British National Formulary Aug 28 2019

World Wide Research Jun 18 2021 Advances in information and communication technology are transforming the way scholarly research is conducted across all disciplines. The use of increasingly powerful and versatile computer-based and networked systems promises to change research activity as profoundly as the mobile phone, the Internet, and email have changed everyday life. This book offers a comprehensive and accessible view of the use of these new approaches--called "e-Research"--and their ethical, legal, and institutional implications. The contributors, leading scholars from a range of disciplines, focus on how e-Research is reshaping not only how research is done but also, and more important, its outcomes. By anchoring their discussion in specific examples and case studies, they identify and analyze a promising set of practical developments and results associated with e-Research innovations. The contributors, who include Geoffrey Bowker, Christine Borgman, Paul Edwards, Tim Berners-Lee, and Hal Abelson, explain why and how e-Research activity can reconfigure access to networks of information, expertise, and experience, changing what researchers observe, with whom they collaborate, how they share information, what methods they use to report their findings, and what knowledge is required to do this. They discuss both the means of e-Research (new research-centered computational networks) and its purpose (to improve the quality of world-wide research). William H. Dutton is Director of the Oxford Internet Institute, Professor of Internet Studies, and Professorial Fellow of Balliol College at the University of Oxford. Paul W. Jeffreys, formerly Director of the Oxford e-Research Centre, is Director of IT at the University of Oxford, Professor of Computing, and Professorial Fellow of Keble College at the University of Oxford. The hardcover edition does not include a dustjacket.

Deep Learning Nov 23 2021 An introduction to a broad range of topics in deep learning, covering mathematical and conceptual background, deep learning techniques used in industry, and research perspectives. "Written by three experts in the field, Deep Learning is the only comprehensive book on the subject." —Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX Deep learning is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. Deep Learning can be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. A website offers supplementary material for both readers and instructors.

On Beckett Jul 08 2020 This book is a double first - the first collection together of all of Badiou's work on Beckett, and the first translation of this important material. Badiou presents a Beckett whose work is the work of philosophy itself - a philosophy in the full sense of the word, which works to reduce experience to its essential determinations. These essays together furnish a meditation on the developments of Beckett's ideas, always philosophically allusive, from first works through *The Unnameable* (a solipsist impasse, claims Badiou, from which it would take Beckett ten years to escape), to a final engagement with questions of the Other and Love.

Citation Release Oct 30 2019

The Science of Subjective Well-Being May 06 2020 This authoritative volume reviews the breadth of current scientific knowledge on subjective well-being (SWB): its definition, causes and consequences, measurement, and practical applications that may help people become happier. Leading experts explore the connections between SWB and a range of intrapersonal and interpersonal phenomena, including personality, health, relationship satisfaction, wealth, cognitive processes, emotion regulation, religion, family life, school and work experiences, and culture. Interventions and practices that enhance SWB are examined, with attention to both their benefits and limitations. The concluding chapter from Ed Diener dispels common myths in the field and presents a thoughtful agenda for future research.

Transcultural Health Care Aug 09 2020 "Proceedings" or "Select minutes of meetings" are included in each volume (except v. 3, 12).

The Future of the Book Apr 28 2022 A dozen essays from a July 1994 conference at the University of San Marino argue that a total shift to electronic information media would trigger wrenching social and cultural dislocations. Among their perspectives are the pragmatics of the new, farewell to the information age, toward meta-reading, hypertext and authorship, and the body of the text. They avoid the usual fetish arguments such as curling up in bed or leather bindings and pipes. Novelist Umberto Eco provides an afterward. No index or word search. Annotation copyright by Book News, Inc., Portland, OR

[The Oxford Book of Irish Short Stories](#) Jun 26 2019 Forty-five short stories that span the entire history of the Irish short story, feature works by such masters as James Joyce and Elizabeth Bowen, as well as new voices,

including Bernard McLaverty and Desmond Hogan.

Publication Manual of the American Psychological Association Sep 02 2022

Engendering Social Policy Dec 01 2019 Engendering Social Policy brings new and fresh perspectives to the question of how social policy constructs gendered social relations. With the restructuring of welfare firmly back on the political agenda, in the context of a reassertion that traditional families are the backbone of society, this book raises important issues for students, academics and practitioners grappling with social policy issues at the end of the millennium.

Game Play Feb 24 2022 The essential guide to game play therapy for mental health practitioners The revised and updated third edition of Game Play Therapy offers psychologists and psychiatrists a guide to game play therapy's theoretical foundations and contains the practical applications that are appropriate for children and adolescents. Game playing has proven to invoke more goal-directed behavior, has the benefit of interpersonal interaction, and can perform a significant role in the adaptation to one's environment. With contributions from noted experts in the field, the third edition contains information on the time-tested, classic games and the most recent innovations and advances in game play approaches. Game Play Therapy's revised third edition (like the previous editions) continues to fill a gap in the literature by offering mental health practitioners the information needed to understand why and how to use this intervention effectively. The contributors offer advice for choosing the most useful games from the more than 700 now available and describe the fundamentals of administering the games. This important updated book: Contains material on the recent advances in the field including information on electronic games and disorder-specific games Includes illustrative case studies that explore the process of game therapy Reviews the basics of the underlying principles and applications of game therapy Offers a wide-range of games with empirical evidence of the effectiveness of game therapy Written for psychologists, psychiatrists, and other mental health clinicians, the revised third edition of Game Play Therapy offers a guide that shows how to apply game therapy techniques to promote socialization, encourage the development of identity and self-esteem, and help individuals master anxiety.

The Story of English in 100 Words Oct 11 2020 The world's foremost expert on the English language takes us on an entertaining and eye-opening tour of the history of our vernacular through the ages. In *The Story of English in 100 Words*, an entertaining history of the world's most ubiquitous language, David Crystal draws on one hundred words that best illustrate the huge variety of sources, influences and events that have helped to shape our vernacular since the first definitively English word—'roe'—was written down on the femur of a roe deer in the fifth century. Featuring ancient words ('loaf'), cutting edge terms that reflect our world ('twittersphere'), indispensable words that shape our tongue ('and', 'what'), fanciful words ('fopdoodle') and even obscene expressions (the "c word"...), David Crystal takes readers on a tour of the winding byways of our language via the rude, the obscure and the downright surprising.

Citation Analysis in Research Evaluation Mar 04 2020 This book is written for members of the scholarly research community, and for persons involved in research evaluation and research policy. More specifically, it is directed towards the following four main groups of readers: - All scientists and scholars who have been or will be subjected to a quantitative assessment of research performance using citation analysis. - Research policy makers and managers who wish to become conversant with the basic features of citation analysis, and about its potentialities and limitations. - Members of peer review committees and other evaluators, who consider the use of citation analysis as a tool in their assessments. - Practitioners and students in the field of quantitative science and technology studies, informetrics, and library and information science. Citation analysis involves the construction and application of a series of indicators of the 'impact', 'influence' or 'quality' of scholarly work, derived from citation data, i.e. data on references cited in footnotes or bibliographies of scholarly research publications. Such indicators are applied both in the study of scholarly communication and in the assessment of research performance. The term 'scholarly' comprises all domains of science and scholarship, including not only those fields that are normally denoted as science - the natural and life sciences, mathematical and technical sciences - but also social sciences and humanities.

The Testaments Mar 28 2022

MLA Made Easy: Citation Basics for Beginners Jul 28 2019 A concise, handy guidebook for teaching correct MLA-style citation to middle and high school researchers.

MHRA Style Guide Feb 01 2020 Now in its second edition, the MHRA Style Guide is an indispensable tool for authors and editors of scholarly books, contributors to academic publications, and students preparing theses. The Style Guide succeeds the best-selling MHRA Style Book, five editions of which were published from 1971 to 1996. Though originally designed for use in connection with the publications of the Modern Humanities Research Association, the Style Book became a standard book of reference, particularly in the humanities, and has been adopted by many other authors, editors, and publishers. This new edition of the Style Guide has been revised and updated by a subcommittee of the MHRA. It provides comprehensive guidance on the preparation of copy for publication and gives clear and concise advice on such matters as spelling (including the spelling of proper names and the transliteration of Slavonic names), abbreviations, punctuation, the use of capitals and italics, dates and numbers, quotations, notes, and references. Chapters on indexing, the preparation of theses and dissertations, and proof correcting are also included

Corrosion in Reinforced Concrete Structures Jul 20 2021 Reinforced concrete has the potential to be very durable and capable of withstanding a variety of adverse environmental conditions. However, failures in the structures do still occur as a result of premature reinforcement corrosion. In this authoritative book the fundamental aspects of this complex process are analysed; focusing on corrosion of the reinforcing steel, and looking particularly, at new scientific and technological developments. Monitoring techniques, including the newly developed online-monitoring, are examined, as well as the numerical methods used to simulate corrosion and perform parameter studies. The influence of composition and microstructure of concrete on corrosion behaviour is explored. The second half of the book, which deals with corrosion prevention methods, starts with a discussion on stainless steels as reinforcement materials. There are comprehensive reviews of the use of surface treatments and coatings, of the application of corrosion inhibitors and of the application of electrochemical techniques. In each case the necessary scientific fundamentals are explained and practical instances of use are looked at. This is an invaluable guide for engineers, materials scientists and researchers in the field of structural concrete. Fundamental aspects of corrosion in concrete are analysed in detail Explores how to minimise the effects of corrosion in concrete Invaluable guide for engineers, materials scientists and researchers in the field of structural concrete

Effective Legal Research Apr 16 2021 Researching and tracing information is an essential skill that students need to master in order to succeed in their legal studies and future careers. This practical guide to effective legal research presents the information in a step-by-step format leading students through the world of legal research both in a law library and researching online

Writing Your Journal Article in Twelve Weeks Jan 02 2020 This book provides you with all the tools you need to write an excellent academic article and get it published.

School Safety May 18 2021 Each title in the highly acclaimed *Opposing Viewpoints* series explores a specific issue by placing expert opinions in a unique pro/con format; the viewpoints are selected from a wide range of highly respected and often hard-to-find publications.

A Columbus of Space Dec 25 2021 "A Columbus of Space" is dedicated to people who read Jules Verne and it is written in his style. The novel features an independent scientist who discovers the secret of "inter-atomic energy". He manages to build a spacecraft which carries him and his three friends to Venus, where they discover incredible floating cities.

The Education of a Graphic Designer Aug 21 2021 Revised and updated, this compelling collection of essays, interviews, and course syllabi is the ideal tool to help teachers and students keep up in the rapidly changing field of graphic design. Top designers and educators talk theory, offer proposals, discuss a wide range of educational concerns—such as theory versus practice, art versus commerce, and classicism versus

postmodernism—and consider topics such as emerging markets, shifts in conventions, global impact, and social innovation. Building on the foundation of the original book, the new essays address how graphic design has changed into an information-presenting, data-visualization, and storytelling field rooted in art and technology. The forward-thinking course syllabi are designed for the increasingly specialized needs of undergraduate and graduate students. Personal anecdotes from these designers about their own educations, their mentors, and their students make this an entertaining and illuminating idea book. The book features writing from: Lama Ajeenah, Roy R. Behrens, Andrew Blauvelt, Max Bruinsma, Chuck Byrne, Moira Cullen, Paula J. Curran, Louis Danziger, Liz Danzico, Meredith Davis, Sheila de Bretteville, Carla Diana, Johanna Drucker, Milton Glaser, Rob Giampietro, April Greiman, Sagi Haviv, Lorraine Justice, Jeffery Keedy, Julie Lasky, Warren Lehrer, Ellen Lupton, Victor Margolin, Andrea Marks, Katherine McCoy, Ellen McMahon, J. Abbott Miller, Sharyn O'Mara, Rick Poynor, Chris Pullman, Michael Rock, Katie Salen, Douglass Scott, Steven Skaggs, Virginia Smith, Kerri Steinberg, Gunnar Swanson, Ellen Mazur Thomson, Michael Vanderbyl, Veronique Vienne, Lorraine Wild, Richard Wilde, Judith Wilde, and Michael Worthington. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

Immunisation against infectious diseases Nov 11 2020 This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

Beyond Common Sense Oct 23 2021 Beyond Common Sense addresses the many important and controversial issues that arise from the use of psychological and social science in the courtroom. Each chapter identifies areas of scientific agreement and disagreement, and discusses how psychological science advances our understanding of human behavior beyond common sense. Features original chapters written by some of the leading experts in the field of psychology and law including Elizabeth Loftus, Saul Kassin, Faye Crosby, Alice Eagly, Gary Wells, Louise Fitzgerald, Craig Anderson, and Phoebe Ellsworth The 14 issues addressed include eyewitness identification, gender stereotypes, repressed memories, Affirmative Action and the death penalty Commentaries written by leading social science and law scholars discuss key legal and scientific themes that emerge from the science chapters and illustrate how psychological science is or can be used in the courts

The Maltreatment of Children Aug 01 2022 The maltreatment of children is an issue that has always been with us and civilized societies provide a range of services both social and medical to care for the children and families afflicted. In recent years, greater attention has been drawn to the medical aspects by competent authorities in the fields of forensic medicine, forensic psychiatry, epidemiological psychiatry, child psychiatry and family psychiatry; as well as the social aspects by those child welfare and child care agencies who have the difficult and distasteful task of removing children, with the help of the courts, from parents who can abuse them and are not able to care for them adequately. A multitude of social agencies, whose range of activities involve both the care and, where possible, the social betterment of afflicted families are now involved. Not least in importance is an increase in our global knowledge to help in the prevention or better treatment of these problems. This means more information on familial and genetic factors in human central nervous system development in its broadest sense. This would include how the central nervous system originates, mediates and controls the build up, speed of development and impulsive release, mastery and direction of aggressive drives and impulses. Very little is so far known about these factors.

MLA Style Manual and Guide to Scholarly Publishing Jan 26 2022 Provides information on stylistic aspects of research papers, theses, and dissertations, including sections on writing fundamentals, MLA documentation style, and copyright law

Digital Literacies for Learning Jun 30 2022 In the 21st century, digital tools enable information to be generated faster and in greater profusion than ever before, to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools, and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching, and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered, but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists, to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged, and new literacies, including information literacy and IT literacy, need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate, and Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky, provides the foreword. The book is in two parts: In Part 1, Literacies in the Digital Age, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed, and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment. In Part 2, Enabling and Supporting Digital Literacies, the contributors go on to consider the ways in which digital literacies can be made available to learners, and how these literacies are being relocated in a more student-centred environment within the broader perspective of learning. Readership: This book takes the issues raised in the successful Information and IT Literacy, also co-edited by Allan Martin, into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age.

Fratelli Tutti Mar 16 2021

Cite Them Right Sep 21 2021 This book is renowned as the most comprehensive yet easy-to-use guide to referencing available. Tutors rely on the advice to guide their students in the skills of identifying and referencing information sources and avoiding plagiarism. This new edition has new and expanded content, especially in relation to latest electronic sources.

A New Companion to Malory Sep 29 2019 A comprehensive survey of one of the most important texts of the Middle Ages.

Nursing Law and Ethics Sep 09 2020 Nursing Law and Ethics explores a variety of key legal and ethical issues in nursing practice using a thought-provoking and holistic approach. It addresses both what the law requires and what is right, and explores whether these two are always the same. The book provides an overview of the legal, ethical and professional dimensions of nursing, followed by exploration of key issues in greater depth. This edition features updated legislation and new material on patient safety. Key topics are accompanied by both a legal and an ethical perspective, covering both law and ethics Case examples throughout place concepts in a real-life context Written by experts in the field and includes contributions from leading nurses, lawyers and ethicists Accessible, relevant, and comprehensive, this title is ideal for pre- and post-registration nurses.

Evidence-Based Management of Low Back Pain - E-Book Dec 13 2020 Covering all commonly used interventions for acute and chronic low back pain conditions, Evidence-Based Management of Low Back Pain consolidates current scientific studies and research evidence into a single, practical resource. Its multidisciplinary approach covers a wide scope of treatments from manual therapies to medical interventions to surgery,

organizing interventions from least to most invasive. Editors Simon Dagenais and Scott Haldeman, along with expert contributors from a variety of clinical and academic institutions throughout the world, focus on the best available scientific evidence, summarizing the results from the strongest to the weakest types of studies. No other book makes it so easy to compare the different interventions and treatment approaches, giving you the tools to make better, more informed clinical decisions. A multidisciplinary approach covers treatments from manual therapies to medical interventions to surgery, and many others in between. An interdisciplinary approach enables health care providers to work together. A logical, easy-to-follow organization covers information by intervention type, from least invasive to most invasive. Integration of interventions provides information in a clinically useful way, so it's easier to consider more than one type of treatment or intervention for low back pain, and easier to see which methods should be tried first. 155 illustrations include x-rays, photos, and drawings. Tables and boxes summarize key information. Evidence-based content allows you to make clinical decisions based on the ranking the best available scientific studies from strongest to weakest. Patient history and examination chapters help in assessing the patient's condition and in ruling out serious pathology before making decisions about specific interventions. Experienced editors and contributors are proven authors, researchers, and teachers, and practitioners, well known in the areas of orthopedics, pain management, chiropractic, physical therapy, and behavioral medicine as well as complementary and alternative medicine; the book's contributors include some of the leading clinical and research experts in the field of low back pain. Coverage based on The Spine Journal special issue on low back pain ensures that topics are relevant and up to date. A systematic review of interventions for low back pain includes these categories: patient education, exercise and rehabilitation, medications, manual therapy, physical modalities, complementary and alternative medicine, behavioral modification, injections, minimally invasive procedures, and surgery. Surgical interventions include decompression, fusion, disc arthroplasty, and dynamic stabilization. Additional coverage includes patient education and multidisciplinary rehabilitation.

The Cast of Character Apr 04 2020 Well before Aristotle's Rhetoric elucidated the elements of verbal style that give writing its persuasive power, Greek poets and prose authors understood the importance of style in creating compelling characters to engage an audience. And because their works were composed in predominantly oral settings, their sense of style included not only the characters' manner of speaking, but also their appearance and deportment. From Homeric epic to classical tragedy and oratory, verbal and visual cues work hand-in-hand to create distinctive styles for literary characters. In this book, Nancy Worman investigates the development and evolution of ideas about style in archaic and classical literature through a study of representations of Odysseus and Helen. She demonstrates that, as liars and imitators, pleasing storytellers, and adept users of costume, these two figures are especially skillful manipulators of style. In tracing the way literary representations of them changed through time—from Homer's positive portrayal of their subtle self-presentations to the sharply polarized portrayals of these same subtleties in classical tragedy and oratory—Worman also uncovers a nascent awareness among the Greek writers that style may be used not only to persuade but also to distract and deceive.

Publication Manual of the American Psychological Association Nov 04 2022 The Publication Manual of the American Psychological Association is the style manual of choice for writers, editors, students, and educators in the social and behavioral sciences, nursing, education, business, and related disciplines.

Architecture and Participation Feb 12 2021 Bringing together leading international practitioners and theorists in the field, ranging from the 1960s pioneers of participation to some of the major contemporary figures in the field, Architecture and Participation opens up the social and political aspects of our built environment, and the way that the eventual users may shape it. Divided into three sections, looking at the politics, histories and practices of participation, the book gives both a broad theoretical background and more direct examples of participation in practice. Respectively the book explores participation's broader context, outlining key themes and including work from some seminal European figures and shows examples of how leading practitioners have put their ideas into action. Illustrated throughout, the authors present to students, practitioners and policy makers an exploration of how a participative approach may lead to new spatial conditions, as well as to new types of architectural practices, and investigates the way that the user has been included in the design process.
