[Employability and Local Labour Markets](#) Aug 28 2019 The concept of employability has provided a foundation for much current labour market policy. It has also provided a useful framework for analyzing national and urban labour markets and related policies in a variety of different circumstances both for those in and out of work. The papers in this book help progress the concept of employability, demonstrating the importance of the geographic and spatial context, and showing its flexibility and usefulness as a basis for theory, analysis and policy. The papers are divided into two main sections: understanding the concept of employability lessons for labour market policy in changing labour markets. The chapters also provide general insights into many current labour market policy debates. As employability continues to be the foundation of many labour market policies, this volume considers the economic and geographical dimensions of employability in local labour market analysis and policy. This book was previously published as a special issue of the journal Urban Studies.

Welcome to the surreal, misshapen universe of Adam Marek ' s first collection; a bestiary of hybrids from the techno-crazed future and mythical past; a users ' guide to the seemingly obvious (and the world of illogic implicit within it). Whether fantastical or everyday in setting, Marek ' s stories lead us down to the engine room just beneath modern consciousness, a place of both atavism and familiarity, where the body is fluid, the spirit mechanised, and beasts often tell us more about our humanity than anything we can teach ourselves.

Sorrow and Consolation in Italian Humanism Sep 29 2019 George McClure offers here a far-reaching analysis of the role of consolation in Italian Renaissance culture, showing how the humanists' interest in despair, and their effort to open up this realm in both social and personal terms, signaled a shift toward a heightened secularization in European thought. Analyzing works by fourteenth-and fifteenth-century writers, from Petrarch to Marsilio Ficino, McClure examines the treatment of such problems as bereavement, fear of death, illness, despair, and misfortune. These writers, who evinced a belief in the legitimacy of secular sadness, tried to forge a wisdom that in their view dealt more realistically with the art of living and dying than did the disputations of scholastic philosophy and theology. Arguing that consolatory concerns helped spur the revival of classical schools of psychological thought, McClure reveals that the humanists sought comfort from once-neglected troves of Stoic, Peripatetic, Epicurean, Platonic, and Christian thought. He contends that the humanists' pursuit of solace and their duty as consolers provided not only a forum but perhaps also an incentive for the articulation of prominent Renaissance themes concerning immortality, the dignity of man, and the sanctity of worldly endeavor. Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Resuscitation Mar 16 2021 Resuscitation is a two-stage process comprising the achievement/maintenance of spontaneous circulation and post-resuscitation management. The approach is complex and multifaceted and entails the integration of new physiological insights, pharmacological options, and technological advances. The purpose of this volume, written by top experts in the field, is to promote, share, and disseminate new advances in resuscitation and post-resuscitation care. The issues addressed are wide ranging and of great topical interest or controversy. They include priorities of intervention, quality of resuscitation, use of mechanical supports, new defibrillation strategies, prevention of organ damage, strategies in cases of sudden cardiac death, new pharmacological treatments, and post-resuscitation care, including temperature management and prediction and improvement of outcome after cardiac arrest. Particular attention is devoted to up-to-date evidence from the most recent experimental and clinical trials on resuscitation science and to gold standard evidence-based resuscitation and post-resuscitation treatments and interventions. In addition, organizational models and integrated care systems for trauma are considered, and critical care education and the process of guideline development are reviewed.

Children's Lives, Children's Futures Dec 13 2020 Children's Lives, Children's Futures focuses on how children in their first year of high school feel about school, its place in their lives and its role in their futures. The study is grounded in educational studies, drawing on pupil voice and children's active role in education, and on the sociology of childhood where children are viewed as active constructors of their lives. In many Western societies there is concern that children from less advantaged social backgrounds have limited aspirations, and are disproportionately unlikely to go to university. Croll, Attwood and Fuller consider the nature of children's engagement with education, the choices and constraints they experience and the reasons some young people fail to take advantage of educational opportunities.

Jonang: The One Hundred and Eight Teaching Manuals Oct 03 2022 Jamg ö n Kongtrul Lodr ö Taye presents practical teachings from a variety of Tibetan Buddhist traditions in this volume of The Treasury of Precious Instructions. The Treasury of Precious Instructions by Jamg ö n Kongtrul Lodr ö Taye, one of Tibet's greatest Buddhist masters, is a shining jewel of Tibetan literature, presenting essential teachings from the entire spectrum of practice lineages that existed in Tibet. In its eighteen volumes, Kongtrul brings together some of the most important texts on key topics of Buddhist thought and practice as well as authoring significant new sections of his own. In this, the eighteenth volume, Kongtrul expands on The One Hundred and Eight Guidebooks, a collection of teaching manuals compiled by the sixteenth-century Tibetan master Kunga Drolchok, adding Indic source texts, Tibetan antecedents, and later interpretations. Though compiled by a Jonangpa abbot and transmitted by the Jonang tradition, these teaching manuals are actually drawn from the Kadam, Sakya, Kagyu, and, to a lesser extent, Nyingma traditions. They are succinct and impart practical wisdom, as transmitted by key figures like Kunga Chogdrub and Lowo Khenchen Sonam Lhundrub. Gyurme Dorje, the translator, provides extensive notes and helpful context throughout. The resulting volume preserves and integrates the diverse lineages of Tibetan Buddhism while providing useful advice to practitioners.

Cardiac Arrest Oct 23 2021 Cardiac Arrest is the definitive and most comprehensive reference in advanced life support and resuscitation medicine. This new edition brings the reader completely up-to-date with developments in the field, focusing on practical issues of decision making, clinical management and prevention, as well as providing clear explanations of the science informing the practice. The coverage includes information on the latest pharmacotherapeutic options, the latest chest compression techniques and airway management protocols, all backed by clearly explained, evidence-based scientific research. The content is consistent with the latest guidelines for practice in this area, as detailed by the major international governing organisations. This volume is essential reading for all those working in the hospital environments of emergency medicine, critical care, cardiology and anesthesia, as well as those providing care in the pre-hospital setting, including paramedics and other staff from the emergency services.

Computerworld May 06 2020 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

The Oxford Handbook of Depression and Comorbidity Jun 06 2020 Depression is frequently associated with other psychiatric disorders and is often related to chronic health problems. Depressive symptoms are also common in chronically distressed close relationships and severe interpersonal difficulties in families and at work. The topic of depressive comorbidity is clearly very important, and while recent research in this area has been methodologically sophisticated, well presented, and inherently interesting, there has not been a comprehensive, academic resource that covers recent developments in this area. The Oxford Handbook of Depression and Comorbidity brings together scholarly contributions from world-class researchers to present a careful and empirically based review of depressive comorbidity. Cutting-edge chapters address theory, research, and practice, while capturing the diversity, evidence-base, and importance of depressive comorbidity. Specific topics include the comorbidity between depression and PTSD, alcohol use, and eating, anxiety, panic, bipolar, personality, and sleep disorders, as well as schizophrenia, suicide, cardiovascular disease, cancer, pain, obesity, intimate relationships, and many more. The Oxford Handbook of Depression and Comorbidity is a unique and much-needed resource that will be helpful to a broad range of researchers and practitioners including clinical and counseling psychologists, psychiatrists, marital and family therapists, social workers, and counselors working in mental-health and general health-care settings, as well as students in these areas.

Handbook of Systemic Approaches to Psychotherapy Manuals Aug 01 2022 This handbook examines the development and use of manuals to guide and support systemic couples and family therapies. It addresses the process of manualizing, providing a secure base for therapist creativity rather than delineating prescriptive procedures. The volume addresses

therapist and trainer concerns by demonstrating the value of sufficiently articulating clinical and teaching models to inform colleagues of what actually occurs during therapy. The book describes the history, value, and controversies of manuals. In addition, it explores issues and experiences in the creation of manuals, identifies research issues related to the use and evaluation of manuals, and addresses training as a context for the application of treatment manuals. Key areas of coverage include: Reports of experiences with major, internationally established manuals, formulations of innovative practices by their developers, and specifications of training programs. Discussion of the various formats of manuals, demonstrating their benefit and transportability across different contexts. Surveys of a broad selection of manuals, creating a flexible and diversified concept of what forms manuals may take. Essential guidance for using manuals, which is an indispensable step for the field to progress and to claim to health resource commissioning, governments and insurance agencies that the systemic practice is evidence based and effective. The Handbook of Systemic Approaches to Psychotherapy Manuals is an essential resource for researchers, professors, and graduate students as well as clinicians and related therapists and professionals in clinical psychology, family studies, public health, social work, psychotherapy, child and adolescent psychology and all interrelated disciplines.
