The Cambridge Foucault Lexicon Jan 10 2021 *The Cambridge Foucault Lexicon* is a reference tool that provides clear and incisive definitions and descriptions of all of Foucault's major terms and influences, including history, knowledge, language, philosophy and power. It also includes entries on philosophers about whom Foucault wrote and who influenced Foucault's thinking, such as Deleuze, Heidegger, Nietzsche and Canguilhem. The entries are written by scholars of Foucault from a variety of disciplines such as philosophy, gender studies, political science and history. Together, they shed light on concepts key to Foucault and to ongoing discussions of his work today.

[Setting Up Community Health and Development Programmes in Low and Middle Income Settings](#) Nov 19 2021 A majority of people living in rural areas and urban slums worldwide have minimal access to healthcare. Without information about what to give a child with stomach flu, how to relieve the pain of a broken bone, and how to work against increased substance abuse in a village, the whole community suffers. Children, adolescents, adults, and older people are all affected by the lack of what many of us view as basic healthcare, such as vaccination, pain killers, and contraceptives. To improve living conditions and life expectancy, the people in urban slums and rural areas need access to a trained health care worker, and a functioning clinic. *Setting up Community Health and Development Programmes in Low and Middle Income Settings* illustrates how to start, develop, and maintain a health care programme in poor areas across the world. The focus is on the community, and how people can work together to improve health through sanitation, storage of food, fresh water, and more. Currently, there is a lack of 17 million trained health care workers worldwide. Bridging the gap between medical professionals and people in low income areas, the aim of this book is for a member of the community to receive training and become the health care worker in their village. They will then in turn spread information and set up groups working to improve health. The book also explains in detail how communities can work alongside experts to ensure that practices and processes work effectively to bring the greatest impact. Copiously illustrated and written in easy-to-read English, this practical guide is designed to be extremely user friendly. Ideal for academics, students, programme managers, and health care practitioners in low and middle income settings worldwide, it is an evidence based source full of examples from the field. *Setting up Community Health and Development Programmes in Low and Middle Income Settings* shows how a community can both identify and solve its own problems, and in that way own its future. [Foucault for Architects](#) Sep 25 2019 From the mid-1960s onwards Michel Foucault has had a significant impact on diverse aspects of culture, knowledge and arts including architecture and its critical discourse. The implications for architecture have been wide-ranging. His archaeological and genealogical approaches to knowledge have transformed architectural history and theory, while his attitude to arts and aesthetics led to a renewed focus on the avant-garde. Prepared by an architect, this book offers an excellent entry point into the remarkable work of Michel Foucault, and provides a focused introduction suitable for architects, urban designers, and students of architecture. Foucault's crucial juxtaposition of space, knowledge and power has unlocked novel spatial possibilities for thinking about design in architecture and urbanism. While the philosopher's ultimate attention on the issues of body and sexuality has defined our understanding of the possibilities and limits of human condition and its relation to architecture. The book concentrates on a number of historical and theoretical issues often addressed by Foucault that have been grouped under the themes of archaeology, enclosure, bodies, spatiality and aesthetics in order to examine and demonstrate their relevancy for architectural knowledge, its history and its practice.

The Archaeology of Knowledge Jul 28 2022 *Madness, sexuality, power, knowledge—are these facts of life or simply parts of speech? In a series of works of astonishing brilliance, historian Michel Foucault excavated the hidden assumptions that govern the way we live and the way we think. The Archaeology of Knowledge begins at the level of "things aid" and moves quickly to illuminate the connections between knowledge, language, and action in a style at once profound and personal. A*

summing up of Foucault's own methodological assumptions, this book is also a first step toward a genealogy of the way we live now. Challenging, at times infuriating, it is an absolutely indispensable guide to one of the most innovative thinkers of our time.

Mimbres Lives and Landscapes Feb 29 2020 The well-illustrated essays in this book offer the latest archaeological research on the ancient Mimbres to explain what we know and what questions still remain about men's and women's lives, their sustenance, the changing nature of leadership, and the possible meanings of the dramatic pottery designs.

Homeless Heritage Nov 27 2019 *Homeless Heritage* describes the process of using archaeological methodologies to collaboratively document how contemporary homeless people use and experience the city. Drawing on fieldwork undertaken in Bristol and York, the book first describes the way in which archaeological methods and theory have come to be usefully applied to the contemporary world, before exploring the historical development of the concept of homelessness. Working with homeless people, the author undertook surveys and two excavations of contemporary homeless sites, and the team co-curated two public heritage exhibitions - with surprising results. Complementing a growing body of literature that details how collaborative and participatory heritage projects can give voice to marginalised groups, *Homeless Heritage* details what it means to be homeless in twenty-

The Archaeology of Knowledge ; And, The Discourse on Language Apr 24 2022 In France, a country that awards its intellectuals the status other countries give their rock stars, Michel Foucault was part of a glittering generation of thinkers, one which also included Sartre, de Beauvoir and Deleuze. One of the great intellectual heroes of the twentieth century, Foucault was a man whose passion and reason were at the service of nearly every progressive cause of his time. From law and order, to mental health, to power and knowledge, he spearheaded public awareness of the dynamics that hold us all in thrall to a few powerful ideologies and interests. Arguably his finest work, *Archaeology of Knowledge* is a challenging but fantastically rewarding introduction to his ideas.

Mayo Clinic Neurology Board Review Nov 07 2020 "The cerebrospinal vasculature originates at the aortic arch. The right brachiocephalic artery divides into the right common carotid artery and the right subclavian artery. The left common carotid and left subclavian arteries arise directly from the aortic arch. The 2 common carotid arteries bifurcate into the internal and external carotid arteries. The anterior circulation of the brain includes the distal branches from the internal carotid artery, including the anterior cerebral artery and the middle cerebral artery. The vertebral arteries arise from the subclavians and join at the pontomedullary junction, forming the basilar artery. The vertebrobasilar system and distal branches are commonly known as the posterior circulation of the brain"--

Olga Tufnell's 'Perfect Journey' Jun 22 2019 Olga Tufnell (1905-85) was a British archaeologist working in Egypt, Cyprus and Palestine in the 1920s and 1930s, a period often described as a golden age of archaeological discovery. For the first time, this book presents Olga's account of her experiences in her own words. Based largely on letters home, the text is accompanied by dozens of photographs that shed light on personal experiences of travel and dig life at this extraordinary time. Introductory material by John D.M. Green and Ros Henry provides the social, historical, biographical and archaeological context for the overall narrative. The letters offer new insights into the social and professional networks and history of archaeological research, particularly for Palestine under the British Mandate. They provide insights into the role of foreign archaeologists, relationships with local workers and inhabitants, and the colonial framework within which they operated during turbulent times. This book will be an important resource for those studying the history of archaeology in the Eastern Mediterranean, particularly for the sites of Qau el-Kebir, Tell Fara, Tell el-'Ajjul and Tell ed-Duweir (ancient Lachish). Moreover, Olga's lively style makes this a fascinating personal account of archaeology and travel in the interwar era.

Health Protection Jan 28 2020 *Health Protection: Principles and practice* is a practical guide for practitioners working at all levels in public health and health protection, including those with a non-specialist background. It is the first textbook in health protection to address all three domains within the field (communicable disease control; emergency preparedness, resilience and response (EPRR); and environmental public health) in a comprehensive and integrated manner. Written by leading practitioners in the field, the book is rooted in a practice-led, all-hazards approach, which allows for easy real-world application of the topics discussed. The chapters are arranged in six sections, which begin with an in-depth introduction to the principles of health protection and go on to illuminate the three key elements of the field by providing: case studies and scenarios to describe common and important issues in the practice of health protection; health protection tools, which span epidemiology and statistics, infection control, immunisation, disease surveillance, and audit and service improvement; and evidence about new and emerging health protection issues. It includes more than 100 health protection checklists (SIMCARDs), covering infections from anthrax to yellow fever, non-infectious diseases emergencies and environmental hazards. Written from first-hand experience of managing communicable diseases these provide practical, stand-alone quick reference guides for in-practice use. Both the topical content of *Health Protection: Principles and practice*, and the clearly described health protection principles the book provides, makes it a highly relevant resource for wider public health and health protection professionals in this continually evolving field.

The Order of Things Mar 24 2022 When one defines "order" as a sorting of priorities, it becomes beautifully clear as to what Foucault is doing here. With virtuoso showmanship, he weaves an intensely complex history of thought. He dips into literature, art, economics and even biology in *The Order of Things*, possibly one of the most significant, yet most overlooked, works of the twentieth century. Eclipsed by his later work on power and discourse, nonetheless it was *The Order of Things* that established Foucault's reputation as an intellectual giant. Pirouetting around the outer edge of language, Foucault unsettles the surface of literary writing. In describing the limitations of our usual taxonomies, he opens the door onto a whole new system of thought, one ripe with what he calls "exotic charm". Intellectual pyrotechnics from the master of critical thinking, this book is crucial reading for those who wish to gain insight into that odd beast called Postmodernism, and a must for any fan of Foucault.

The Archaeology of Australia's Deserts Feb 08 2021 This is the first book-length study of the archaeology of Australia's deserts, one of the world's major habitats and the largest block of drylands in the southern hemisphere. Over the last few decades, a wealth of new environmental and archaeological data about this fascinating region has become available. Drawing on a wide range of sources, *The Archaeology of Australia's Deserts* explores the late Pleistocene settlement of Australia's deserts, the formation of distinctive desert societies, and the origins and development of the hunter-gatherer societies documented in the classic nineteenth-century ethnographies of Spencer and Gillen. Written by one of Australia's leading desert archaeologists, the book interweaves a lively history of research with archaeological data in a masterly survey of the field and a profoundly interdisciplinary study that forces archaeology into conversations with history and anthropology, economy and ecology, and geography and Earth sciences.

Mayo Clinic Critical Care Case Review Jul 16 2021 *Mayo Clinic Critical Care Case Review* is a unique compellation of cases presented at the highly rated Mayo Clinic Clinical Pathological Case (CPC) Conference. Designed to cover rare cases in a short amount of time, these reviews are set up in what is called the "unknown" format: highlighting the clinically key elements of the patient's hospital course, singling out the diagnostic dilemmas, and concludes with a question and answer format that allows clinicians to take home relative points for clinical practice. Written by practicing intensivists and critical care fellows for practicing intensivists and critical care fellows, this book combines interesting reading experiences with critical care medicine review. Each chapter ends with questions and answers that provide a board style review for the readers. Each case begins on the left-hand page with the discussion on the right, written succinctly to provide quick diagnostic understanding. While most critical care review books focus solely on an organ-system format, *Mayo Clinic Critical Care Case Review* captures the spirit of the CPC Conference in its text and illustrations.

Shifting Sands Dec 09 2020 Biblical archaeology flourished in the 1970s as an attempt to ground the historical witness of the Bible in demonstrable historical reality. Today this research paradigm has been largely abandoned. Thomas Davis charts the rise and fall of a methodology.

Foucault's Critical Project Sep 17 2021 This book uncovers and explores the constant tension between the historical and the transcendental that lies at the heart of Michel Foucault's work. In the process, it also assesses the philosophical foundations of his thought by examining his theoretical borrowings from Kant, Nietzsche, and Heidegger, who each provided him with tools to critically rethink the status of the transcendental. Given Foucault's constant focus on the (Kantian) question of the possibility for knowledge, the author argues that his philosophical itinerary can be understood as a series of attempts to historicize the transcendental. In so doing, he seeks to uncover a specific level that would identify these conditions without falling either into an excess of idealism (a de-historicized, subject-centered perspective exemplified for Foucault by Husserlian phenomenology) or of materialism (which would amount to interpreting these conditions as ideological and thus as the effect of economic determination by the infrastructure). The author concludes that, although this problem does unify Foucault's work and gives it its specifically philosophical dimension, none of the concepts successively provided (such as the *épistémè*, the historical a priori, the regimes of truth, the games of truth, and problematizations) manages to name these conditions without falling into the pitfalls that Foucault originally denounced as characteristic of the "anthropological sleep"--various forms of confusion between the historical and the transcendental. Although Foucault's work provides us with a highly illuminating analysis of the major problems of post-Kantian philosophies, ultimately it remains aporetic in that it also fails to overcome them.

Mayo Clinic Strategies to Reduce Burnout Sep 05 2020 "In this book, we tell the story of burnout of health care professionals. Many believe burnout to be the result of individual weakness when, in fact, burnout is primarily the result of health care systems that take emotionally healthy, altruistic people and methodically squeeze the vitality and passion out of them. Burned-out professionals are exhausted, jaded, demoralized, and isolated, and they have lost their sense of meaning and purpose. Frequently, these individuals are shamed and blamed by leaders who suggest they should sleep longer, meditate, and become more resilient even as they expect them to work harder, see more patients, embrace rapidly changing technology, stay abreast of new medical advances, and provide quality health care"--Provided by publisher.

Introduction to Islamic Archaeology Mar 31 2020 Traces archaeology's contribution to Islamic culture from its earliest manifestations to the present This introduction to the archaeology of the Islamic world traces the history of the discipline from its earliest manifestations through to the present and evaluates the contribution made by archaeology to the understanding of key aspects of Islamic culture. The author argues that it is essential for the results of archaeological research to be more fully integrated into the wider historical study of the Islamic world. His organisation of the book into broad themes allows a focus on issues that are relevant across different regions and periods, and the broad geographical scope reflects the main focus of archaeological work in the Islamic world to the present day. Key Features Includes short case studies to allow the reader to examine the ways in which archaeologists collect and interpret material in specific contexts Considers archaeological work conducted in the area stretching from Afghanistan and the Central Asian republics in the east to Spain in the west Draws comparisons with Islamic regions of sub-Saharan Africa and the Indian subcontinent Includes a Glossary of archaeological terminology and Arabic, Persian and Turkish terms

I, Pierre Rivière, Having Slaughtered My Mother, My Sister, and My Brother-- Aug 17 2021 To free his father and himself from his mother's tyranny, Pierre Rivière decided to kill her. On June 3, 1835, he went inside his small Normandy house with a pruning hook and cut to death his mother, his eighteen-year-old sister, and his seven-year-old brother. Then, in jail, he wrote a memoir to justify the whole gruesome tale. Michel Foucault, author of *Madness and Civilization* and *Discipline and Punish*, collected the relevant documents of the case, including medical and legal testimony, police records, and Rivière's memoir. The Rivière case, he points out, occurred at a time when many professions were contending for status and power. Medical authority was challenging law, branches of government were vying. Foucault's reconstruction of the case is a brilliant exploration of the roots of our contemporary views of madness, justice, and crime.
