**Blue Skies, Green Hell** Oct 31 2019 Blue Skies, Green Hell, a thriller written by a bush pilot's wife, is a riveting tale set in the 1950s when pioneers of the sky flew single-engine aircraft over unforgiving wilderness and impenetrable jungle in Venezuela. Marilyn and Frank live in a place called the last frontier on the Orinoco River where he establishes a multi-aircraft service that flies food, supplies and medicine to remote and inaccessible communities. Together they challenge the odds and take the exhilaration of flying to new heights. Their world is fierce weather with no weather reports, aircraft with limited range radios, and planes with six basic instruments. A search and rescue effort ends when they make a forced landing in no-man's-land. A flight to Miami turns sour as their twin-engine C-46 conks out over the Caribbean. Best friends die in fiery crashes. A stone age Indian appears

where he shouldn't be. This is drama from the cockpit of vintage aircraft. **Danger Calling** Apr 05 2020 Available in both an adult and a youth edition, Danger Calling features 16 true stories that take readers on a high-adrenaline ride--from the depths of the sea to the top of Mount Everest and everywhere in between--and pose provocative questions that move men and teen boys forward in their lives and faith. Danger Calling challenges readers to discover if they are truly living out God's game plan for their lives: Would you stop to help a climber in the "death zone" on Everest? What is your source of strength in a crisis? Could you lead others into battle knowing some are likely to die? To what challenge is God summoning you right now? Each story thrills and engages. Each set of questions challenges readers to discover who they are, where they stand in their faith, and whether God is calling them to a life of greater risks and deeper meaning. The youth edition contains a combination of eight stories of youth adventures, as well as eight from the adult version. Both books are perfect for small group use and include study questions with each chapter.

*Where No Man Has Gone Before* Jun 07 2020 When the crew of Apollo 11 splashed down in the Pacific Ocean on July 24, 1969, Americans hailed the successful completion of the most complex technological undertaking of the 20th century: landing humans on the moon and returning them safely to earth. This document records the engineering and scientific accomplishments of the people who made lunar exploration possible. It shows how scientists and engineers worked out their differences and conducted a program that was a major contribution to science as well as a stunning engineering accomplishment.

**A Frenchman in Search of Franklin** Oct 24 2021 In April 1852 Emile Frederic de Bray sailed down the Thames on board Resolute. The ship was bound for the icy waters north of Canada as part of Sir Edward Belcher's Arctic Squadron searching for Sir John Franklin and his men, missing since the summer of 1845. De Bray's diaries of his years with Resolute have not been published before, in any language, and only one other account of this particular Franklin search expedition exists. Enseigne-de-vaisseau de Bray, seconded at his own request from the French navy, was something of a rarity among those who made up the search parties: he was not British. (One of his shipmates hoped for the best: 'The Frenchman does not seem an Englishman,' he observed, 'but I

suppose he will improve on acquaintance.') As a result de Bray notices and comments on details and incidents his fellow officers would have considered unremarkable. Cape de Bray on the northwest coast of Melville Island commemorates the efforts of this intrepid French officer, who gained the respect of his fellows, was made a Chevalier of the Legion d'honneur by Napoleon III, and was awarded the Arctic Medal by Queen Victoria.

**The Aircraft Carrier Intrepid** Aug 10 2020 The Essex-class aircraft carriers are famous for their effectiveness and reliability as warships and the mammoth construction programs they initiated. Built in 1941, the Intrepid (CV11) was one of the class of twenty-four vessels constructed during and immediately after World War II. Carrying ninety aircraft each, they formed the main air strength and striking power of the U.S. Pacific Fleet against the Japanese from 1943 to 1945. Written by well-known warship historian John Roberts, this classic reference on this classic ship features the extensive diagrams and photographs that this series has become Justify famous for it also offers an authoritative description of the concepts, design, modifications, and operational history of the Intrepid and a new large-scale fold-out plan.

Apollo 12 - On the Ocean of Storms Jul 21 2021 In July 1969 the 'amiable strangers' that made up the crew of the historic Apollo 11 flight successfully achieved the first manned lunar landing. Several months later, three close friends set off on an even more challenging mission. Free of the burden of making history, the Apollo 12 astronauts were determined to really enjoy their experience while taking care of business. This is the story of their mission, told largely in their own words. Their exploits and accomplishments showed how conservative the inaugural mission had been. With its two moonwalks, deployment of the first geophysical station on the Moon, and geological sampling, Apollo 12 did what many had hoped would be achieved by the first men to land on the Moon. The Apollo 12 mission also spectacularly demonstrated the precision landing capability required for success in future lunar surface explorations. In addition to official documents, published prior to and after the mission, APOLLO 12 - ON THE OCEAN OF STORMS draws on the flight transcript and post-mission debriefing to recreate the drama. *Popular Mechanics* Jul 01 2022 Popular Mechanics inspires, instructs and influences readers to help them master the modern world. **Check Six!** Mar 29 2022 "Makes you proud to be an American . . . a wonderful, fast-paced read, and I highly recommend it for any World War II aviation enthusiast" (Military Review). There were no mission limits for a pilot in the Pacific during World War II; unlike in Europe, you flew until it was time to go home. So it was for James "Jug" Curran, all the way from New Guinea to the Philippines with the 348th Fighter Group, the first P-47 Thunderbolt outfit in the Pacific. After the attack on Pearl Harbor, Curran volunteered to try flying in the blue yonder and trained as an Army fighter pilot. He got his wish to fly the P-47 in the Pacific, going into combat in August 1943, in New Guinea, and later helping start the "Black Rams" fighter squadron. The heavy US Thunderbolts were at first curious to encounter the nimble, battle-hardened Japanese in aerial combat, but soon, the American pilots gained skill of their own and their planes proved superior. Bombers on both sides could fall to fighters, but the fighters themselves were eyeball to eyeball, best man win. Check Six! is an aviation chronicle that brings the reader into flight, then into the fight, throughout the Pacific War and back. This work, from someone who was there, captures the combat experience of our aviators in the Pacific, aided by pertinent excerpts from the official histories of units that "Jug" Curran flew with. "Jim Curran is not afraid to share his moments of fear and emotions during the air battles with his readers which gives the book an extra dimension." —AviationBookReviews.com
