**Ergonomics for Improved Productivity** Jul 18 2021 This highly informative and carefully presented book focuses on the fields of ergonomics/human factors and discusses the future of the community vis-a-vis health problems, productivity, aging, etc. Ergonomic intercession must be seen in light of its effect on productivity because ergonomic solutions will improve productivity as the reduction of environmental stressors, awkward postures and efforts lead to a reduction in task execution time. The book provides promising evidence that the field of ergonomics continues to thrive and develop deeper insights into how work environments, products and systems can be developed to meet needs, demands and limitations of humans and how they can support productivity improvements. Some of the themes covered are anthropometry and workplace design, biomechanics and modelling in ergonomics, cognitive and environmental ergonomics, ergonomic intervention and productivity, ergonomics in transport, mining, agriculture and forestry, health systems, work physiology and sports ergonomics, etc. This book is beneficial to academicians, policymakers and the industry alike.

**The FIDIC Forms of Contract** Jan 12 2021 In September 1999, FIDIC introduced its new Suite of Contracts, which included a "new" Red, Yellow, Silver and Green forms of contract. The "new" Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them. Important features of this book include: · background and concepts of the various forms of contract; · a detailed comparison of the wording of the 1999 three main forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose; · analysis of the rights and obligations of the parties involved in the contract and the allocation of risks concerned; · a range of 'decision tree' charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards; · a much enlarged discussion of the meaning of "claim" and "dispute" and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submittal of claims by a contractor and by an employer; · the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and · five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards.

**Trust Protectors: A Practice Manual with Forms** Jun 28 2022 The trust protector is generally regarded as a relatively new position in trust law, and the key feature of the position is that the protector may be granted powers over the trust, which are generally superior to those of the trustee. This places the protector in a position where, by the exercise of his powers, he can cause the trust to adjust to unforeseen changes or new conditions without the need for court action or beneficiary approval. This work takes the firm position that, with only limited exception, the role of the protector is a fiduciary one, imposing on the protector a duty to act in the best interests of the purposes of the trust and the beneficiaries. Unfortunately, a substantial segment of the legal community, as well as the legislative bodies of a number of international jurisdictions, have taken a position that the protector is not a fiduciary, or that he may be declared in the trust not to be a fiduciary, and that the power granted him under the trust may be declared to be personal powers, whether or not such is the case, and thus he would have no liability for his actions or inactions while serving as protector. This "attraction" of providing total exculpation of the protector has effectively engendered a quick acceptance of the position by the bulk of the legal community and even by the legislatures of a number of jurisdictions, though almost totally unsupported by relevant case law. As a result, we have been seeing trusts which incorporate the use of a protector having the power to make critical dispositive and administrative decisions, as well as extensive modifications to the trusts without being exposed to liability for negligence or bad decisions which result in damages. This work will examine in detail the role of the protector of the trust, the relationship between the protector and the trustee, between the protector and the beneficiaries, and the protector's responsibilities to the purposes of the trust. It will demonstrate with legal support that the role of the protector is not a new role, that, in fact, the protector is simply a new name for the decades-old position of trust "advisor," and that the trust advisor is consistently regarded as a fiduciary in relevant treatises and has been repeatedly held to be a fiduciary in relevant cases. The discussion will also review and analyze the historical issues and professional commentary relevant to trust law and the role of protector, as well as case decisions in various international jurisdictions which have shed light on the issues and some of the positions taken in the statutes of a number of jurisdictions in the United States and across the world. All legal aspects of the role will be examined, including the rights of the protector, the protector's relationship to the trustee, and the courts' regard for and treatment of the position. Further, the work will discuss in detail all of the practical considerations in using a protector, such as selection and special drafting considerations, the use of a protector in a foundation, and, in brief, the numerous tax issues that may apply. The conclusion will be that with only very limited exception, which will be explained, the protector is

unquestionably a fiduciary, and just as a trustee, he should be held to fiduciary standards. Accordingly, while it is certainly possible to grant personal powers to an individual under a trust, those powers per se conflict with the duties of a protector. And while it is also possible to reduce the fiduciary liability of a protector to a minimum, it is not possible to eliminate it entirely, regardless of trust language attempting to do so.

Recent Developments in Family Law Practice May 04 2020

*Personal Data (Privacy) Law in Hong Kong A Practical Guide on Compliance (Second Edition)* Nov 09 2020 The idea of a right to privacy, which arose in reaction to the rapid rise of newspapers, instant photography and the "paparazzi" of the 19th century, has evolved into a constitutional right in much of the developed world. It is enshrined in Hong Kong through Articles 28, 29, 30 and 39 of the Basic Law. Hong Kong stands proud as the first jurisdiction in Asia to enact legislation to safeguard personal data in the form of the Personal Data (Privacy) Ordinance, Cap 486 ("the Ordinance") which came into force in 1996. At its centre are the six Data Protection Principles based on the 1980 OECD Guidelines. The office of the Privacy Commissioner for Personal Data was created under this legislation to provide oversight and ensure compliance. The Octopus scandal in mid-2010 eventually led to substantial changes being made to the Ordinance that were enacted in 2012 and 2013, the main amendments being the Direct Marketing provisions and the provision of legal assistance and representation to aggrieved persons. In this digital age, the Ordinance is proving to be the main safeguard of our privacy rights. The Data Protection Principles seek to create broad common principles based on fairness that apply to the public and private sectors. The passage of twenty years since the enactment of the Ordinance has given rise to a substantial body of case law and administrative decisions on these principles and the other provisions of the Ordinance. The new amendments have already been the subject of judicial scrutiny. This publication, which replaces its predecessor, has the dual aim of becoming a practitioner's guide on the important subject of personal data privacy, containing, as it does, a detailed exposition of the principles and provisions in the Ordinance and a comprehensive source of reference materials, and of enabling the Privacy Commissioner to discharge his major duty to promote awareness and understanding of the Ordinance. The second edition includes not only a full discussion of these principles, but also summaries of all the seminal cases and Administrative Appeals Board rulings in this area, as well as a comprehensive list of all the pertinent cases.

**Designing Forms for SharePoint and InfoPath** Mar 14 2021 Together, InfoPath 2010 and Microsoft SharePoint Designer 2010 make it possible to create end-to-end solutions that combine powerful forms, enterprise-scale workflow, and access to key business data. Now, building on the valuable content from their previous InfoPath book, three Microsoft experts offer a complete introduction to building the forms that drive these solutions. Designing Forms for SharePoint and InfoPath combines deep knowledge of InfoPath, new insights into SharePoint development, and an insider's view of new InfoPath features for building more powerful SharePoint applications. Ideal for information workers, power users, and experienced form designers and developers, this book teaches new techniques through downloadable examples, including form templates, code, and XML. You'll start with a complete hands-on primer for designing rich forms with InfoPath Designer, covering Forms Services, data retrieval and submission, controls,

customization, saving, publishing, and workflow. Next, you'll turn to advanced form design, including coding, the InfoPath object model, and InfoPath hosting options. Coverage includes Mastering best practices for designing forms and working with data Creating and editing SharePoint list forms in InfoPath 2010 Setting up Forms Services in SharePoint 2010 Using new InfoPath controls and customization techniques Adding logic without code via Quick Rules and the Rules Management pane Using the InfoPath Form Web Part to create powerful solutions with minimal code, including data mashups Submitting, saving, and publishing, including Quick Publish Building reusable components, custom controls, and add-ins Securing and efficiently deploying solutions Making the most of reporting and workflows Writing better InfoPath code more quickly with Visual Studio Tools for Office Using import/export and the new import wizard Customizing forms for creating, viewing, and editing SharePoint lists Building dynamic queries to REST Web services
