The Relationships Between Chronological Age, Length of Experience, and Job Performance Ratings of Air Route Traffic Control Specialists [May 31 2022](#)  
The Promise of Adolescence [Aug 02 2022](#) Adolescence "beginning with the onset of puberty and ending in the mid-20s" is a period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a positive trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence "rather than myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied, both to promote adolescent well-being, resilience, and development, and to address structural barriers and inequalities in opportunity, enabling all adolescents to flourish.  
Report of Activities [Aug 29 2019](#)  
[Adolescence and Emerging Adulthood](#) [Feb 13 2021](#) Helps students understand how culture impacts development in adolescence and emerging adulthood. Grounded in a global cultural perspective (within and outside of the US), this text enriches the discussion with historical context and an interdisciplinary approach, including studies from fields such as anthropology and sociology, in addition to the compelling psychological research on adolescent development. This book also takes into account the period of "emerging adulthood" (ages 18-25), a term coined by the author, and an area of study for which Arnett is a leading expert. Arnett's fifth edition with new and updated studies, both U.S. and international. With Pearson's MyDevelopmentLab Video Series and Powerpoints embedded with video, students can experience a true cross-cultural experience. A better teaching and learning experience-- for you and your students. Here's how: Personalize Learning - The new MyDevelopmentLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Improve Critical Thinking - Students learn to think critically about the influence of culture on development. Engage Students - Arnett engages students with cultural research and examples throughout. MyVirtualTeen, an interactive simulation, allows students to apply the concepts

learning to their own "virtual teen." Explore Research - "Research Focus" provides students with a firm grasp of various research methods and helps them see the impact that methods can have on research findings. Support Instructors - This program provides instructors with unbeatable resources, including video embedded PowerPoints and the new MyDevelopmentLab that includes cultural videos and MyVirtualTeen, an interactive simulation that allows you to raise a child from birth to age 18. An easy to use Instructor's Manual, a robust test bank, and an online test generator (MyTest) are also available. All of these materials may be packaged with the text upon request. Note: MyDevelopmentLab does not come automatically packaged with this text. To purchase MyDevelopmentLab, please visit: [www.mydevelopmentlab.com](http://www.mydevelopmentlab.com) or you can purchase a ValuePack of the text + MyDevelopmentLab (at an additional cost): ValuePack ISBN-10: 0205911854/ ValuePack ISBN-13: 9780205911851. Social Security Bulletin **Aug 10 2020**

The Age Between **Jul 01 2022** The Age Between presents a rational and comprehensive approach to the problems that adolescents face in our society. Dr. Derek Miller provides the needed therapeutic and social skills to help these individuals move into maturity. Miller explains that it is not enough to understand the child-rearing and maturational processes that affect the adolescent; it is equally important to recognize and appreciate the nature and structure of social organizations in which they function, particularly their home environment, including teacher-student and peer relationships.
