**Photography Birds** Oct 07 2020 Photography: Birds explains how to photograph birds--whether in your backyard or at a birding destination--detailing unique issues that confront photographers of all levels and providing the best guidance for capturing the beauty and splendor of our feathered friends. Gerrit Vyn, an award-winning bird photographer, videographer, and sound recorder, has become renowned for his ability to capture birds, especially for the prestigious Cornell Lab of Ornithology. In this new guide, he reveals his methods and shares how to photograph birds based on location, behavior, identification, and storytelling. Vyn details the range of technical considerations, giving clear instruction and advice, as well as the creative decisions a photographer must make on lighting, framing, timing, and motion. He also discusses situations unique to bird photographers: dealing with habituated or tame birds, approaching feeders, utilizing blinds, and more. Once captured, digital images can be digitally refined, so Vyn delves into the procedures that elevate an image from mundane to striking, using Adobe Lightroom. Throughout, Vyn emphasizes an ethical approach to observing and interacting with the birds around us.

**Outdoor Flash Photography** May 14 2021 Maximizing the power of your camera's flash is difficult enough in a studio set-up, but outdoors literally presents a whole new world of challenges. John Gerlach and Barbara Eddy have taken the most asked about subject from their renowned photography workshops and turned it into this guidebook that is sure to inspire your next outdoor shoot, while also saving you time and frustration. Outdoor Flash Photography covers a range of practices from portrait to landscape, including unique strategies that the authors have pioneered through 40 years in the field. Mastering the use of multiple flashes to freeze action is shown through one of most challenging subjects in nature, hummingbirds in flight. This book will benefit photographers of all experience levels who are eager to evolve their outdoor photography and get the most out of their equipment.

*Sketching Light* Jul 24 2019 Following up on the great success of *The Moment It Clicks* and *The Hot Shoe Diaries: Big Light from Small Flashes*, legendary magazine photographer Joe McNally takes us on another memorable ride with *Sketching Light*, another trip into the land of light--but this time running the gamut from small flash to big flash, and everywhere in between. Of course, Joe includes coverage of Nikon Speedlights, but he also covers big flash, as well as "in-between" lights as the Elinchrom Quadra. The exploration of new technology, as well as the explanation of older technology. No matter what equipment Joe uses and discusses, the most important element of Joe's instruction is that it is straightforward, complete, and honest. No secrets are held back, and the principles he talks about apply generally to the shaping and quality of light, not just to an individual model or brand of flash. He tells readers what works and what doesn't via his let's-see-what-happens approach, he shows how he sets up his shots with plentiful sketches and behind-the-scenes production shots, and he does it all with the intelligence, clarity, and wisdom that can only come from shooting in the field for 30 years for the likes of National Geographic, Time, Life, and Sports Illustrated--not to mention the wit and humor of a clearly warped (if gifted) mind.

**Canon Lenses** Dec 29 2019 Lenses are a considerable investment for any photographer and require understanding their features and a making plan for purchase. You might buy several camera bodies, but quality lenses should last a lifetime! You need a book that goes beyond the camera manuals to teach you how to select and use Canon lenses to take great shots. This guide by pro photographer Jerod Foster will help you conquer the fundamentals and capture stunning pictures. Foster starts with the basics of using different lenses in the Canon lineup--from kit, to wide angle, to telephoto, to zoom, and more, to understand what they do and how their features affect your images. He discusses factors such as depth of field, perspective, and compression and which types of lenses are right for your style of shooting. Whether it's portraits, landscapes, or street photography, you will have a better understanding of your equipment and understand your choices for investing in lenses. Beautifully illustrated with large, compelling photos, this book teaches you how to take control of your photography to get the image you want every time you pick up the camera.
