimed at a diverse audience, these stories follow a narrative arc that begins with corruption and ends with redemption, conforming to a paradigm that concurs with the sociological and religious concerns of Islam and the Islamic state. By emphasizing Islam in his analysis of these entertaining and instructional tales, al-Musawi not only illuminates the work's consistent equation between art and life, but he also sheds light on its underlying narrative power. His study offers a brilliant portrait of medieval Islam as well, especially its social, political, and economic institutions and its unique practices of storytelling.

The Islamic Enlightenment Nov 08 2020 SHORTLISTED FOR THE BAILLIE GIFFORD PRIZE 2017 'An eye-opening, well-written and very timely book' Yuval Noah Harari 'The best sort of book for our disordered days: timely, urgent and illuminating' Pankaj Mishra 'It strikes a blow...for common humanity' Sunday Times The Muslim world has often been accused of a failure to modernise and adapt. Yet in this sweeping narrative and provocative retelling of modern history, Christopher de Bellaigue charts the forgotten story of the Islamic Enlightenment – the social movements, reforms and revolutions that transfigured the Middle East from the early nineteenth century to the present day. Modern ideals and practices were embraced across the region, including the adoption of modern medicine, the emergence of women from purdah and the development of democracy. The Islamic Enlightenment

looks behind the sensationalist headlines in order to foster a genuine understanding of Islam and its relationship to the West. It is essential reading for anyone engaged in the state of the world today.

A Short History of Islamic Thought Apr 13 2021 A scholarly yet accessible history of Islamic thought - from its foundation in the seventh century to the present day - in 250 pages from a brilliant historian of the Islamic world. Day after day we read of the caliphate and the Qur'an, of Sunni and Shi'a, Salafis and Sufis, integration and isolation, radicals and refugees. Almost a quarter of the world's population is Muslim. It is clear that understanding the modern world requires knowing something about Islam. But while much is said and written about Islam and the global trends and historic events connected to it, little attention is given to placing these phenomena within their greater historical, religious and intellectual context. Tracing thirteen centuries of Islamic history - from the foundation of Islam in the seventh century and the life of Muhammad, through the Crusades in the Middle East and the growth of great empires, to the often fraught 21st century - *A Short History of Islamic Thought* considers questions of interpretation and legacy, of God and his relationship with his followers, of the lives of Muslims and how they relate to others. Through these questions, Fitzroy Morrissey presents not a monolithic creed, but a nuanced faith made up of four

intellectual tendencies that share so much - and differ greatly. A Short History of Islamic Thought is a concise and engaging volume that will appeal to non-Muslim readers looking to better understand the world's second largest religion, as well as Muslims seeking a background to the historical dimensions of their faith and those interested in the intellectual history of the last millennium and a half.

What Is Islam? Jan 29 2020 A bold new conceptualization of Islam that reflects its contradictions and rich diversity What is Islam? How do we grasp a human and historical phenomenon characterized by such variety and contradiction? What is

"Islamic" about Islamic philosophy or Islamic art? Should we speak of Islam or of islams? Should we distinguish the Islamic (the religious) from the Islamicate (the cultural)? Or should we abandon "Islamic" altogether as an analytical term? In *What Is Islam?*, Shahab Ahmed presents a bold new conceptualization of Islam that challenges dominant understandings grounded in the categories of "religion" and "culture" or those that privilege law and scripture. He argues that these modes of thinking obstruct us from understanding Islam, distorting it, diminishing it, and rendering it incoherent. *What Is Islam?* formulates a new conceptual language for analyzing Islam. It presents a new paradigm of how Muslims have historically understood divine revelation—one that enables us to understand how and why Muslims through history have embraced values such as exploration, ambiguity, aestheticization, polyvalence, and relativism, as well as practices such as figural art, music, and even wine drinking as Islamic. It also puts forward a new understanding of the historical constitution of Islamic law and its relationship to philosophical ethics and political theory. A book that is certain to provoke debate and significantly alter our understanding of Islam, *What Is Islam?* reveals how Muslims have historically conceived of and lived with Islam as norms and truths that are at once contradictory yet coherent.

Muslims History and Civilization Vol 1 Jun 15 2021 The Muslims, History and

Civilization provides modern perspective of the religion, culture and history of the Islamic world, at a time when that world is undergoing considerable change and is a focus of international study and debate. Most perceptions of Islam have often tended to be dominated by selective focus on few parts of Islamic history by biased media interpretations of events. Many people are unaware of the depth and variety of Islamic history and civilization, and had no opportunity to have a look at the bigger picture with all parts of the puzzle before their eyes. At the same time, many who have had a formal training in Islamic studies have tended to concentrate on the traditional, to the exclusion of modern overview. The Muslims, History and Civilization covers the full range of Islamic history and thought, in historical depth, but it also provides substantial coverage of contemporary trends across the Muslim world. It doesn't speak only from the mouth of select few. It presents views of all great thinkers, historians, scholars and writers irrespective of their religious affiliations. With well over a thousand entries on Islamic theology, history, arts, scientific achievements, Muslim leaders, law and institutions, crusades, Caliphate, and coverage of Islam in various places around the world, and short historical backgrounds of all Muslim countries, the Muslims, History and Civilization provides an extremely rich resource for students and researchers in religious studies and Middle Eastern studies. This book underlines and deepens the

Muslim identity amidst fast changing concepts and ideologies. This book is a wide-ranging and general introduction to Islamic civilization from its origins to the present day. Writing in clear and non-technical language, Ehsanul Karim seek answers to broad and important questions. Biblical Figures in the Islamic Faith Sep 26 2019 Vicchio believes that by understanding how much Muslim tradition overlaps with the biblical traditions of Judaism and Christianity, we might begin to expose a wedge of common ground on which understanding and respect might begin to be built. Vicchio begins with a brief introduction sketching some fundamentals of Muslim history and culture, and clearing away some common misconceptions. His main goal, however, is to give us a detailed look at the treatment of biblical figures in the literature of Islam. The broad range of his research and presentation is startling. He begins with the Qur'an but continues on to the collected writing of the roughly two hundred years after Mohammed (Hadith, Sunnah, Akhbar) that came to be regarded as authoritative in the various traditions that developed in early Islam. He then traces the interest in these biblical figures on into

modern treatments of the role of these figures in Muslim scholarship and how these figures are understood and used in the traditions of Islam yet today. The result of Vicchio's scholarship and presentation will be a revelation to most Christian and Jewish readers. It has become somewhat commonplace to refer to Judaism, Christianity, and Islam as the three Abrahamic faiths. This shows a beginning awareness of the beginnings of each of these three great religions, birthed in the Middle East, in a common ancestor, Abraham (Ibrahim). Abraham's faithfulness and his closeness to God make his a revered figure in each of these three great faiths, and for each Abraham is a beginning of the story of the particular relationship between God and the people of each of these religions. --from the Foreword

The Fall and Rise of the Islamic State Mar 25 2022 "Noah Feldman tells the story behind the increasingly popular call for the establishment of the sharia--the law of the traditional Islamic state--in the modern Muslim world. Feldman goes back to the roots of classical Islamic law, under which executive power was balanced by the scholars who interpreted and administered the sharia. That balance was destroyed under Ottoman rule, resulting in the unchecked executive dominance that continues to distort politics in so many Muslim states. Feldman argues that a modern Islamic state could provide political and legal justice to today's Muslims through sharia--but only if new institutions emerge that restore this constitutional balance of power. In a new introduction, Feldman discusses developments in Egypt, Tunisia, Libya, and other Muslim-majority countries since the Arab Spring and describes how Islamists must meet the challenge of balance if the new Islamic states are to succeed."--P. The Islamic State in Africa Aug 18 2021 In 2019, Islamic State lost its last remaining sliver of territory in Syria, and its Caliph, Abu Bakr al-Baghdadi, was killed. These setbacks seemed to herald the Caliphate's death knell, and many now forecast its imminent demise. Yet its affiliates endure, particularly in Africa: nearly all of Islamic

State's cells on the continent have reaffirmed their allegiance, attacks have continued in its name, many groups have been reinvigorated, and a new province has emerged. Why, in Africa, did the two major setbacks of 2019 have so little impact on support for Islamic State? The Islamic State in Africa suggests that this puzzle can be explained by the emergence and evolution of Islamic State's provinces in Africa, which it calls 'sovereign subordinates'. By examining the rise and development of eight Islamic State 'cells', the authors show how, having pledged allegiance to IS Central, cells evolved mostly autonomously, using the IS brand as a means for accrual of power, but, in practice, receiving relatively little if any direction or material support from central command. Given this pattern, IS Central's relative decline has had little impact on its African affiliates—who are likely to remain committed to the Caliphate's cause for the foreseeable future.

Rediscovering the Islamic Classics Oct 27 2019 The people who selected, edited, and published the new print books on and about Islam exerted a huge influence on the resulting literary tradition. These unheralded editors determined, essentially, what came to be understood by the early twentieth century as the classical written "canon" of Islamic thought. Collectively, this relatively small group of editors who brought Islamic literature into print crucially shaped how Muslim intellectuals, the Muslim

public, and various Islamist movements understood the Islamic intellectual tradition. In this book Ahmed El Shamsy recounts this sea change, focusing on the Islamic literary culture of Cairo, a hot spot of the infant publishing industry, from the late nineteenth and twentieth centuries. As El Shamsy argues, the aforementioned editors included some of the greatest minds in the Muslim world and shared an ambitious intellectual agenda of revival, reform, and identity formation. .
