Camper's Guide to Southern California Aug 25 2019 Better than dry matches on a rainy night, this new edition locates and describes hundreds of marvelous camping opportunities and recreational activities. Featuring key campground features, facilities, and activities, this guide's 160 + maps take you right where you want to go. This edition is packed with maps and information on 87 state and national parks, lakes, beaches, forests, and recreation areas.

Guide to the Winterthur Library Jul 17 2021 This guide to the Joseph Downs Collection of Manuscripts and Printed Ephemera, named for Winterthur's first curator, provides descriptive information for the primary research material held in the collection. The Downs Collection acquires materials from the mid seventeenth century through the twentieth century that document American lifestyles, concentrating on the domestic scene and activities within the household and art. It includes such items as diaries, business accounts of craftsmen whose products decorated dwelling houses, family papers, tax records, construction of homes, artists' sketchbooks, wills and household inventories, children's toys and games, and scrapbooks and journals. Items from individuals famous in American history rest alongside materials from people who led routine lives yet still contributed to the development of America. An extensive microform collection, including copies of material owned by other public repositories and private individuals, supplements the manuscript holdings. Hardcover is un-jacketed.

Energy Tips Mar 13 2021 We are in a power crunch and you need help. It is not going to go away. Fuel costs, population increases, or the need to reduce air pollution will all keep us in a power hungry situation. Either we cannot afford it, can no longer breathe it, or there will not be enough. The purpose of this book is to ease the problem. Better start learning now. Experience is the best teacher, but you need help before you can acquire experience on your own. Next best is to benefit from another's experience. This book collects the relevant material from most of the authors' over 50 books. They were written for people who want to help themselves. Does that include you? This book contains over 50 years of ways we have used to conserve energy. We started early: The message of energy shortages to come wasn't widely publicized, although it's coming was announced and published in the 1950's. We hope that rolling blackouts are the most with which we will have to cope. In today's culture, even that is a minor disaster. Electricity is the hinge upon which our lives swing. Most of us can't even tell time without electricity, or when it comes back on, how do we reset the clocks? In fact, every floating automatic device in the house will need resetting. We depend upon electricity for all the niceties of living. What about the necessities? Food Preservation and Spoilage Heat Light- both to see and for security Water-. No hot water without electricity. City and Rural water is supplied by electric pumps. Enjoy air conditioning? A hot tub, Hot water? These are things we can live without if we must, although there are energy efficient ways to have these things. Otherwise, either the cost of having them or the need to use a minimum of electricity may make them unavailable. Solar Energy will heat your home and provide hot water. It will even heat a hot tub. We use what is in this book ALL the time.
