Civic War and the Corruption of the Citizen Dec 01 2019 In this unique book, Peter Alexander Meyers leads us through the social processes by which shock incites terror, terror invites war, war invokes emergency, and emergency supports unchecked power. He then reveals how the domestic political culture created by the Cold War has driven these developments forward since 9/11, contending that our failure to acknowledge that this Cold War continues today is precisely what makes it so dangerous. With eloquence and urgency Meyers argues that the mantra of our time—"everything changed on 9/11!"—is false and pernicious. By contrast, *Civic War and the Corruption of the Citizen* provides a novel account of long-term transformations in the citizen's experience of war, the constitution of political powers, and public uses of communication, and from that firm historical basis explains how a convergence of these social facts became the pretext for unprecedented opportunism and irresponsibility after 9/11. Where others have observed that our rights are under attack, Meyers digs deeper and finds that today "government by the people" itself is at risk. Sparkling with historical and philosophical insight, this is a dramatic diagnosis of the

American political scene that at once makes clear the new position of the citizen and the necessity for active citizenship if democracy is to endure.

Handbook of Research on the Role of Libraries, Archives, and Museums in Achieving Civic Engagement and Social Justice in Smart Cities Jul 28 2019 In achieving civic engagement and social justice in smart cities, literacy programs are offered in the society by three essential information service providers: libraries, archives, and museums. Although the library and museum services are documented in literature, there is little evidence of community-led library or museum services that make a full circle in understanding community-library, community-archive, and community-museum relationships. The Handbook of Research on the Role of Libraries, Archives, and Museums in Achieving Civic Engagement and Social Justice in Smart Cities examines the application of tools and techniques in library and museum literacy in achieving civic engagement and social

justice. It also introduces a new outlook in the services of libraries and museums. Covering topics such as countering fake news, human rights literacies, and outreach activities, this book is essential for community-based organizations, librarians, museum administrations, education leaders, information professionals, smart city design planners, digital tool developers, policymakers engaged in diversity, researchers, and academicians.

Flunking Democracy Apr 04 2020 The 2016 presidential election campaign and its aftermath have underscored worrisome trends in the present state of our democracy: the extreme polarization of the electorate, the dismissal of people with opposing views, and the widespread acceptance and circulation of one-sided and factually erroneous information. Only a small proportion of those who are eligible actually vote, and a declining number of citizens actively participate in local community activities. In *Flunking Democracy*, Michael A. Rebell makes the case that this is not a recent problem, but rather that for generations now, America's schools have systematically failed to prepare students to be capable citizens. Rebell analyzes the causes of this failure, provides a detailed analysis of what we know about how to prepare students for productive citizenship, and considers examples of best practices. Rebell further argues that this civic decline is also a legal failure—a gross violation of both federal and state constitutions that can only be addressed by the courts. *Flunking Democracy* concludes with specific recommendations for how the courts can and should address this deficiency, and is essential reading for anyone interested in education, the law, and democratic society.

Civic Imagination Feb 01 2020 The Civic Imagination provides a rich empirical description of civic life and a broader discussion of the future of democracy in contemporary America. Over the course of a year, five researchers observed and participated in 7 civic organisations in a mid-sized US city. They draw on this ethnographic evidence to map the 'civic imaginations' that motivate citizenship engagement in America today. The book unpacks how contemporary Americans think about and act toward positive social and political change while the authors' findings challenge contemporary assertions of American apathy. This will be an important book for students and academics interested in political science and sociology.

Honda Engine Swaps Jan 14 2021 When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

Civic Performance Sep 09 2020 *Civic Performance: Pageantry and Entertainments in Early Modern London* brings together a group of essays from across multiple fields of study that examine the socio-cultural, political, economic, and aesthetic dimensions of pageantry in sixteenth and seventeenth-century London. This collection engages with modern interest in the spectacle and historical performances of pageantry and entertainments, including royal entries, progresses, coronation ceremonies, Lord Mayor's Shows, and processions. Through a discussion of the extant texts, visual records, archival material, and emerging projects in the digital humanities, the chapters elucidate the forms in which the period itself recorded its public rituals, pageantry, and ephemeral entertainments. The diversity of approaches contained in these chapters reflects the collaborative nature of pageantry and civic entertainments, as well as the broad socio-cultural resonances of this form of drama, and in doing so offers a study that is multi-faceted and wide-ranging, much like civic performance itself. Ideal for scholars of Early Modern global politics, economics, and culture; literary and performance studies; print culture; and the digital humanities, *Civic Performance* casts a new lens on street pageantry and entertainments in the historically and culturally significant locus of Early Modern London.

Civic Revolution Jul 20 2021 Cities are the places that have the greatest influence over life on Earth. The single biggest cause of global warming, the urbanisation of humanity, is potentially the principal solution. The 'ecological genius' of the city enables us to live better - while consuming, wasting and polluting less. However it remains a vast, largely hidden civic power. What is missing is a citizen's

guide to turn the place where we live into the seat of the solution. Energising, motivating and uplifting, Civic Revolution is a topical and relevant book about the power of belonging that gets to the heart of how - and why - all of us must act. 'A timely and readable call to arms to people who want to make life better in their local community but also understand the need for more fundamental system change.' - Matthew Taylor, Chief Executive of the Royal Society of Arts.

Managing Migration Aug 09 2020 Nation States now increasingly have to cope with large numbers of non-citizens living within their borders. This has largely been understood in terms of the decline of the nation state or of increasing globalisation, but in *Managing Migration* Lydia Morris argues that it throws up more complex questions. In the context of the European Union the terms of debate about immigration, legislation governing entry, and the practice of regulation reveal a set of competing concerns, including: *anxiety about the political affiliation of migrants *a clash between commitment to equal treatment and the desire to protect national resources *human rights obligations alongside restrictions on entry. The outcome of these clashes is presented in terms of an increasingly complex system of civic stratification. The book then moves on to examine the way in

which abstract notions of rights map on to lived experiences when filtered through other forms of difference such as race and gender. This book will be essential reading for students and researchers working in the areas of migration and the study of the European Union. Lydia Morris is Professor of Sociology at the University of Essex.

Sovereignty, Civic Participation, and Constitutional Law Jun 26 2019 This book brings recent insights about sovereignty and citizen participation in the Belgian Constitution to scholars in the fields of law, philosophy, history, and politics. Throughout the Western world, there are increasing calls for greater citizen participation. Referendums, citizen councils, and other forms of direct democracy are considered necessary antidotes to a growing hostility towards traditional party politics. This book focuses on the Belgian debate, where the introduction of participatory politics has stalled because of an ambiguity in the Constitution. Scholars and judges generally claim that the Belgian Constitution gives ultimate power to the nation, which can only speak through

representation in parliament. In light of this, direct democracy would be an unconstitutional power grab by the current generation of citizens. This book critically investigates this received interpretation of the Constitution and, by reaching back to the debates among Belgium's 1831 founding fathers, concludes that it is untenable. The spirit, if not the text, of the Belgian Constitution allows for more popular participation than present-day jurisprudence admits. This book is the first to make recent debates in this field accessible to international scholars. It provides a rare source of information on Belgium's 1831 Constitution, which was in its time seen as modern constitutionalism's greatest triumph and which became a model for countless other constitutions. Yet the questions it asks reverberate far beyond Belgium. Combining new insights from law, philosophy, history, and politics, this book is a showcase for continental constitutional theory. It will be a valuable resource for academics and researchers in constitutional law, political and legal philosophy, and legal history.

Public Policymaking in Hong Kong Jan 02 2020 This book discusses civic engagement and public policymaking in postcolonial Hong Kong. Utilizing case studies of citizens' advisory committees involving four policy areas - urban planning, social welfare policy, environmental protection, and arts and culture policy - it examines the interaction between the state and civil society, and explores how far the state opens up its policy process for citizens' participation.
