A Matter of Record, Aug 19 2021 This textbook aims to give an introduction to the use of documentary sources in social research. It is designed to be a companion to courses in research methods in the social sciences and history and a reference text for those beginning research on documentary sources. The book begins with an overview of the nature of social research and the variety of methods which can be used. Scott identifies three types of evidence useful in such research - physical evidence, personal evidence, documentary evidence. He argues that the logic of research is common to each type of evidence, but each involves specific methodological issues. An appraisal grid for the analysis of documents is presented showing the criteria which must be used in evaluating documentary sources. In the following chapters, the criteria are applied to the variety of documentary sources available to the social researcher: census data and official statistics; government publications; directories and yearbooks; personal diaries and letters. Documentary Film: A Very Short Introduction, July 30 2022 Documentary film can encompass anything from Robert Flaherty's pioneering ethnography Nanook of the North to Michael Moore's anti-Iraq War polemic Fahrenheit 9/11, from Dziga Vertov's artful Soviet propaganda piece Man with a Movie Camera to Luc Jacquet's heart-tugging wildlife epic March of the Penguins. In this concise, crisply written guide, Patricia Aufderheide takes readers along the diverse paths of documentary history and charts the lively, often contentious debates among filmmakers and scholars about the best ways to represent reality and to tell the truth worth telling. Beginning with an overview of the central issues of documentary filmmaking--its definition and purposes, its forms and founders--Aufderheide focuses on several of its key subgenres, including political affairs films, government propaganda (particularly the works produced during World War II), historical documentaries, and nature films. Her thematic approach allows readers to enter the subject matter through the kinds of films that first attracted them to documentaries, and it permits her to make connections between eras, as well as revealing the ongoing nature of documentary's core controversies involving objectivity, advocacy, and bias. Interwoven throughout are discussions of the ethical and practical considerations that arise with every aspect of documentary production. A particularly useful feature of the book is an appended list of "100 great documentaries" that anyone with a serious interest

the genre should see. Drawing on the author's four decades of experience as a film scholar and critic, this book is the perfect introduction not just for teachers and students but also for all thoughtful filmgoers and for those who aspire to make documentaries themselves. About the Series: Combining authority with accessibility, and style, Very Short Introductions offer an introduction to some of life's most interesting topics. Written by experts for the newcomer, they demonstrate the finest contemporary thinking about the central problems and issues in hundreds of key topics, from philosophy to Freud, quantum theory to Islam.

Writing, Directing, and Producing Documentary Films and Digital Video Feb 22 2022 In a new edition of this popular guidebook, filmmakers Alan Rosenthal and Ned Eckhardt show readers how to utilize the latest innovations in equipment, technologies, and production techniques for success in the digital, web-based world of documentary film. All twenty-four chapters of the volume have been revised to reflect the latest advances in documentary filmmaking. Rosenthal and Eckhardt discuss the myriad ways in which technological changes have impacted the creation process of documentary films, including how these evolving technologies both complicate and enrich filmmaking today. The book provides crucial insights to the filmmaker from the film's conception to distribution of the finished film. Topics include creating dynamic proposals, writing narration, and navigating the murky world of contracts. Also included are many practical tips for first-time filmmakers. To provide context and to illustrate techniques, Rosenthal and Eckhardt reference more than one hundred documentaries in detail. A new appendix, "Using the Web and Social Media to Prepare for Your Career," guides filmmakers through the process of leveraging social media and crowdsourcing for success in filmmaking, fund-raising, and promotion. A day-to-day field manual packed with invaluable lessons, this volume is essential reading for both novice and experienced documentary filmmakers.

Introduction to Documentary, Third Edition Aug 26 2019 The third edition of Bill Nichols's best-selling text provides an up-to-date introduction to the most important issues in documentary history and criticism. A new chapter, "I Want to Make a Documentary: Where Do I Start?" guides readers through the steps of planning and preproduction and includes an example of a project proposal for a film that went on to win awards at major festivals. Designed for students in any field that makes use of visual evidence and persuasive strategies, *Introduction to Documentary* identifies the genre's distinguishing qualities and teaches the viewer how to read documentary film. Each chapter takes up a discrete question, from "How did documentary filmmaking get started?" to "Why are ethical issues central to documentary filmmaking?" Here Nichols has fully rewritten each chapter for greater clarity and ease of use, including revised discussions of earlier films and new commentary on dozens of recent films from *The Cove* to *The Act of Killing* and from *Gasland* to *Restrepo*.

Apollo 14 Dec 23 2021 "Apollo 14, the third mission during which men have worked on the surface of the Moon, was highly successful. This mission to the Fra Mauro Formation provided geophysical data from a new set of instruments... Because of improved equipment, such as the modularized equipment transporters and because of the extended time spent on the lunar surface, a large quantity and variety of lunar samples were returned to Earth for detailed examination. New information concerning the mechanics of the lunar soil was also obtained during this mission. In addition, five lunar-orbital experiments were conducted during the Apollo 14 mission, needing no new equipment other than a camera. The experiments were executed by the command module pilot in the command and service module while the commander and lunar module pilot were on the surface of the Moon. This report is preliminary in nature; however, it is meant to acquaint the reader with the actual conduct of the Apollo 14 scientific mission and to record facts as they appear in the early stages of the scientific mission evaluation. As far as possible, data that are reported, and preliminary results and conclusions are included."--p. xi.

Regarding Life Jun 24 2019 Contends that the narrative and aesthetic qualities of the documentary genre enable new understandings of animals and animal/human relationships. As indicated by the success of

films as *March of the Penguins* and *Food, Inc.*, the documentary has become the preeminent format for rendering animals and nature onscreen. In *Regarding Life*, Belinda Smajil brings together examples from a broad array of moving image contexts, including wildlife film and television, advocacy documentary, avant-garde nonfiction, and new media to identify a new documentary terrain in which the representation of animals in the wild and in industrial settings is becoming markedly more complex and increasingly more involved with pivotal ecological debates over species loss, food production, and science. While attending to some of the most discussed documentaries of the last two decades, including *Grizzly Man*; *Food, Inc.*; *Sweetgrass*; *Our Daily Bread*; and *Darwin's Nightmare*, the book also draws on lesser-known film examples, and is one of the first to bring film studies understandings to new media such as YouTube. The result is a study that melds film studies and animal studies to explore how documentary films render humans and animals, and to what political ends. Belinda Smajil is Associate Professor in Film and Screen Studies at Monash University in Australia. She is the author of *The Documentary: Politics, Emotion, Culture and the* (with Olivia Khoo and Audrey Yue) of *Transnational Australian Cinema: Ethics in the Asian Diasporas*.

Principles of Investigative Documentation Jun 26 2019 This is the only book in existence that discusses the process of documenting an investigation from start to finish. It presents just about everything an investigator needs to know regarding how to document an investigation. The first chapter discusses the primary principles of investigative documentation: taking comprehensive notes; documenting every effort to contact witnesses and all surveillance; preparing reports whenever there is any possibility of needing to testify; taking verbatim statements from hostile witnesses and declarations from friendly witnesses; and providing all case documents to the client or maintaining a document retention plan. The second chapter details the numerous misconceptions pertaining to investigative documentation. This chapter sets the stage for the remaining chapters on note-taking, running resumes, reports, statements, and documentation retention. Each chapter is broken down into four or five sections that approximate the methods used to complete that particular documentary endeavor. The book also contains an exhaustive appendix that non-investigators will find to be very useful, including: one that lists hundreds of abbreviations that investigators may find helpful when taking notes; sample reports that readers may use as templates for generating their own reports; an alphabetic stylebook that is based on styles used by the media and law enforcement agencies that provides a quick tool for properly referencing abbreviations, names, capitalization and numerals, among other topics; and several sample statements and declarations to show what these documents, when completed, are supposed to look like. This is an advanced book for people who already have the necessary skills to do an investigation. By following the principles outlined in this book, investigators will see the quality of their investigations improve markedly and ultimately be more successful.

The Logic of English WordApr 14 2021 Logophilia Education (estd. August, 2010) is the first and only Etymology Education organisation in the world. We're passionate in our belief that a strong and sophisticated vocabulary is the most essential skill that students should possess. Why? Anything you is written in words. All subjects have their own terminology. Without a strong understanding of English words you will never really study well, and will end up finding shortcuts to learning (e.g. rote-memorising using mnemonics, and so forth). Logophilia, therefore, teaches the structure of English words with the intent of getting students to become very strong in vocabulary, and dictionary-independent. This meth teaching, done through Logophilia's unique paedagogy, is called Etymology Education. We promote Etymology awareness as a life skill, and aim to get it into mainstream school curricula worldwide, thereby simplifying and sophisticating language comprehension for everyone. We teach (experiential vocabulary programmes), quiz (the Logo+philia™ Gala Olympiad), & write (books, blogs, apps, and vocabulary-learning aids), to help you see the logic of English words.
