**Mobile Working Machines** Feb 17 2022 Mobile Working Machines are defined by three characteristics. These machines have a certain task of doing a working process, they are mobile, and they have a significant energy share in their working functions. The machines should be as productive, efficient and of high quality as possible. All these machines in the field of agriculture, forestry, construction, logistics, municipal sector, and in other special applications work in different applications. But, many technologies placed in the machines are the same, similar or comparable; therefore, different branches can learn from each other.
