Critical Care in Dermatology Dec 10 2020 Dermatology is usually thought of as an outpatient specialty, but some skin conditions require intensive care and dermatologists increasingly play a key role in the diagnosis and management of skin disorders in emergency departments and intensive care units. This book is a concise review of dermatological emergencies, presenting cases in a step by step, logical manner - nature of the condition, why it is an emergency, population at risk, clinical presentation and clues, laboratory diagnostic methods, differential diagnosis and management. Separate chapters discuss drug therapy in dermatological emergencies and challenging clinical scenarios, including pregnancy and lactation. Key points Concise review of critical care in dermatological emergencies Presents cases in logical, step by step manner Includes 90 full colour images and illustrations

Cystic Fibrosis, An Issue of Pediatric Clinics of North America, E-Book May 03 2020 Cystic Fibrosis (CF) is a multisystem disease whose symptoms and signs involve the gastrointestinal tract (thus affecting nutritional status), endocrine system, reproductive system and the respiratory tract (nose, sinuses and lungs). Despite new treatments, the median survival for patients with CF is less than optimal, primarily due to complications of obstructive lung disease. Currently there are approximately 60,000-80,000 people worldwide with CF. The clinical manifestations of CF are caused by dysfunction of CFTR (cystic fibrosis transmembrane conductance regulator), a multifunctional cyclic-AMP regulated ion channel protein. Over time, there has been dramatic improvement in CF patient life expectancy, in large part related to earlier diagnosis (newborn screening), better understanding of molecular genetics and underlying pathophysiology, the integrated and highly specialized Cystic Fibrosis Foundation Accredited Care Centers, and development of a wide range of new treatments and therapies, some of which target the basic CFTR defect. This edition of Pediatric Clinics of North America will offer general pediatricians and family physicians, as well as subspecialists, an update of the extraordinary progress made in the understanding and treatment of Cystic Fibrosis.
