**php mysql construct manual** Sep 14 2021 if you want to connect via an alternate port other than 3306 as you might when using an ssh tunnel to another host using localhost as the hostname will not work using `127 0 0 1` will work apparently if you specify the host as localhost the constructor ignores the port specified as an argument to the constructor

[configuring mariadb with option files mariadb knowledge base](#) Jan 26 2020 x y in the examples

above refer to the base major minor version of the server for example mariadb 10 3 10 would read from mariadb 10 3 by using the mariadb x y syntax one can create option files that have

mariadb only options in the mariadb specific option groups that would allow the option file to work for both mariadb and mysql client option groups
