[Buyer's Guide to Sourcing Castings From India](#) Jun 26 2019 India offers global industries the opportunity to buy quality products at extremely competitive prices. It has become a much favoured source for castings, and buyers from around the world have shown tremendous interest in Indian foundries. However, sourcing from India is a challenging task, especially in the matter of selecting the right partner who will meet the specific requirements of the buyer. This survey, carried out by KPL

International Limited, India, is a guide for overseas buyers and presents all the information required to find suitable partners in India. India offers global industries the opportunity to buy quality products at extremely competitive prices. It has become a much favoured source for castings, and buyers from around the world have shown tremendous interest in Indian foundries. However, sourcing from India is a challenging task, especially in the matter of selecting the right partner who will meet the specific requirements of the buyer. This survey, carried out by KPL International Limited, India, is a guide for overseas buyers and presents all the information required to find suitable partners in India. The Buyer's Guide to Sourcing Castings from India provides an independent survey of the casting industry in India and profiles 184 individual foundries that have export potential. It begins by comparing the Indian scenario to the global scene, devoting particular attention to technologies that already exist in India, from pattern making to moulding, metal preparation, and inspection and testing practices. The guide gives complete consolidated details for various foundries along with contact details (address, phone number, and contact person, names of Chairman/Director, e-mail address and website). It also examines the organizational details of foundries such as type of organization, year of incorporation, range of products, quality certification (ISO/QS, etc.), manpower in various departments, industry sectors catered for, facilities and infrastructure. The guide analyses the key performance indicators of foundries including annual turnover, export figures, products exported and countries exported to. Information is also given on installed and spare capacities of the foundries as well as the weight range of castings handled. Commercial aspects prevailing in the industry are also examined, such as pattern development time, sample submission time and payment terms. There is also important information on the Indian economy including the business climate, economic policies, regulatory environment and taxation as well as on the strengths of the Indian castings industry. Particular attention is given to industry-related logistical issues. This guide will be an essential resource for specialist buyers, importers and consulting companies looking to locate prospective partners for outsourcing their casting requirements from India.

Illustrated Buyer's Guide to Used Airplanes Feb 24 2022 The best way for private pilots with limited means to obtain the plane of their dreams is to purchase a used one -- and there's no better way to buy one without getting burned than this heavily illustrated guide. Focusing on airplanes priced at \$100,000 or less, the author walks readers through the entire process of purchasing a used plane: prospecting the market, determining a plane's true value, closing the deal, partnership, and much more. Audience includes the more than 700,000 private pilots in the U.S. New chapters on Sport Pilot Licenses and Light-Sport Aircraft All models and prices updated New airworthiness directives (ADs) and all new regulations
