Contemporary Issues in International Arbitration and Mediation: The Fordham Papers (2013) Nov 02 2022 The 2013 volume of *Contemporary Issues in International Arbitration and Mediation: The Fordham Papers 2013* is a collection of important works in the field written by the speakers at the 2013 Fordham Law School Conference on International Arbitration and Mediation, held in New York.

Gender in Refugee Law Aug 19 2021 Questions of gender have strongly influenced the development of international refugee law over the last few decades. This volume assesses the progress toward appropriate recognition of gender-related persecution in refugee law. It documents the advances made following intense advocacy around the world in the 1990s, and evaluates the extent to which gender has been successfully integrated into refugee law. Evaluating the research and advocacy agendas for gender in refugee law ten years beyond the 2002 UNHCR Gender Guidelines, the book investigates the current status of gender in refugee law. It examines gender-related persecution claims of both women and men, including those based on sexual orientation and gender identity, and explores how the development of an anti-refugee agenda in many Western states exponentially increases vulnerability for refugees making gendered claims. The volume includes contributions from scholars and members of the advocacy community that allow the book to examine conceptual and doctrinal themes arising at the intersection of gender and refugee law, and specific case studies across major Western refugee-receiving nations. The book will be of great interest and value to researchers and students of asylum and immigration law, international politics, and gender studies.

China's Great Urbanization Aug 26 2019 China's extraordinary economic boom since the late 1970s has been accompanied by massive urbanization, with the proportion of the population living in cities rising from 18% in 1978 to 54% in 2014. Currently the Chinese government has

amongst its objectives the target to increase this to 60% by 2020, and also to improve the quality of China's cities. This book examines a wide range of issues connected to China's urbanization. It considers the many problems which have come with rapid urbanization, including urban housing problems, difficulties affecting rural migrants in urban areas, and a lack of social protection. It examines areas of current reform, including land reform, shanty town renewal and moves to address environmental problems. It explores governance issues, and throughout assesses how urbanization in China is likely to develop in future.

Piano Exam Pieces Plus Exercises 2021-2023: Grade 2 - Extended Edition Sep 07 2020

New Dynamics in US-China Relations Dec 11 2020 Washington's strategic pivot to Asia and Beijing's pursuit of new strategic and security interests in the region have led to increasing tensions between the two powers. US leaders have stressed that their increased interest in Asia is driven by a desire to benefit from the thriving regional economies, as well as to play the leading role in maintaining peace and stability in the region. However, Beijing is particularly concerned about US efforts to consolidate its alliances and deepen security partnerships with a number of regional states. Given the centrality of the two powers to the strategic stability and economic development of the region, these new dynamics in US-China relations must be properly understood and appropriately handled. This book examines the growing Sino-US strategic rivalry in the Asia-Pacific alongside the strategies employed in the management of this relationship. In turn, it illuminates the sources of conflict and cooperation in US-China relations, looking specifically at maritime disputes, economic relations, energy security, non-traditional security, defence and strategic forces, and Taiwan. Finally, it explores the role of regional states in shaping US-China relations, and in doing so covers the influence of Japan, India, the Korean Peninsula, the Philippines, Vietnam, Myanmar, and Cambodia. With chapters from leading scholars and analysts this book deals with a diverse range of issues including strategic rivalry, expanding regional trade relations, non-traditional security issues, the role of energy security, maritime security and how Asian states view their relations with the US and China respectively. *New Dynamics in US-China Relations* will be of huge interest to students and scholars of Asian politics, US politics, international relation and security studies, as well as practitioners involved in framing and implementing foreign, security and economic policy pertaining to the Asia Pacific.

Shifting Power in Asia-Pacific? Aug 07 2020 This book investigates whether a power shift has taken place in the Asia-Pacific region since the end of the Cold War. By systematically examining the development of power dynamics in Asia-Pacific, it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour. With a special emphasis on Sino-US competition, the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities, national power and the much-cited regional power shift. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44 regional countries and covers a period of twenty years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military and economic cooperation via a structured-focused comparison and by applying a comparative-historical analysis, the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing.

Stalin's American Spy Oct 09 2020 Stalin's American Spy tells the remarkable story of Noel Field, a Soviet agent in the US State Department in the mid-1930s. Lured to Prague in May 1949, he was kidnapped and handed over to the Hungarian secret police. Tortured by them and interrogated too by their Soviet superiors, Field's forced 'confessions' were manipulated by Stalin and his East European satraps to launch a devastating series of show-trials that led to the imprisonment and judicial murder of numerous Czechoslovak, German, Polish and Hungarian party members. Yet there were other events in his very strange career that could give rise to the suspicion that Field was an American spy who had infiltrated the Communist

movement at the behest of Allen Dulles, the wartime OSS chief in Switzerland who later headed the CIA. Never tried, Field and his wife were imprisoned in Budapest until 1954, then granted political asylum in Hungary, where they lived out their sterile last years. This new biography takes a fresh look at Field's relationship with Dulles, and his role in the Alger Hiss affair. It sheds fresh light upon Soviet espionage in the United States and Field's relationship with Hede Massing, Ignace Reiss and Walter Krivitsky. It also reassesses how the increasingly anti-Semitic East European show-trials were staged and dissects the 'lessons which Stalin sought to convey through them.

The Oxford Handbook of International Climate Change Law Apr 14 2021 "Climate change presents one of the greatest challenges of our time, and has become one of the defining issues of the twenty-first century. The radical changes which both developed and developing countries will need to make, in economic and in legal terms, to respond to climate change are unprecedented. International law, including treaty regimes, institutions, and customary international law, needs to address the myriad challenges and consequences of climate change, including variations in the weather patterns, sea level rise, and the resulting migration of peoples. ... This book addresses the major legal dimensions of the problems caused by climate change: including questions ranging from how to implement international legal frameworks at the national level, to how carbon trading systems can be used as a means of reducing the costs of meeting emission reduction targets."--Book jacket.

The Green Book Jul 30 2022 This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Capital Punishment: New Perspectives Oct 01 2022 This collection asks questions about the received wisdom of the debate about capital punishment. Woven through the book, questions are asked of, and remedies proposed for, a raft of issues identified as having been overlooked in the traditional discourse. It provides a long overdue review of the disparate groups and strategies that lay claim to abolitionism. The authors argue that capital litigators should use their skills challenging the abuses not just of process, but of the conditions in which the condemned await their fate, namely prison conditions, education, leisure, visits, medical services, etc. In the aftermath of successful constitutional challenges it is the beneficiaries (arguably those who are considered successes, having been 'saved' from the death penalty and now serving living death penalties of one sort or another) who are suffering the cruel and inhumane alternative. Part I of the book offers a selection of diverse, nuanced examinations of death penalty phenomena, scrutinizing complexities frequently omitted from the narrative of academics and activists. It offers a challenging and comprehensive analysis of issues critical to the abolition debate. Part II offers examinations of countries usually absent from academic analysis to provide an understanding of the status of the debate locally, with opportunities for wider application.

MIMO Power Line Communications Feb 10 2021 One of the first publications of its kind in the exciting field of multiple input multiple output (MIMO) power line communications (PLC), MIMO Power Line Communications: Narrow and Broadband Standards, EMC, and Advanced Processing contains contributions from experts in industry and academia, making it practical enough to provide a solid understanding of how PLC technologies work, yet scientific enough to form a base for ongoing R&D activities. This book is subdivided into five thematic parts. Part I looks at narrow- and broadband channel characterization based on measurements from around the globe. Taking into account current regulations and electromagnetic compatibility (EMC), part II describes MIMO signal processing strategies and related capacity and throughput estimates. Current narrow- and broadband PLC standards and specifications are described in the various chapters of part III. Advanced PLC processing options are treated in part IV, drawing from a wide variety of research areas such as beamforming/precoding, time reversal, multi-user processing, and relaying. Lastly, part V

contains case studies and field trials, where the advanced technologies of tomorrow are put into practice today. Suitable as a reference or a handbook, MIMO Power Line Communications: Narrow and Broadband Standards, EMC, and Advanced Processing features self-contained chapters with extensive cross-referencing to allow for a flexible reading path.

Capacity Mechanisms in the EU Energy Market Sep 19 2021 Ensuring an adequate, long-term energy supply is a paramount concern in Europe. EU member states now intervene by encouraging investment in generation capacity, offering an additional revenue stream for conventional power plants in addition to the existing, heavily subsidised investments in renewable energy sources. These capacity remuneration mechanisms (or simply capacity mechanisms) have become a hot topic in the wider European regulatory debate. European electricity markets are increasingly interconnected, so the introduction of a capacity mechanism in one country not only distorts its national market but may have unforeseeable consequences for neighbouring electricity markets. If these mechanisms are adopted by several member states with no supra-national coordination and no consideration for their cross-border impact, they may cause serious market distortions and put the future of the European internal electricity market at risk. This book provides readers with an in-depth analysis of capacity mechanisms, written by an expert team of policy-makers, economists, and legal professionals. It will be a first point of reference for regulators and policy-makers responsible for designing optimal capacity mechanisms in Europe, and will be an invaluable resource for academics and practitioners in the fields of energy, regulation, and competition.--

Military Review Jul 18 2021

Australian Social Policy and the Human Services Jun 16 2021 Australian Social Policy and the Human Services contends that human service practitioners benefit from understanding the relationship between social policy, the human services and their own practices. In this comprehensive introduction to the subject, readers are encouraged to develop their policy literacy, or critical understanding of the development, implementation and evaluation of social policies. Part I explores the debates and organising principles of social policy and the human services. Part II focuses on the development and delivery of social policy, including its history, and a discussion of the Third Sector in Australia. Part III covers specific areas of social policy: income maintenance, employment, housing, health care, family and child care, and indigenous social policy. Emerging issues, such as globalisation and sustainability, are examined in Part IV. Each chapter features discussion points, exercises, case studies, further reading lists and links with the Australian Association of Social Workers Practice Standards (2013).

OECD Territorial Reviews: Puebla-Tlaxcala, Mexico 2013 Feb 22 2022 A comprehensive economic review of the Puebla-Tlaxcala region of Mexico. The review examines the region's challenges and assets and makes a series of policy recommendations.

Communication and Information Technology in Society May 04 2020 This book discusses a number of issues related to the various dimensions of the use of information and communication technologies (ICT) in management, and their economic and psycho-pedagogical uses. It answers several important questions concerning this research area, and its interdisciplinary approach serves to answer a number of key questions in this field. It offers a contribution to the wider social and scientific discussion on the theoretical and practical use of ICT, in management, econ ...

Self-Organizing Systems May 28 2022 This book constitutes the thoroughly refereed post-conference proceedings of the 7th IFIP TC 6 International Workshop on Self-Organizing Systems, IWSOS 2013, held in Palma de Mallorca, Spain, in May 2013. The 11 revised full papers and 9 short papers presented were carefully selected from 35 paper submissions. The papers are organized in following topics: design and analysis of self-organizing and self-managing systems, inspiring models of self-organization in nature and society, structure, characteristics and dynamics of self-organizing

networks, self-organization in techno-social systems, self-organized social computation and self-organized communication systems.

Urban Retrofitting for Sustainability Apr 26 2022 With a foreword from Paul King, Chief Executive, UK Green Building Council and Chairman, Zero Carbon Hub As concerns over climate change and resource constraints grow, many cities across the world are trying to achieve a low carbon transition. Although new zero carbon buildings are an important part of the story, in existing cities the transformation of the current building stock and urban infrastructure must inevitably form the main focus for transitioning to a low carbon and sustainable future by 2050. *Urban Retrofitting for Sustainability* brings together interdisciplinary research contributions from leading international experts to focus on key issues such as systems innovation, financing tools, governance, energy, and water management. The chapters consider not only the knowledge and technical tools available, but looks forward to how they can be implemented in real cities by 2050.

World Investment Report 2015 Jan 30 2020 The World Investment Report series provides the latest data and analysis foreign direct investment (FDI) and other activities of transnational corporations, as well as the policies to regulate them at the national and international levels. It aims to analyse the cross-border activities of translational corporations and related policy measures with a view to helping policymakers formulate appropriate policy responses.

(Free Sample) 28 Solved Papers (2010-20) for SSC CGL Tier I Exam 4th Edition Jan 24 2022

Financing for Low-carbon Energy Transition May 16 2021 This book is the first comprehensive assessment of the state of low-carbon investments in Asia, analyzing the rationales, mandates and public-private financing activities. Based on the experiences of several regional initiatives wherein public financing is catalyzing private investments in low-carbon infrastructure, this book proposes a framework that can be used as a tool to identify factors that influence private investment decisions and policy instruments that can scale up the private capital. Placing the Asian economies onto a low-carbon development pathway requires an unprecedented shift in investments. This book addresses this situation by asking questions such as: • What is the central role of private finance in achieving the Paris Agreement targets? • What key policy levers and risk mitigation can governments use in an effort to unlock the potentials of private capital? • How can regionally coordinated actions hold significant promise for scaling up private investments?

Final Workshop Proceedings of the Collaborative Project "Crystalline Rock Retention Processes" (7th EC FP CP CROCK) Nov 09 2020

Non-Statutory Executive Powers and Judicial Review Nov 21 2021 That non-statutory executive powers are subject to judicial review is beyond doubt. But current judicial practice challenges prevailing theories of judicial review and raises a host of questions about the nature of official power and action. This is particularly the case for official powers not associated with the Royal Prerogative, which have been argued to comprise a "third source" of governmental authority. Looking at non-statutory powers directly, rather than incidentally, stirs up the intense but ultimately inconclusive debate about the conceptual basis of judicial review in English law. This provocative book argues that modern judges and scholars have neglected the very concepts necessary to understand the supervisory jurisdiction and that the law has become more complex than it needs to be. If we start from the concept of office and official action, rather than grand ideas about parliamentary sovereignty and the courts, the central questions answer themselves.

Learning and Diversity in the Cities of the Future Oct 21 2021 This publication includes the Proceedings of the PLE Conference 2013. The Conference on Personal Learning Environments is now an established annual international, scientific event and a reference point for the current state of the art in research and development in Personal Learning Environments (PLE). The PLE Conference creates a space for researchers and practitioners to share concepts, case studies and research related to the design, development and implementation of Personal Learning

Environments in diverse educational contexts including formal and informal education. The 4th PLE Conference in 2013 took place at Beuth University of Applied Sciences in Berlin, Germany together with a parallel event at Monash University in Melbourne, Australia. The PLE Conference 2013 received 75 submissions and welcomed almost 100 delegates from Europe, Asia, Australasia, North and South America and Africa. The papers included in the Proceedings provide rich and valuable theoretical and empirical insights into Personal Learning Environments. Personal Learning Environments (PLE) is an approach in Technology-Enhanced Learning (TEL) based on the principles of learner autonomy, ownership and empowerment. PLEs are integrated, individual environments for learning which include specific technologies, methods, tools, contents, communities and services constituting complex learning infrastructures, enhancing new educational practices and at the same time emerging from these new practices. This represents a shift away from the traditional model of technology-enhanced learning based on knowledge transfer towards a model based on knowledge construction and sharing.

Textbook of Periodontics Aug 31 2022

21st Century Homestead: Sustainable Agriculture I Nov 29 2019

China Entering the Xi Jinping Era Mar 26 2022 How will China develop under the new leadership of Xi Jinping and Li Keqiang? This is a key question for both China and the wider world. This book presents a comprehensive overview of the key areas and issues, assessing how things are likely to develop under the new leadership. It considers the economy, trade, politics, and demographics; appraises the leadership, both at the national and provincial levels; and discusses potential flashpoints in China's relationship with its neighbors and China's emerging role in world politics. The book emphasizes the great uncertainties surrounding the next phase of China's development, highlighting the structural problems of the economy, the problems of urbanization and governance, and the deep social cleavages which exist over issues such as income disparity, rampant corruption and unequal opportunities in social mobility. Against this backdrop it measures the emerging leadership of Xi Jinping to assess the prospects for China in the next decade and beyond.

26 Solved Papers (2010-19) for SSC CGL Tier I Exam 3rd Edition Jun 28 2022

Crisis and Promise in the Caribbean Jul 06 2020 The Caribbean is made up of a complex, enigmatic region, characterised by great disparities in size, population, geography, history, language, religion, race and politics. This is a region in which harmony and discord work in tandem, trying to link economic logic with political logic. This book is a useful tool not only for those specialists and students of regionalism but for all those putting their hands to the task of nation-building and those interested in the development processes of small states and economies. At the same time, this book is a comprehensive historical record especially highlighting hindrances to development in this region. This study raises two important issues: the 'political imperative of convergence' and the need for 'appropriate correcting mechanisms' that align the needs of the local with the regional. It is a volume that underlines the need for a change in strategy and makes proposals as to how to go about making those changes.

Theory and Applications of Models of Computation Dec 31 2019 This book constitutes the refereed proceedings of the 10th International Conference on Theory and Applications of Models of Computation, TAMC 2013, held in Hong Kong, China, in May 2013. The 31 revised full papers presented were carefully reviewed and selected from 70 submissions. Bringing together a wide range of researchers with interests in computational theory and applications, the papers address the three main themes of the conference which were computability, complexity, and algorithms and present current research in these fields with aspects to theoretical computer science, algorithmic mathematics, and applications to the physical sciences.

Making Hong Kong Jul 26 2019 This insightful book provides a comprehensive survey of urban development in Hong Kong since 1841. Pui-yin Ho

explores the ways in which the social, economic and political environments of different eras have influenced the city's development. From colonial governance, wartime experiences, high density development and the return to Chinese sovereignty in 1997 through to contemporary challenges, this book explores forward-looking ideas that urban planning can offer to lead the city in the future. Evaluating the relationship between town planning and social change, this book looks at how a local Hong Kong identity emerged in the face of conflict and compromise between Chinese and European cultures. In doing so, it brings a fresh perspective to urban research, providing historical context and direction for the future development of the city. Hong Kong's urban development experience offers not only a model for other Chinese cities but also a better understanding of Asian cities more broadly. Urban studies scholars will find this an exemplary case study of a developing urban landscape. Town planners and architects will also benefit from reading this comprehensive book as it shows how Hong Kong can be taken to the next stage of urban development and modernisation.

International Trials and Reconciliation Dec 23 2021 Transitional justice is a burgeoning field of scholarly inquiry. Yet while the transitional justice literature is replete with claims about the benefits of criminal trials, too often these claims lack an empirical basis and hence remain unproven. While there has been much discussion about whether criminal trials can aid reconciliation, the extent to which they actually do so in practice remains under-explored. This book investigates the relationship between criminal trials and reconciliation, through a particular focus on the International Criminal Tribunal for the former Yugoslavia (ICTY). Using detailed empirical data - in the form of qualitative interviews and observations from five years of fieldwork - to assess and analyze the ICTY's impact on reconciliation in Bosnia-Herzegovina, Croatia and Kosovo, International Trials and Reconciliation: Assessing the Impact of the International Criminal Tribunal for the former Yugoslavia argues that reconciliation is not a realistic aim for a criminal court. They are, Janine Clark argues, only one part of a rich tapestry of justice, which must also include non-retributive transitional justice processes and mechanisms. Challenging many of the common yet untested assumptions about the benefits of criminal trials, this innovative and extremely timely monograph will be invaluable for those with interests in the theory and practice of transitional justice.

JUSTICE AND HUMAN DIGNITY IN AFRICA Jun 24 2019

The Euro Area Crisis in Constitutional Perspective Mar 14 2021 The euro area sovereign debt crisis has been the greatest threat to the euro since its inception, but the consequences of the crisis go well beyond the realm of macroeconomics: the crisis has cast doubt on the viability of a mechanism of integration such as the one envisaged in Economic and Monetary Union (EMU), and on the future of the European Union as a political project in the face of citizens' growing disaffection. The various responses to the crisis have not only altered the principles underlying EMU; they have also had a profound impact on the constitutional orders of the EU and its Member States. This book focuses on the euro area crisis and its aftermath from a constitutional perspective. It provides a critical analysis of the workings and evolution of Economic and Monetary Union, the changes brought by the crisis and their broader effects, and the constitutional obstacles to integration in this area. Looking forward, it tackles the uncertain future of economic and fiscal integration and the challenges posed. This is a compelling and incisive account of some of the most significant developments and dilemmas facing the European Union since its creation.

Production Chemicals for the Oil and Gas Industry, Second Edition Mar 02 2020 Production chemistry issues result from changes in well stream fluids, both liquid and gaseous, during processing. Since crude oil production is characterized by variable production rates and unpredictable changes to the nature of the produced fluids, it is essential for production chemists to have a range of chemical additives available for rectifying issues that would not otherwise be fully resolved. Modern production methods, the need to upgrade crude oils of variable quality, and environmental constraints demand chemical solutions. Thus, oilfield production chemicals are necessary to overcome or minimize the effects of the production chemistry problems. Production Chemicals for the Oil and Gas Industry, Second Edition discusses a wide variety of production chemicals used by the

oil and gas industry for down-hole and topside applications both onshore and offshore. Incorporating the large amount of research and applications since the first edition, this new edition reviews all past and present classes of production chemicals, providing numerous difficult-to-obtain references, especially SPE papers and patents. Unlike other texts that focus on how products perform in the field, this book focuses on the specific structures of chemicals that are known to deliver the required or desired performance—information that is very useful for research and development. Each updated chapter begins by introducing a problem, such as scale or corrosion, for which there is a production chemical. The author then briefly discusses all chemical and nonchemical methods to treat the problem and provides in-depth descriptions of the structural classes of relevant production chemicals. He also mentions, when available, the environmental properties of chemicals and whether the chemical or technique has been successfully used in the field. This edition includes two new chapters and nearly 50 percent more references.

Is the Planet Full? Apr 02 2020 Can our planet support the demands of the ten billion people anticipated to be the world's population by the middle of this century? This book explores the contexts, costs, and benefits of a burgeoning population on our economic, social, and environmental systems.

Professional Journal of the United States Army Jan 12 2021

Carbon Pricing Oct 28 2019 In 2012, Australia took the major step of introducing a carbon price, involving the creation of a system of emissions permits initially issued at a fixed price. Carbon Pricing brings together experts instrumental in the development, and operation, of A

Eurasian Economic Perspectives Sep 27 2019 This book presents selected papers from the 26th and 27th Eurasia Business and Economics Society (EBES) Conferences, held in Prague, Czech Republic, and Bali, Indonesia. While the theoretical and empirical papers gathered here cover diverse areas of economics and finance in various geographic regions, the main focus is on the latest research concerning banking and finance, as well as empirical studies on emerging economies and public economics. The book also includes studies on political economy and regional studies.
