Breast Pathology, An Issue of Surgical Pathology Clinics Jun 01 2020 This issue of Surgical Pathology Clinics, edited by Dr. Laura C. Collins, will focus on Breast Pathology. Topics include, but are not limited to: Core needle biopsy of the breast, Mucinous Lesions of the Breast: Pragmatic approach to fibroepithelial lesions; Lymph node inclusions; Differential diagnosis of benign spindle cell lesions of the breast; Ancillary Prognostic and Predictive Testing in Breast Cancer; Lesions of the Low Grade Breast Neoplasia Pathway; Genotype-Phenotype Correlation in Breast Neoplasia; Lobular Carcinoma in Situ; and Processing and Reporting of Breast Specimens in the Neoadjuvant Setting.

Trade Policy between Law, Diplomacy and Scholarship Jul 14 2021 This book presents 22 topical contributions on international trade law and policy, with a particular focus on EU external trade law, addressing countries ranging from Ukraine to Switzerland and the US (TTIP) and aspects from trade and IPRs to anti-dumping. The volume constitutes a state-of-the-art treatment of the many facets of trade policy in the 21st century from legal, diplomatic and academic standpoints. The book is dedicated to the memory of Horst Günter Krenzler, former Director General for External Relations for the European Commission and Chief Negotiator for the European Union in many trade negotiations, honorary professor of European Union law at the University of Munich and an of counsel with Freshfields' Brussels office after retirement from the Commission.

Oxford Textbook of Neurological Surgery Jul 02 2020 Neurosurgery is a rapidly developing and technically demanding branch of surgery that requires a detailed knowledge of the basic neuro-sciences and a thorough clinical approach. The Oxford Textbook of Neurological Surgery is an up-to-date, objective and readable text that covers the full scope of neurosurgical practice. It is part of the Oxford Textbooks in Surgery series, edited by Professor Sir Peter Morris. The book is split into 20 overarching sections (Principles of Neurosurgery, Neuro-oncology of Intrinsic Tumours; Extra-axial Tumours and Skull Lesions; Cerebro-Pontine Angle Tumours; Sellar and Supra-Sellar Tumours; Posterior Fossa Tumours; Pineal tumours; Uncommon Tumours and Tumour Syndromes; Neurotrauma and Intensive Care; Vascular Neurosurgery; Principles of Spinal Surgery; Spinal Pathology; Spinal Trauma; Peripheral Nerve Surgery; Functional Neurosurgery; Epilepsy; Paediatric Neurosurgery; Neurosurgery for Cerebrospinal Fluid Disorders and Neurosurgical Infection). Each section takes a dual approach with 'Generic Surgical Management' chapters that focus on specific clinical problems facing the neurosurgeon (e.g. sellar/supra-sellar tumour, Intradural Spina Tumours etc.) and 'Pathology-Specific' chapters (e.g. Glioma, Meningeal Tumours, Scoliosis and Spinal Deformity, Aneurysm etc.). Where appropriate, this division provides the reader with easily accessible information for both clinical problems which present in a regional fashion and specific pathologies. The generic chapters cover aspects such as operative approaches, neuroanatomy and nuances. Specifically each chapter in the book incorporates several strands. Firstly the fundamental neuroscience (anatomy, pathology, genetics etc.) that underlies the clinical practice. Secondly, a review of the requisite clinical investigations (e.g. angiography, electrodiagnostics, radiology). Thirdly, a thorough evidence based review of clinical practice. Following this a consideration of the key debates and controversies in the field with 'pro-' and 'con-' sections (e.g. minimally invasive spine surgery, microsurgical treatment of aneurysms) is provided. A summary of the key papers and clinical scales relevant to neurosurgery form the concluding part. The book is a 'one-stop' text for trainees and consultants in neurosurgery, residents, those preparing for sub-specialty exams and other professionals allied to surgery who need to gain an understanding of the field. It acts as both a point of reference to provide a focussed refresher for the experienced neurosurgeon as well as a trusted training resource.

Japan's Official Development Assistance White Paper Oct 25 2019

Engineering Geology for Society and Territory - Volume 7 May 24 2022 This book is one out of 8 IAEG XII Congress volumes and deals with education and the professional ethics, which scientists, regulators and practitioners of engineering geology inevitably have to face through the purposes, methods, limitations and findings of their works. This volume presents contributions on the professional responsibilities of engineering geologists; the interaction of engineering geologists with other professionals; recognition of the engineering geological profession and its particular contribution to society, culture, and economy and implications for the education of engineering geologists at tertiary level and in further education schemes. Issues treated in this volume are: the position of engineering geology within the geo-engineering profession; professional ethics and communication; resource use and re-use; managing risk in a litigious world; engineering and geological responsibility and engineering geology at tertiary level. The Engineering Geology for Society and Territory volumes of the IAEG XII Congress held in Torino from September 15-19, 2014, analyze the dynamic role of engineering geology in our changing world and build on the four main themes of the congress: Environment, processes, issues and approaches. The congress topics and subject areas of the 8 IAEG XII Congress volumes are: Climate Change and Engineering Geology. Landslide Processes. River Basins, Reservoir Sedimentation and Water Resources. Marine and Coastal Processes. Urban Geology, Sustainable Planning and Landscape Exploitation. Applied Geology for Major Engineering Projects. Education, Professional Ethics and Public Recognition of Engineering Geology. Preservation of Cultural Heritage.

Did the Millennium Development Goals Work? Nov 25 2019 The Millennium Development Goals set by the United Nations were deliberately ambitious, and they've been the subject of much debate. Now, with the 2015 target date for many of the goals having passed, it's time to assess the goals and attempt to determine whether they were effective. Gathering leading scholars from a range of backgrounds and regions, this book offers an in-depth exploration of that question, with the aim of better understanding the effects of the Millennium Development Goals and learning from them for future policy decisions.

The Annual Practice Mar 10 2021 A collection of the statutes, orders, and rules relating to the general practice, procedure and jurisdiction of the Supreme Court.

The Handbook of Economic Development and Institutions Sep 04 2020 "The essential role institutions play in understanding economic development has long been recognised and has been closely studied across the social sciences but some of the most high profile work has been done by economists many of whom are included in this collection covering a wide range of topics including the relationship between institutions and growth, educational systems, the role of the media and the intersection between traditional systems of patronage and political institutions. Each chapter covers the frontier research in its area and points to new areas of research and is the product of extensive workshopping and editing. The editors have also written an excellent introduction which brings together the key themes of the handbook. The list of contributors is stellar (Steven Durlauf, Throsten Beck, Bob Allen, and includes a diverse mix of Western and non Western, male and female scholars)"

General Defences in Criminal Law Jun 13 2021 The law relating to general defences is one of the most important areas in the criminal law, yet the current state of the law in the United Kingdom reveals significant problems in the adoption of a consistent approach to their doctrinal and theoretical underpinnings, as exemplified by a number of recent developments in legislation and case law. A coherent and joined-up approach is still missing. This volume provides an analysis of the main contentious areas in British law, and proposes ways forward for reform. The collection includes contributions from leading experts across various jurisdictions. Part I examines the law in the United Kingdom, with specialist contributions on Irish and Scottish law. Part II consists of contributions by authors from a number of foreign jurisdictions, all written to a common research grid for maximum comparability, which provide a wider background of how other legal systems treat problems relating to general defences in the context of the criminal law, and which may serve as points of reference for domestic law reform.

Understanding Normal and Clinical Nutrition Jun 20 2019 This updated 12th Edition of UNDERSTANDING NORMAL AND CLINICAL NUTRITION presents the fundamentals of nutrition and nutrition therapy along with their practical applications to daily life and clinical settings. Starting with normal nutrition, the authors introduce nutrients and their physiological impacts, as well as nutritional guidelines for good health and disease prevention. Coverage of clinical nutrition includes the latest information on pathophysiology and dietary changes for treating a variety of medical conditions, from obesity and pregnancy to cardiovascular diseases, diabetes, and HIV. Known for a consistent and student-friendly narrative, the book includes systematic "How To" discussions, clinical case studies, review questions, and in-depth "Highlight" sections to help students master key topics, Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Psychological Governance and Public Policy May 12 2021 There have been significant developments in the state of psychological, neuroscientific and behavioural scientific knowledge relating to the human mind, brain, action and decision-making over the past two decades. These developments have influenced public policy making and popular culture in the UK and elsewhere – through policies and emerging social practices focussed on behavioural change, happiness, wellbeing, therapy, resilience and character. Yet little attention has been paid to examining the wider political and ethical significance of the widespread use of psychological governance techniques. There is a pressing and recognised need to address the behaviour change agenda in relation to how our cultural ideas about the brain, mind, behaviour and self are changing. This book provides a critical account of existing forms of psychological governance in relation to public policy. It asks whether we can speak of a co-ordinated and novel shift in governance or, rather, whether these trends are more simply pragmatic policy tools based on advances in scientific evidence. With contributions from leading scholars across the social sciences from the UK, the USA and Canada, chapters identify practical, political and research challenges posed by the current policy enthusiasm for particular branches of affective neuroscience, behavioural economics, positive psychology and happiness economics. The core focus of this book is to investigate the ways in which knowledge about the mind, brain and behaviour has informed the methods and techniques of governance and to explore the implications of this for shaping citizen identity and social practice. This groundbreaking book will be of interest to students, scholars and policy-makers interested and working within geography, economics, sociology, psychology, politics and cultural studies.

Ischemic Stroke Therapeutics Dec 27 2019 This complete resource captures state-of-the-art strategies and the accelerated pace of discovery that is revolutionizing what is known about ischemic stroke and its treatment. Therapeutics for acute management, secondary prevention, recovery, rehabilitation, asymptomatic cerebral ischemia, and implementation of stroke systems of care are all discussed in this comprehensive yet practical guide. Chapters are authored by leading academicians with extensive clinical practice experience from all over the world and feature the scientific evidence behind prevailing therapeutic strategies for managing ischemic cerebrovascular disease. The specialist or general practitioner will gain critical knowledge in stroke management, current clinical challenges and promising new therapies under investigation.

Oswaal CBSE Sample Question Papers Class 11 Accountancy (For 2023 Exam) Jul 22 2019 This product covers the following: • 10 Sample Papers-5 Solved & 5 Self-Assessment Papers strictly designed as per the latest CBSE Syllabus • On-Tips Notes & Revision Notes for Quick Revision • Mind Maps & Mnemonics with 500+concepts for better learning • 200+MCQs & Objective Type Questions for practice • Expert Answering Tips to score more in Exams

Fundamentals of Public Safety Networks and Critical Communications Systems Mar 30 2020 A timely overview of a complete spectrum of technologies specifically designed for public safety communications as well as their deployment as management In our increasingly disaster-prone world, the need to upgrade and better coordinate our public safety networks combined with successful communications is more critical than ever. Fundamentals of Public Safety Networks and Critical Communications Systems fills a gap in the literature by providing a book that reviews a comprehensive set of technologies, from most popular to the most advanced communications technologies that can be applied to public safety networks and mission-critical communications systems. The book explores the technical and economic feasibility, design, application, and sustainable operation management of these vital networks and systems. Written by a noted expert in the field, the book provides extensive coverage of systems, services, end-user devices, and applications of public-safety services and technologies. The author explores the potential for advanced public safety systems, and this comprehensive text covers all aspects of the public safety and critical communications network field. This important book: Provides an introduction to and discussion of the common characteristics of our critical communications systems Presents a review of narrowband technologies such as Project 25, TETRA, and DMR as well as the broadband technologies such as the LTE technology Focuses on the emerging technologies that can be adopted to improve our vital communications systems Discusses deployment of such technologies, including economics and finance, planning and project management Provides, in detail, the issues and solutions related to the management of such communications networks Offers a complete list of standards documents Written for professionals in the industry, academics, and government and regulatory agencies, Fundamentals of Public Safety Networks and Critical Communications Systems offers a review of the most significant safety technologies, explores the application for advanced technologies, and examines the most current research.

Muslim Democracy Apr 23 2022 Muslim Democracy explores the relationship between politics and religion in forty-seven Muslim-majority countries, focusing especially on those with democratic experience, such as Indonesia and Turkey, and drawing comparisons with their regional, non-Islamic counterparts. Unlike most studies of political Islam, this is a politically-focused book, more concerned with governing realities than ideology. By changing the terms of the debate from theology to politics, and including the full complement of Islamic countries, Schneier shows that the boundaries between church and state in the Islamic world are more variable and diverse than is commonly assumed. Through case studies and statistical comparisons between Muslim majority countries and their regional counterparts, Muslim Democracy shows that countries with different religions but similar histories are not markedly different in their levels of democratization. What many Islamists and western observers call "Islamic law," moreover, is more a political than a religious construct, with religion more the tool than the engine of politics. "Women who drive in Saudi Arabia," as the author says, "are not warned they will go to hell, but that they will go to jail." With the political salience of religion rising in many countries, this book is essential reading for students of comparative politics, religion, and democratization interested in exploring the shifting boundaries between faith and politics.

Policing Digital Crime Jan 08 2021 This timely volume offers a theoretical perspective on the policing of digital crime in the western world. Using numerous case-study examples to illustrate the theoretical material introduced this volume examine the organisational context for policing digital crime as well as crime prevention and detection. This work is a must-read for all academics, police practitioners and investigators working in the field of digital crime.

The Jurisdiction of the International Criminal Court Apr 30 2020 The book provides a holistic examination of the jurisdiction of the International Criminal Court (ICC). The main focus is placed on the three pillars which form the ICC's foundation pursuant to the Rome Statute: the preconditions to the exercise of its jurisdiction (Article 12 Rome Statute) the substantive competence, i.e. the core crimes (Article 5-8bis Rome Statute, i.e. genocide, crimes against humanity, war crimes, crime of aggression) the principle of complementarity (Article 17§1 (a) Rome Statute) The latter governs the ICC's 'ultimate jurisdiction', since it is not merely sufficient for a crime to be within the Court's jurisdiction (according to the substantive, geographical, personal and temporal jurisdictional criteria), but the State Party must also be unwilling or unable genuinely to carry out the investigation or prosecution. Finally yet importantly, the main 'negative preconditions' for the Court's jurisdiction, i.e. immunities (Article 27 Rome Statute) and exceptions via Security Council referrals are thoroughly examined. The book is an excellent resource for scholars as well as practitioners and notably contributes to the existing literature.

Treatment of Asthma in Older Adults Feb 21 2022 This comprehensive book presents an evidence-based approach to treating asthma in adults aged 65 and older, a vulnerable subset of patients who are more likely to experience higher morbidity and mortality rates, and often enduring higher financial burdens related to treatment. Treatment of Asthma in Older Adults: A Comprehensive, Evidence-Based Guide is a unique resource, providing an up-to-date review of medication strategies, how asthma phenotypes and treatment decisions interact, and how controlling asthma triggers impacts long-term asthma outcomes in older patients. Additionally, the book incorporates recent advances in alternative therapies that improve the patient's quality of life. Opening discussions address the unique challenges of the differential diagnosis of asthma in older adults, as well as an examination of the significant medical comorbidities that co-exist with asthma. Subsequent chapters provide strategies to optimizing asthma management in this specific population, including information on case management that will assist allied health providers. Finally, the book closes with an analysis of several novel targets for therapy to treat severe asthma including biologics, macrolides and bronchial thermoplasty. Written by experts in the field, Treatment of Asthma in Older Adults: A Comprehensive, Evidence-Based Guide is an indispensable resource for allergists, pulmonologists, family physicians, physician assistants, nurse practitioners and all other allied clinicians.

Textbook of Interventional Cardiology E-Book Oct 17 2021 Ideal for cardiologists, surgeons, and referring physicians who need a clinical guide to interventional procedures, *Textbook of Interventional Cardiology* focuses on the latest treatment protocols for managing heart disorders at every level of complexity. In this updated edition, Dr. Topol continues to bring together experts in the field who present the current state of knowledge and clinical practice in interventional cardiology, including cutting-edge theories, trends, and applications of diagnostic and interventional cardiology, as well as peripheral vascular techniques and practices. Offers an in-depth understanding of cardiology, making it well suited for cardiology and interventional cardiology exam preparation. Expert guidance from leading authorities ensures a fresh and balanced perspective on every aspect of interventional cardiology. Presents the most recent genetic information and clinical trials related to interventional cardiology. Highlights the latest treatment advances, procedures, devices, and techniques, including transcatheter aortic valve implantation (TAVI). Brand-new chapters include Radiation Safety, Renal Denervation for Resistant Hypertension, Post PCI Hospitalization, Length of Stay and Discharge Planning, and Interventional Heart Failure. Offers balanced coverage of the entire scope of technologies available, without favoring one particular device over another. Integrates the latest trial data into discussions on clinical practice and recommendations. Multiple images of devices and intra-procedural imaging enhance your visual understanding of the material. Key Points boxes at the beginning of each chapter summarize the most important facts.

Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition Jan 28 2020 Recently, technology and aging have been key research areas in human cognition. The Research Topic "Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition" investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance the cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles, focused on digital skills that enhance human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing—in educational, rehabilitation, clinical settings—across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a) research in human performance and human factors, b) new research and technologies addressing the needs of a growing populace, and c) cognitive aging and cognitive rehabilitation research.

Rift-lines Within European Regulatory Framework for Biosimilars when Taking Heterogeneity and Variation During Lifecycle of the Reference Biologic and the Biosimilar Into Account Jun 25 2022 Biopharmaceutical medicinal products (biologics) represent a huge financial market. Thus upon patent protection expiry of the innovator (reference) biologic there is interest from industry to gain a portion of this market by launching a 'similar' biologic at a reduced development cost, thus boosting potential gains. The EMA responded to this desire and lead the guidance process with industry on the topic of biosimilars. Based on the experience gained with biosimilars in the past, the EMA started to introduce a second generation series of guidance documents, which take into account the past, current and possibly future challenges of biosimilars. Those proposals were evaluated by EMA and partially incorporated into new guidance documents. This work highlights the challenges and risks associated with biosimilar submissions for large and complex bio-molecules such as antibodies. Results: There are unaddressed questions for the regulator with regard to the unsolved dynamic of heterogeneity and variations of the quality profile, which have potential implications on safety and efficacy. This is neglected and not taken into account seriously enough by the stakeholders. Solution: Further, the only (in my view) progressive way to deal with such foreseeable situations from the biosimilar developer's point of view is to incorporate a design space.

NDA 10 Years English & General Knowledge Topic Wise Solved Papers (2010-2019) Sep 28 2022 Whenever a student decides to prepare for any examination, her/his first and foremost curiosity is about the type of questions that he/she has to face. Keeping this in mind, we present before you this book containing date wise and shift wise all 10 years solved papers of NDA Paper - 2 with answer and solutions to majority of questions. Solutions to the questions are not just sketch rather have been written in such a manner that the students will be able to understand the application of concept and can answer some other related questions too. Salient features of the book are - Covers all 10 papers of NDA Paper - 2 Detailed Errorless Solutions for self-evaluation We firmly believe that the book in this form will definitely help a genuine, hardworking student for upcoming NDA Exam . We have tried our best to keep errors out of this book. Comment and criticism from readers will be highly appreciated and incorporated in the subsequent edition. We wish to utilize the opportunity to place on record our special thanks to all team members of Content Development for their efforts to make this wonderful book. Career Point Ltd.

Selected Papers from the 5th International Symposium on Mycotoxins and Toxigenic Moulds: Challenges and Perspectives Jan 20 2022 This book is a printed edition of the Special Issue "Selected Papers from the 5th International Symposium on Mycotoxins and Toxigenic Moulds: Challenges and Perspectives" that was published in *Toxins*

Central Pain Syndrome Feb 27 2020 This book sheds new light on central pain, a field that is largely obscured by lack of knowledge among pain professionals at all levels, including high-end pain centers. As a matter of fact, central pain, classified as a form of neuropathic pain, remains too often a scourge for those affected due to the ignorance of pain therapists worldwide and enduring misconceptions at the academic level. By weighing up the relevant evidence, the authors aim to remedy the situation by providing clear-cut, no-nonsense, unbiased and directly applicable clinical information. The clinically sound guidelines presented here are based on the authors' twenty years of treating patients and conducting research in the field. The book will be an invaluable guide for neurologists, neurosurgeons, anesthesiologists, pain therapists as well as physiotherapists.

Sharing Clinical Trial Data Nov 18 2021 Data sharing can accelerate new discoveries by avoiding duplicative trials, stimulating new ideas for research, and enabling the maximal scientific knowledge and benefits to be gained from the efforts of clinical trial participants and investigators. At the same time, sharing clinical trial data presents risks, burdens, and challenges. These include the need to protect the privacy and honor the consent of clinical trial participants; safeguard the legitimate economic interests of sponsors; and guard against invalid secondary analyses, which could undermine trust in clinical trials or otherwise harm public health. *Sharing Clinical Trial Data* presents activities and strategies for the responsible sharing of clinical trial data. With the goal of increasing scientific knowledge to lead to better therapies for patients, this book identifies guiding principles and makes recommendations to maximize the benefits and minimize risks. This report offers guidance on the types of clinical trial data available at different points in the process, the points in the process at which each type of data should be shared, methods for sharing data, what groups should have access to data, and future knowledge and infrastructure needs. Responsible sharing of clinical trial data will allow other investigators to replicate published findings and carry out additional analyses, strengthen the evidence base for regulatory and clinical decisions, and increase the scientific knowledge gained from investments by the funders of clinical trials. The recommendations of *Sharing Clinical Trial Data* will be useful both now and well into the future as improved sharing of data leads to a stronger evidence base for treatment. This book will be of interest to stakeholders across the spectrum of research—from funders, to researchers, to journals, to physicians, and ultimately, to patients.

DRHA2014 Proceedings / Full Papers Feb 09 2021

International Criminal Justice. Cooperation and fighting of male sexual crimes Aug 27 2022 Document from the year 2019 in the subject Law - European and International Law, Intellectual Properties, Tufts University, language: English, abstract: The focus of this book is the analysis of male sexual crimes in international criminal justice. The first part of the present research work is focused on the legal analysis of the relevant articles of international criminal court's Statute regarding the obligation of cooperation between states for the punishment of serious crimes against humanity and war. Judicial development, starting with the ad hoc tribunals and arriving at causes at various stages of proceedings still ongoing in the International Criminal Court (ICC), opens doctrinal and comparative national debates especially in the case of lacking states cooperation, seeking to elaborate specific topics such as the obligation of states cooperation, requests for assistance during preliminary investigations, during inquiries, and confidential information. Court assistance to states parties participating in the Statute, suspending the execution of a request, the role of the prosecutor and the non-assistance of some states impede the development and operation of international criminal justice. The second part has attempted to analyze sexual crimes and especially the crime of male rape. The jurisprudence of international criminal tribunals and the ICC have tried to qualify rape either as a crime of genocide in the form of serious and physical injuries, even if not necessarily permanent (lett.b) Art.6 of the Rome Statute; or as a crime against humanity where there are elements of context and above all material elements that emerge from the definitions given by the ad hoc tribunals and the elements of crimes; or even as a war crime in case it is implemented to that of sexual violence, according to a gender specific relationship to *speciem*. Judges through the jurisprudence have included in this context any conduct of a sexual type of aggression to human dignity that does not consist in an act of penetration and that does not involve physical contact. The contrasts are always open. Due to the lack of dealing with a "particular" crime and difficult to prove it or testify before an international court. The indication on the level of gravity of the crime is necessary for the relevance of sexual violence and rape as crimes against humanity that we will see in the coming years.

Applied Ethics in the Fractured State Oct 05 2020 This book brings together the refereed proceedings of the 24th Annual Conference of the Australian Association of Professional and Applied Ethics (AAPAE) 'Applied Ethics in the Fractured State', held at the Institute for Public Policy and Governance, University of Technology Sydney in June 2017.

White Paper on Crime Aug 15 2021

Parenting Matters Dec 07 2020 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Mountain Meadows Massacre Sep 23 2019 On September 11, 1857, a group of Mormons aided by Paiute Indians brutally murdered some 120 men, women, and children traveling through a remote region of southwestern Utah. Within weeks, news of the atrocity spread across the United States. But it took until 1874—seventeen years later—before a grand jury finally issued indictments against nine of the perpetrators. Mountain Meadows Massacre chronicles the prolonged legal battle to gain justice for the victims. The editors of this two-volume collection of documents have combed public and private manuscript collections from across the United States to reconstruct the complex legal proceedings that occurred in the massacre's aftermath. This exhaustively researched compilation covers a nearly forty-year history of investigation and prosecution—from the first reports of the massacre to the dismissal of the last indictment in 1896. Of special importance in Volume 2 are the transcripts of legal proceedings against John D. Lee—many of which the editors have transcribed anew from the shorthand. The two trials against Lee led to his confession, conviction, and ultimately his execution on the massacre site in 1877, all documented in this volume. Historians have long debated the circumstances surrounding the Mountain Meadows Massacre, one of the most disturbing and controversial events in American history, and painful questions linger to this day. This invaluable, exhaustively researched collection allows readers the opportunity to form their own conclusions about the forces behind this dark moment in western U.S. history.

Principles and Practice of Clinical Trials Jul 26 2022 This is a comprehensive major reference work for our SpringerReference program covering clinical trials. Although the core of the Work will focus on the design, analysis, and interpretation of scientific data from clinical trials, a broad spectrum of clinical trial application areas will be covered in detail. This is an important time to develop such a Work, as drug safety and efficacy emphasizes the Clinical Trials process. Because of an immense and growing international disease burden, pharmaceutical and biotechnology companies continue to develop new drugs. Clinical trials have also become extremely globalized in the past 15 years, with over 225,000 international trials ongoing at this point in time. Principles in Practice of Clinical Trials is truly an interdisciplinary that will be divided into the following areas: 1) Clinical Trials Basic Perspectives 2) Regulation and Oversight 3) Basic Trial Designs 4) Advanced Trial Designs 5) Analysis 6) Trial Publication 7) Topics Related Specific Populations and Legal Aspects of Clinical Trials The Work is designed to be comprised of 175 chapters and approximately 2500 pages. The Work will be oriented like many of our SpringerReference Handbooks, presenting detailed and comprehensive expository chapters on broad subjects. The Editors are major figures in the field of clinical trials, and both have written textbooks on the topic. There will also be a slate of 7-8 renowned associate editors that will edit individual sections of the Reference.

The Chinese Corporate Ecosystem Apr 11 2021 Challenging simplistic claims that Chinese corporations merely serve Communist Party goals, this book argues we cannot understand these corporations without tracing their dynamic evolution within a unique socio-political ecosystem. Vivid case studies illuminate the strange hybrid structures and networks that are essential for corporate success in the Chinese habitat. Tracing the reciprocal impacts between Chinese corporations and their environment, Colin S. C. Hawes reveals how corporations' political adaptations have raised serious obstacles for their international expansion and worsened China's environmental crisis. Adopting an interdisciplinary approach that synthesizes insights from behavioural economics, science and Chinese philosophy, this book proposes innovative solutions to the damaging impacts of Chinese corporations. It makes a compelling case for redirecting the vital energy of corporations and government officials in more productive and sustainable directions.

The Condor Trials Aug 23 2019 Stories of transnational terror and justice illuminate the past and present of South America's struggles for human rights. Through the voices of survivors, human rights activists, judicial actors, and experts, The Condor Trials unravels the secrets of transnational repression masterminded by South American dictators between 1969 and 1981. Under Operation Condor, the regimes of Argentina, Bolivia, Brazil, Chile, Paraguay, and Uruguay closely monitored hundreds of exiles and kidnapped, tortured, murdered, or forcibly returned them to their countries of origin. This cross-border network designed to silence opposition in exile transformed South America into a borderless zone of terror and impunity. Francesca Lessa shows how, gradually, transnational networks of activists materialized and effectively transcended national borders to achieve justice for the victims of these horrors. Based on extensive fieldwork, archival research, trial ethnography, and over 100 interviews, The Condor Trials explores South America's past and present and sheds light on ongoing struggles for justice as its societies come to terms with the unparalleled atrocities of their not-so-distant pasts.
