Lightweight Electric/Hybrid Vehicle Design Mar 05 2020 Lightweight Electric/Hybrid Vehicle Design, covers the particular automotive design approach required for hybrid/electrical drive vehicles. There is currently huge investment world-wide in electric vehicle propulsion, driven by concern for pollution control and depleting oil resources. The radically different design demands of these new vehicles requires a completely new approach that is covered comprehensively in this book. The book explores the rather dramatic departures in structural configuration necessary for purpose-designed electric vehicle including weight removal in the mechanical systems. It also provides a comprehensive review of the design process in the electric hybrid drive and energy storage systems. Ideal for automotive engineering students and professionals Lightweight Electric/Hybrid Vehicle Design provides a complete introduction to this important new sector of the industry. comprehensive coverage of all design aspects of electric/hybrid cars in a single volume packed with case studies and applications in-depth treatment written in a text book style (rather than a theoretical specialist text style)

Automotive Computer Controlled Systems Apr 17 2021 'Automotive Computer Controlled Systems' explains the fundamental principles of engineering that lie behind the operation of vehicle electronic systems. Having obtained this knowledge, the reader will be able to make full use of the diagnostic equipment which is currently available. The book builds on the concepts contained in Vehicle Electronic Systems and Fault Diagnosis and gives clear steps to fault diagnosis and subsequent repair of the vehicle's electronic systems. The author discusses electronics only within the context of the vehicle systems under consideration, and thus keeps theory to a minimum. Allan Bonnick has written articles for several transport/vehicle journals and carries out consultancy work for the Institute of Road Transport Engineers. In addition, he has had many years teaching experience and is ideally placed to write this informative guide.

Mass Affluence Jul 21 2021 This is the first book to explain how the fundamentals of marketing strategy must change in response to this broad-based increase in wealth The authors specifically addresses how to fine tune a mass marketing approach that captures the value created from greater consumer affluence. After years of expensive and largely ineffective attempts at one-to-one marketing and other complex varieties of microsegmentation, the business environment is ripe for a switch back to the relative simplicity of a mass marketing mindset Flouts conventional wisdom: the authors in-depth research uncovered that today's moneyed masses are completely different than the mass market of decades past in terms of how much they have to spend and what they are willing to spend it on. Reveals the mass marketing strategies a range of companies have already successfully used to hit pay dirt with products ranging from oral care to laundry detergent to exotic automobiles.

Enriching Production Sep 30 2019 This text aims to present and discuss the innovative Volvo Uddevalla plant, comparing it to other plants - Japanese lean ones and others. The starting point for the book is Volvo's dramatic decision to close its Uddevalla and Kalmar plants, and the debate that followed this decision, both in Sweden and abroad. Both plants were pioneers of the possibilities to unite productivity and the good work, but, following the announcement of their closure, researchers and practitioners in the field of industrial organization from many countries asked why they closed, how they compared with other production concepts, and whether we now see an end of an alternative to Japanese lean production.
