El medio ambiente en el nuevo universo audiovisual Aug 21 2019 El nuevo ecosistema audiovisual, en el que las televisiones tratan de convivir con Internet, ofrece grandes posibilidades para informar, sensibilizar y educar al público sobre los retos ambientales a los que se enfrenta nuestra sociedad. Sin embargo, la investigación pone de manifiesto que los medios no han estado a la altura del envite, debido a la complejidad de las cuestiones ambientales, la siempre difícil relación de la ciencia con los medios de comunicación y la creciente tendencia hacia el infoentretenimiento. El medio ambiente en el nuevo universo audiovisual es el resultado tangible de un rico debate generado en la octava edición del foro «Transformar la televisión», reunido en La Casa Encendida, centro social y cultural de Fundación Montemadrid. En las páginas de este volumen, una decena de expertos en la materia analizan, con rigor y valentía, la representación audiovisual del medio ambiente en este nuevo paradigma comunicativo, en el que los formatos televisivos tradicionales han perdido peso y el vídeo en línea ha alcanzado un notable desarrollo, impulsado por las redes sociales.
