**LIFE the World's Great Civilizations** Sep 08 2020 This is the pictorial history of the rise (and fall) of great nations, from the ancients to today. But this is not just Rome and the Incas and British imperialism-though it certainly includes them-but lesser known civilizations that are often relegated to a footnote, or forgotten altogether. The ancient Anasazi Indians of the American Southwest apparently enjoyed an agrarian lifestyle that, after they mysteriously disappeared, would not be realized again on this continent for many generations. The natives of Easter Island sealed their own doom with a kind of communal hysteria that remains unclear. Several cultures put their mark on England's Stonehenge, and peeling the layers of that story is like parsing the experience of a very old tree, ring by ring. Of course the ages of empire are recounted: Egypt, Greece, Rome, China, Russia, Great Britain. We journey, photographically and archeologically, through Troy, and also the Mediterranean islands of Gnosnos and Santorini (was this where Plato's Atlantis thrived before the cataclysm)? We climb to Machu Piccu, and trek to Australia to revisit the island continent when it belonged to its Aborigines. Obviously, many of the great civilizations belong to history, experiencing their glory before the advent of photography. There are no pictures of Alexander the Great or Genghis Khan or Napoleon beyond the painted ones. But there are many photographs of the civilizations they built and ruled, many of which were made for LIFE magazine, which looked at this story often. Near our book's end, we arrive at the ongoing narrative that is the United States of America: today's great civilization, built on a system called democracy. Our history and prospects are all the more fascinating when put in relief against the stories of all previous great civilizations.

**The Wind Whistling in the Cranes: A Novel** Nov 10 2020 From the winner of the prestigious FIL Prize in Romance Languages comes this masterpiece saga, set in the twilight of the late twentieth century, of two clashing families in coastal Portugal. With the grand sweep of Elena Ferrante's Neapolitan novels, this enduring tale transports us to a picturesque seaside town haunted by its colonial past. Considered one of Europe's most influential contemporary writers, Portuguese novelist Lídia Jorge has captivated international audiences for decades. With the publication of *The Wind Whistling in the Cranes*, English-speaking readers can now experience the thrum of her signature poetic style and her delicately braided multicharacter plotlines, and witness the heroic journey of one of the most maddening, and endearing, characters in literary fiction. Exquisitely translated by Margaret Jull Costa and Annie McDermott, this breathtaking saga, set in the now-distant 1990s, tells the story of the landlords and tenants of a derelict canning factory in southern Portugal. The wealthy, always-scheming Leandros have owned the building since before the Carnation Revolution, a peaceful coup that toppled a four-decade-long dictatorship and led to Portugal's withdrawal from its African colonies. It was Leandro matriarch Dona Regina who handed the keys to the Matas, the bustling family from Cape Verde who saw past the dusty machinery and converted the space into a warm—and welcoming—home. When Dona Regina is found dead outside the factory on a holiday weekend, her body covered in black ants, her granddaughter, Milene, investigates. Aware that her aunts and uncles, who are off on vacation, will berate her inability to articulate what has just happened, she approaches the factory riddled with anxiety. Hours later, the Matas return home to find this strange girl hiding behind their clotheslines, and with caution, they take her in . . . “Some said that Milene had been found wandering near the golf course. . . . Still others that she must have spent those five days at the beach, eating raw fish and sleeping out in the open . . .” Days later, the Leandros realize that Milene has become hopelessly entangled with their tenants, and their fear of political and financial ruin sets off a series of events that threatens to uproot the lives of everyone involved. Narrated with passionate, incandescent prose, *The Wind Whistling in the Cranes* establishes Lídia Jorge as a novelist of extraordinary international resonance.

Dionysius the Areopagite on the Divine Names and the Mystical Theology Dec 12 2020 First published in 1920, this book is a translation-the only known work of British scholar CLARENCE EDWIN ROLT (1880-1917)-of *On the Divine Names and The Mystical Theology*, by Dionysius the Areopagite, a first-century bishop of Athens. The author is often also referred to as "pseudo-Dionysius" because a variety of anachronisms suggest that the manuscript was actually written much later by an unknown writer. Despite the book's unclear origins, the writings are still greatly valued for their theological insight. Saint Thomas Aquinas often quoted from pseudo-Dionysius, as did many other famous and influential theologians and philosophers. Pseudo-Dionysius deals, here, with the Supra-Personality of God. Personality, by definition, is a quality limited to an individual. God, on the other hand, is the opposite of an individual. God is in all things, so one cannot speak of a personality for the divine. Rather, pseudo-Dionysius proposes a Supra-Personality, which describes aspects and qualities of the universal being. Religious scholars and Christians wanting a different understanding of the relationship between God and the universe will find this a challenging but ultimately thought-provoking study.

**Jacques Ellul and the Technological Society in the 21st Century** Jul 19 2021 This volume rethinks the work of Jacques Ellul (1912-1994) on the centenary of his birth, by presenting an overview of the current debates based on Ellul's insights. As one of the most significant twentieth-century thinkers about technology, Ellul was among the first thinkers to realize the importance of topics such as globalization, terrorism, communication technologies and ecology, and study them from a technological perspective. The book is divided into three sections. The first discusses Ellul's diagnosis of modern society, and addresses the reception of his work on the technological society, the notion of efficiency, the process of symbolization/de-symbolization, and ecology. The second analyzes communicational and cultural problems, as well as threats and trends in early twenty-first century societies. Many of the issues Ellul saw as crucial – such as energy, propaganda, applied life sciences and communication – continue to be so. In fact they have grown exponentially, on a global scale, producing new forms of risk. Essays in the final section examine the duality of reason and revelation. They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge, which is to say, on the one hand, the experience of the human being as contained in the rationalist, sociological and philosophical traditions. On the other hand there are the transcendent roots of human existence, as well as "revealed knowledge," in the mystical and religious traditions. The meeting of these two traditions enables us to look at Ellul's work as a whole, but above all it opens up a space for examining religious life in the technological society.
