[Haifa Before & After 1948](#) Aug 03 2020 Institute for Historical Justice and Reconciliation Series, 6 (History of International Relations Library, 27) Haifa Before & After 1948, Narratives of a Mixed City is a voyage that 14 scholars and experts undertake through the cultural, political and social history of Haifa before and after the 1948 War. This volume, co-authored by Palestinians and Israelis - Arabs and Jews, mostly Israeli citizens, covers Haifa's architecture and its social and cultural life during the Mandate period, the Arab-Israeli competition in the oil and soap industries, the history of Arab-Jewish inter-communal relations and cohabitation, commemoration in the German Colony of Haifa, the story of two houses that represent the narrative of Palestinians in Haifa and remembrances displayed through personal accounts of the cold winter in 1950. In this remarkable project, Jews and Palestinians, write together the history and memory of the city of Haifa. Rather than presenting incommensurable national narratives, they offer a fresh and inspiring alternative: each article is co-authored by Arabs and Jews, thus turning the art of research and writing into a bi-national practice. Addressing 1948 as a benchmark, is crucial particularly today in facilitating not only a new reading of the political story, but also offering political possibilities. Haifa Before & After 1948 is an inspirational book that deserves to be read by everyone who is interested in the history and memory of bi-national societies. Yehouda Shenhav, Professor of Sociology, Tel Aviv University Table of Contents Contributors Preface - Catherine Ciss -van den Muijsenbergh 1. Towards Mutual Historical Writing: An Introduction to the "Haifa Project" - Mahmoud Yazbak and Yfaat Weiss 2. A Tale of Two Houses - Mahmoud Yazbak and Yfaat Weiss 3. Arab-Jewish Architectural Partnership in Haifa during the Mandate Period: Qaraman and Gerstel Meet on the "Seam Line" - Waleed Karkabi and Adi Roitenberg 4. Arabs and Jews, Leisure and Gender, in Haifa's Public Spaces - Manar Hasan and Ami Ayalon 5. Commodities and Power: Edible Oil and Soap in the History of Arab-Jewish Haifa - Mustafa Abbasi and David De Vries 6. Historicizing Climate: Haifawis and Haifo'im Remembering the Winter of 1950 -Dan Rabinowitz and Johnny Mansour 7. "Eraser" and "Anti-Eraser" - Commemoration and Marginalization on the Main Street of the German Colony: The Haifa City Museum and Caf Fattush - Salman Natour and Avner Giladi 8. Haifa Umm al-Gharib: Historical Notes and Memory of Inter-Communal Relations - Regev Nathansohn and Abbas Shiblak Bibliography Index About the Editors Mahmoud Yazbak is a Professor of Palestinian History, Head of the Department of Middle Eastern History at the University of Haifa. He served as the Chair of Adalah (2008-2011), and headed MEISAI (Middle Eastern and Islamic Studies Association in Israel, 2008-2011). He publishes frequently on social history and issues concerning the modern Palestinian society. Yfaat Weiss is a Professor at the department of History of the Jewish people and is the head of School of History at the Hebrew University of Jerusalem. The scope of her publication covers German and Central European History, and Jewish and Israeli History.

[Submarine Cables and the Oceans](#) Nov 18 2021 There are many things and services in our everyday life that we take for granted, and telecommunications is one of them. We surf the internet, send emails to friends and colleagues abroad, talk to family members in foreign countries over the phone, book airline seats and make banking transactions without actually realizing and appreciating the sophisticated technology that enables us to do so. This report covers the history and nature of cables, their special status in international law, their interaction with the environment and other ocean users and, finally, the challenges of the future. It is an evidence-based synopsis that aims to improve the quality and availability of information to enhance understanding and cooperation between all stakeholders. UNEP-WCMC in collaboration with the International Cable Protection Committee and UNEP has prepared this new report to provide an objective, factual description of the sub-marine cable industry and the interaction of submarine telecommunications (which route 95% of all international communications traffic) with the marine environment. This important report seeks to focus and guide deliberations and decision making on the wise conservation and protection of the oceans in concert with their sustainable management and use.

[Revolutionary Ideas](#) Jul 22 2019 "Historians of the French Revolution used to take for granted what was also obvious to its contemporary observers--that the Revolution was caused by the radical ideas of the Enlightenment. Yet in recent decades scholars have argued that the Revolution was brought about by social forces, politics, economics, or culture--almost anything but abstract notions like liberty or equality. In *Revolutionary Ideas*, one of the world's leading historians of the Enlightenment restores the Revolution's intellectual history to its rightful central role. Drawing widely on primary sources, Jonathan Israel shows how the Revolution was set in motion by radical eighteenth-century doctrines, how these ideas divided revolutionary leaders into vehemently opposed ideological blocs, and how these clashes drove the turning points of the Revolution. *Revolutionary Ideas* demonstrates that the Revolution was really three different revolutions vying for supremacy--a conflict between constitutional monarchists such as Lafayette who advocated moderate Enlightenment ideas; democratic republicans allied to Tom Paine who fought for Radical Enlightenment ideas; and authoritarian populists, such as Robespierre, who violently rejected key Enlightenment ideas and should ultimately be seen as Counter-Enlightenment figures. The book tells how

the fierce rivalry between these groups shaped the course of the Revolution, from the Declaration of Rights, through liberal monarchism and democratic republicanism, to the Terror and the Post-Thermidor reaction. In this compelling account, the French Revolution stands once again as a culmination of the emancipatory and democratic ideals of the Enlightenment. That it ended in the Terror represented a betrayal of those ideas--not their fulfillment."--Provided by publisher.

Memorials of Old Lincolnshire Apr 30 2020 In this book, Annie Matheson discusses the life and legacy of the great Florence Nightingale considered as the first nurse theorist. It discusses the principles held by this incredible woman and her impact on the world of nursing and education. Read to understand and follow the path of great leaders like Florence Nightingale.

Command Of The Air Feb 21 2022 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Commercial Shipping Handbook Mar 30 2020 The Commercial Shipping Handbook is an invaluable reference tool for anyone involved in international trade and a first step towards understanding the framework within which the international movement of goods by sea is conducted. The handbook gives concise explanations of the many activities that comprise shipping, explaining the terms and how they interrelate. Areas covered include: Documents used in international transport by sea e.g. the bill of lading and the charter-party - what they contain, the different types and examples of each Generic types of ships, cargoes, containers and ports Details of all the major maritime associations prominent in contract drafting and policy making, together with a brief explanation of their objectives The many extra costs and surcharges found in shipping, particularly in liner shipping Chartering terms, an explanation of each and their context Clauses appearing in bills of lading, in voyage charters and time charters Technical elements of shipping as they relate to the commercial operation of ships, for example tides and draughts Examples of principal documents Discussing over 1250 commercial shipping terms, this book will be an essential reference for all shipowners, charterers, managers and brokers and will also be of use to legal, insurance and banking professionals.

The Perception of the Environment Nov 06 2020 In this work Tim Ingold offers a persuasive new approach to understanding how human beings perceive their surroundings. He argues that what we are used to calling cultural variation consists, in the first place, of variations in skill. Neither innate nor acquired, skills are grown, incorporated into the human organism through practice and training in an environment. They are thus as much biological as cultural. To account for the generation of skills we have therefore to understand the dynamics of development. And this in turn calls for an ecological approach that situates practitioners in the context of an active engagement with the constituents of their surroundings. The

twenty-three essays comprising this book focus in turn on the procurement of livelihood, on what it means to 'dwell', and on the nature of skill, weaving together approaches from social anthropology, ecological psychology, developmental biology and phenomenology in a way that has never been attempted before. The book is set to revolutionise the way we think about what is 'biological' and 'cultural' in humans, about evolution and history, and indeed about what it means for human beings - at once organisms and persons - to inhabit an environment. *The Perception of the Environment* will be essential reading not only for anthropologists but also for biologists, psychologists, archaeologists, geographers and philosophers. This edition includes a new Preface by the author.

The Sailor's Word-book Oct 17 2021

RAF Wings Over Florida Oct 25 2019 They fondly remember the times when they buzzed over the homes of their Florida "families" to let them know to expect them for Sunday dinner. More than fifty years later, their stories still resonate with universal emotions: fear of failure, love of country, camaraderie, romantic love, and the pain of tragic deaths. Their stories also remind the American reader of a unique time in our history, when, poised on the brink of war, the United States reached out to help a country in distress."--BOOK JACKET.

Oceania, 800-1800CE Sep 28 2022 Over a span of 1000 years beginning around 800CE, the people of the Pacific Islands undertook a remarkable period of voyaging, political evolution, and cross-cultural interactions. Polynesian navigators encountered previously uninhabited lands, as well as already inhabited islands and the coast of the Americas. Island societies saw epic sagas of political competition and intrigue, documented through oral traditions and the monuments and artefacts recovered through archaeology. European entry into the region added a new episode of interaction with strange people from over the horizon. These histories provide an important cross-cultural perspective for the concept of 'the Middle Ages' from outside of the usual Old World focus.

The Odes of Horace. Translated Into English Verse by Mortimer Harris. [Second Edition.] Apr 23 2022 Psychological Operations Jan 28 2020 From a military commander's perspective, the role of psychological operations (PSYOP) in the successful planning and execution of modern military operations is absolutely essential. It is an integral part of the United States Special Operations Command mission. Today, the military faces a dynamic and unpredictable world. PSYOP will remain a valuable instrument in the overall defense posture and will be a key asset in the fulfillment of U.S. national policy. This manuscript explores the breadth and depth of fundamental PSYOP roles, principles and methods. Each article is an independent effort and together they represent a cross section of what the best and brightest feel is key to both offensive and defensive psychological operations. Air University Press.

Cognition in the Wild Feb 09 2021 Edwin Hutchins combines his background as an anthropologist and an open ocean racing sailor and navigator in this account of how anthropological methods can be combined with cognitive theory to produce a new reading of cognitive science. His theoretical insights are grounded in an extended analysis of ship navigation—its computational basis, its historical roots, its social organization, and the details of its implementation in actual practice aboard large ships. The result is an unusual interdisciplinary approach to cognition in culturally constituted activities outside the laboratory—"in the wild." Hutchins examines a set of phenomena that have fallen in the cracks between the established disciplines of psychology and anthropology, bringing to light a new set of relationships between culture and cognition. The standard view is that culture affects the cognition of individuals. Hutchins argues instead that cultural activity systems have cognitive properties of their own that are different from the cognitive properties of the individuals who participate in them. Each action for bringing a large naval vessel into port, for example, is informed by culture: the navigation team can be seen as a cognitive and computational system. Introducing Navy life and work on the bridge, Hutchins makes a clear distinction between the cognitive properties of an individual and the cognitive properties of a system. In striking

contrast to the usual laboratory tasks of research in cognitive science, he applies the principal metaphor of cognitive science—cognition as computation (adopting David Marr's paradigm)—to the navigation task. After comparing modern Western navigation with the method practiced in Micronesia, Hutchins explores the computational and cognitive properties of systems that are larger than an individual. He then turns to an analysis of learning or change in the organization of cognitive systems at several scales. Hutchins's conclusion illustrates the costs of ignoring the cultural nature of cognition, pointing to the ways in which contemporary cognitive science can be transformed by new meanings and interpretations. A Bradford Book

Mussolini's Navy Jul 26 2022 This book is a complete guide to the Regia Marina, the navy with which Italy fought the Second World War. Starting with the historical background, it describes how the navy developed, how it was organised, the facilities that supported it, and the operations it conducted both before and after the armistice in 1943. It also details all its ships, with full technical particulars, plans and photos. Furthermore, there are chapters on special topics like camouflage; uniforms, decorations and insignia; and a 'who's who' of important naval personalities; and the reference value of the book is enhanced by a comprehensive bibliography and guide to sources. The illustration is a noteworthy feature of the book as the author's collection of naval photographs is one of the best in Italy. He is also a fine draughtsman, and his ship plans and colour illustrations are both detailed and accurate, adding a particular appeal for modelmakers. Of all the main combatant navies of this era, the Italian is probably the most poorly represented in English publications, so this comprehensive handbook will be especially welcomed by the naval history community.

The Complete Guide to Flipping Properties Oct 05 2020 Now in a newly updated second edition, this guide covers all the ins and outs of buying, renovating, and reselling distressed properties at big profits. Berges

shows investors how to excel at every aspect of flipping, from finding great deals to analyzing property values, negotiating sales, and closing deals.

When Scotland Was Jewish Jan 20 2022 The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

Apollo's Warriors Jun 20 2019 Presenting a fascinating insider's view of U.S.A.F. special operations, this volume brings to life the critical contributions these forces have made to the exercise of air & space power. Focusing in particular on the period between the Korean War & the Indochina wars of 1950-1979, the accounts of numerous missions are profusely illustrated with photos & maps. Includes a discussion of AF operations in Europe during WWII, as well as profiles of Air Commandos who performed above & beyond the call of duty. Reflects on the need for financial & political support for restoration of the forces.

Bibliography. Extensive photos & maps. Charts & tables.
