Magic in the Air Oct 01 2019 In this timely volume, James E. Katz, a leading authority on social consequences of communication technology, analyzes the way new mobile telecommunications affect daily life both in the United States and around the world. *Magic in the Air* is the most wide-ranging analysis of mobile communication to date. Katz investigates the spectrum of social aspects of the cell phone's impact on society and the way social forces affect the use, display, and re-configuration of the cell phone. Surveying the mobile phone's current and emerging role in daily life, Katz finds that it provides many benefits for the user, and that some of these benefits are subtle and even counter-intuitive. He also identifies ways the mobile phone has not been entirely positive. After reviewing these he outlines some steps to ameliorate the mobile phone's negative effects. Katz also discusses use and abuse of mobile phones in educational settings, where he finds that their use is eroding students' participation in class even as it is helping them to cheat on exams and cut class. Parents no longer object to their children having mobile phones in class in a post-Columbine and 9/11 era; instead they are pressing schools to change their rules to allow students to have their phones available during class. And mobile phone misbehavior is by no means limited to students: Katz finds that teachers are increasingly taking calls in the middle of class, even interrupting their own lectures to answer what they claim are important calls. In keeping with the book's title, Katz explores the often overlooked psychic and religious uses of the mobile phone, an area that has only recently begun to command scholarly interest. *Magic in the Air* will be essential reading for communications specialists, sociologists, and social psychologists.

New Directions in Telecommunications Policy: Information policy and economic policy Aug 30 2019 Communications policy as been a fertile area for testing theories of regulation, subsidy and incentives, free speech, political participation, and the public interest. The capacities of new communications technology have changed markedly since much of the governing legislation in the communications field was written. Such a change is likely to continue and have considerable impact on specific communications sectors and in communications policy. This two volume set of analyses undertakes a review of telecommunications policy in transition&—of actions taken and not taken, of goals pursued or ignored, of the adequacy of policy vehicles and their strengths and weaknesses. The authors evaluate three categories of policy problems: those of concept, scope, and judgment in communications policy; those specific to media industries and forces affecting them; and those concerning wider public policy concerns intersecting with communication.

Process Algebra with Timing Jun 08 2020 Timing issues are of growing importance for the conceptualization and design of computer-based systems. Timing may simply be essential for the correct behaviour of a system, e.g. of a controller. Even if

timing is not essential for the correct behaviour of a system, there may be good reasons to introduce it in such a way that suitable timing becomes relevant for the correct behaviour of a complex system. This book is unique in presenting four algebraic theories about processes, each dealing with timing from a different point of view, in a coherent and systematic way. The timing of actions is either relative or absolute and the underlying time scale is either discrete or continuous.

Amy's Answering Machine Aug 03 2022 Does your mother call you in a panic whenever there's a storm warning for your area? Does she act as though it's her duty to alert you to every health story on the news? Have you ever been briefly out of touch with your mother only to find she's phoned everyone short of the National Guard to track you down -- or, just maybe, are you that mother? Take comfort in knowing you're not alone, as Amy Borkowsky shares more than a decade's worth of maddening phone messages from her hilariously overprotective mom. Based on the hit CD of the same name, Amy's Answering Machine features actual messages in which Amy's mom warns her not to wear a red bathrobe because a friend's grandson "said that red is a gang color"...advises her not to get a cat because "what if you finally found a nice guy and he was allergic?"...cautions her not to wear crepe-soled shoes because "they were just saying on the news that if you're ever in a plane crash, crepe is no good if you have to go down the slide." Amy also reveals the stories behind the messages and shares calls not available on CD, each one brimming with the worry and annoying comments only a loving mother could dish out. The same warnings and suggestions that had Amy cringing are sure to have you doubled over with laughter. But before you turn the page, take some advice from Amy's mom: Make sure you have plenty of reading light, because squinting causes crow's feet.

Home Territories Apr 06 2020 Home Territories examines how traditional ideas of home, homeland and nation have been destabilised both by new patterns of migration and by new communication technologies which routinely transgress the symbolic boundaries around both the private household and the nation state. David Morley analyses the varieties of exile, diaspora, displacement, connectedness, mobility experienced by members of social groups, and relates the micro structures of the home, the family and the domestic realm, to contemporary debates about the nation, community and cultural identities. He explores issues such as the role of gender in the construction of domesticity, and the conflation of ideas of maternity and home, and engages with recent debates about the 'territorialisation of culture'.

Case Studies in Jewish Business Ethics Sep 04 2022 Many people think of business as a game of strategy, and argue that whatever works for business success is acceptable, even if it involves cheating, deceptions, and other improprieties. Jewish business law rejects this approach. Using specific case studies, this book analyzes the strategies that are impermissible, discussing deceptive advertising, negative advertising, pressure tactics in sales, insider trading, price matching, worker evaluations, termination policy, and many others. An excellent adult education volume.
