**Ultimate Boat Maintenance Projects** Jan 19 2022 Boat owners, perhaps more so than other motoring enthusiasts, want to spend their time playing, not maintaining, their toys. Unfortunately, due to their higher exposure to damaging elements, their longer periods of non-use, and the remote locations to which they transport their users, it could be argued that boats also require more care than cars or motorcycles. This guide breaks down by system the routine maintenance procedures every boat owner should know, presenting in more digestible chunks the upkeep of any modern boat, whether it's 16 or 60 feet, inboard or outboard, open-hulled or cabin-equipped. Much of the information included is even applicable to sailboats, as well as runabouts and cabin cruisers.

**Making Sense of the Subprime Crisis** Sep 22 2019 This is a print on demand edition of a hard to find publication. Explores the question of whether market participants could have or should have anticipated the large increase in foreclosures that occurred in 2007 and 2008. Most of these foreclosures stemmed from loans originated in 2005 and 2006, leading many to suspect that lenders originated a large volume of extremely risky loans during this period. While loans originated in this period did carry extra risk factors, underwriting standards alone cannot explain the dramatic rise in foreclosures. Market participants should have understood that a significant fall in prices would cause a large increase in foreclosures. Analysts understood that a fall in prices would have disastrous consequences for the market but assigned a low probability to such an outcome. Charts and tables.

**Refining Used Lubricating Oils** Feb 08 2021 Used lubricating oil is a valuable resource. However, it must be re-refined mainly due to the accumulation of physical and chemical contaminants in the oil during service. *Refining Used Lubricating Oils* describes the properties of used lubricating oils and presents ways these materials can be re-refined and converted into useful lubricants as well as other products. It provides an up-to-date review of most of the processes for used lubricating oil refining that have been proposed or implemented in different parts of the world, and addresses feasibility and criteria for selecting a particular process. The book begins with an overview of lubricating oil manufacturing, both petroleum-based and synthetic-based. It reviews the types and properties of lubricating oils and discusses the characteristics and potential of used lubricating oils. The authors describe the basic steps of used oil treatment including dehydration, distillation or solvent extraction, and finishing. They explore the combustion of used oil for use as fuel, covering chemistry and equipment, fuel oil properties, and combustion emissions. The book considers alternative processing options such as refinery processing and re-refining. It also reviews the major refining processes that have been suggested over the years for used oil. These include acid/clay, simple distillation, combinations of distillation and hydrogenation, solvent extraction, filtration, and coking processes. The book addresses economic, life cycle assessment, and other criteria for evaluating the attractiveness of an oil recycling project, examining various costs and presenting an economic evaluation method using an Excel spreadsheet that can be downloaded from the publisher's website. The book concludes with a chapter offering insights on how to choose the most suitable process technology.

*Ken Saro-Wiwa* Sep 15 2021 Hanged by the Nigerian government on November 10, 1995, Ken Saro-Wiwa became a martyr for the Ogoni people and human rights activists, and a symbol of modern Africans' struggle against military dictatorship, corporate power, and environmental exploitation. Though he is rightly known for his human rights and environmental activism, he wore many hats: writer, television producer, businessman, and civil servant, among others. While the book sheds light on his many legacies, it is above all about Saro-Wiwa the man, not just Saro-Wiwa the symbol. Roy Doron and Toyin Falola portray a man who not only was formed by the complex forces of ethnicity, race, class, and politics in Nigeria, but who drove change in those same processes. Like others in the Ohio Short Histories of Africa series, *Ken Saro-Wiwa* is written to be accessible to the casual reader and student, yet indispensable to scholars.
