Connections Dec 25 2021 Perhaps no other technology has done so much to so many, but been studied by so few, as the telephone. Even as its physical size diminishes, the telephone is becoming more important. In *Connections*, now available in paperback, James E. Katz gives greater visibility to this important element in modern life. Katz examines how the telephone reveals gender relations in a way not predicted by feminist theories, how it can be used to protect and invade personal privacy, and how people harness telephone answering machines to their advantage. Katz's inquiry reports on obscene phone calls, the abuses of caller-ID technology, and attitudes toward voice mail. National data about cellular telephones are presented to show the extent to which beepers and car phones have become status symbols. Katz ranges from microsocial interaction to macrosocial theory, and from the family and personal levels of organization to that of large-scale industrial bureaucracies. The result of this investigation is a compelling mosaic spanning sociology and psychology, and organization and communication studies. These arresting portraits will offer profound insight to historians, students of American culture, and those concerned about the nature and direction of the emerging information society.

Why Are You Always on the Phone? Aug 21 2021 *Why Are You Always on the Phone? SMART Skills with the Smartphone Generation* is a revelation and an actual depiction of what goes on in the everyday lives of youth who are connected and are online most of the time either via their smartphone or their iPad. Many a time, parents of tweens and teenagers from the age of 10 onwards to 18, are

curious and are even "tearing their hair out"; frustrated with their child/children's obsession with texting and chatting online 24/7. The challenge then is how we can seek to understand the complexities and nuances of our youth and their connection in the 21st-century technologically driven globalized society. Unraveling this challenge, this book provides powerful insights into the lives of individuals as they grapple with the rise of being connected at any time at any place via their smartphone. Voices from parents, tweens and teens sharing their online experiences and opinions have been weaved and compiled into the text for an honest and interesting read for all. With stories and anecdotes, *Why Are You Always on the Phone?* serves to answer the questions "Why are you always online?", "What are you doing online?" and a list of queries that most parents, educators and even tweens and teenagers themselves seek to know and are curious about. It is hoped that by answering these, it will prompt deeper, more empathetic, and layered connections between parents, tweens, teenagers and educators for more fulfilling parent-child and teacher-student relationships and thus highlight the importance of practising effective and safe uses of the smartphone and other devices.

Crisis Communications Dec 13 2020 On September 11, 2001, AT&T's traffic was 40 percent greater than its previous busiest day. Wireless calls were made from the besieged airplanes and buildings, with the human voice having a calming influence. E-mail was used to overcome distance and time zones. And storytelling played an important role both in conveying information and in coping with the

disaster. Building on such events and lessons, *Crisis Communications* features an international cast of top contributors exploring emergency communications during crisis. Together, they evaluate the use, performance, and effects of traditional mass media (radio, TV, print), newer media (Internet, email), conventional telecommunications (telephones, cell phones), and interpersonal communication in emergency situations. Applying what has been learned from the behavior of the mass media in past crises, the authors clearly show the central role of communications on September 11. They establish how people learned of the tragedy and how they responded; examine the effects of media globalization on terrorism; and, in many cases, give specific advice for the future.

Studies in Language and Social Interaction Sep 21 2021 This collection offers empirical studies and theoretical essays about human communication in everyday life. The writings come from many of the world's leading researchers and cut across academic boundaries, engaging scholars and teachers from such disciplines as communication, sociology, anthropology, linguistics, and education. Chapters emphasize empirical, qualitative studies of people's everyday uses of talk-in-interaction, and they feature work in such areas as sociolinguistics, conversation analysis, discourse analysis, and ethnography. The volume is dedicated to and highlights themes in the work of the late Robert Hopper, an outstanding scholar in communication who pioneered research in Language and Social Interaction (LSI). The contributors examine various features of human interaction (such as laughter, vocal repetition, and hand gestures) occurring naturally within a variety of settings (at a dinner table, a doctor's office, an automotive repair shop, and so forth), whereby interlocutors accomplish aspects of their interpersonal or institutional lives (resolve a disagreement, report bad medical news, negotiate a raise, and more), all of which may relate to larger social issues (including police brutality, human spirituality, death, and optimism). The chapters in this anthology show that social life is largely a communicative accomplishment and that people constitute the social realities experienced every day

through small and subtle ways of communicating, carefully orchestrated but commonly taken for granted. In showcasing the diversity of contemporary LSI research, this volume is appropriate for scholars and graduate students in language and social interaction, communication, sociology, research methods, qualitative research methods, discourse analysis, conversation analysis, linguistics, and related areas.

Magic in the Air Apr 16 2021 In this timely volume, James E. Katz, a leading authority on social consequences of communication technology, analyzes the way new mobile telecommunications affect daily life both in the United States and around the world. Magic in the Air is the most wide-ranging analysis of mobile communication to date. Katz investigates the spectrum of social aspects of the cell phone's impact on society and the way social forces affect the use, display, and re-configuration of the

cell phone. Surveying the mobile phone's current and emerging role in daily life, Katz finds that it provides many benefits for the user, and that some of these benefits are subtle and even counter-intuitive. He also identifies ways the mobile phone has not been entirely positive. After reviewing these he outlines some steps to ameliorate the mobile phone's negative effects. Katz also discusses use and abuse of mobile phones in educational settings, where he finds that their use is eroding students' participation in class even as it is helping them to cheat on exams and cut class. Parents no longer object to their children having mobile phones in class in a post-Columbine and 9/11 era; instead they are pressing schools to change their rules to allow students to have their phones available during class. And mobile phone misbehavior is by no means limited to students: Katz finds that teachers are increasingly taking calls in the middle of class, even interrupting their own lectures to answer what they claim are important calls. In keeping with the book's title, Katz explores the often overlooked psychic and religious uses of the mobile phone, an area that has only recently begun to command scholarly interest. *Magic in the Air* will be essential reading for communications specialists, sociologists, and social psychologists.
