*Gifted Tongues* Jul 16 2021 Learning to argue and persuade in a highly competitive environment is only one aspect of life on a high-school debate team. Teenage debaters also participate in a distinct cultural world--complete with its own jargon and status system--in which they must negotiate complicated relationships with teammates, competitors, coaches, and parents as well as classmates outside the debating circuit. In Gifted Tongues, Gary Alan Fine offers a rich description of this world as a testing ground for both intellectual and emotional development, while seeking to understand adolescents as social actors. Considering the benefits and drawbacks of the debating experience, he also recommends ways of reshaping programs so that more high schools can use them to boost academic performance and foster specific skills in citizenship. Fine analyzes the training of debaters in rapid-fire speech, rules of logical argumentation, and the strategic use of evidence, and how this training instills the core values of such American institutions as law and politics. Debates, however, sometimes veer quickly from fine displays of logic to acts of immaturity--a reflection of the tensions experienced by young people learning to think as adults. Fine contributes to our understanding of teenage years by encouraging us not to view them as a distinct stage of development but rather a time in which young people draw from a toolkit of both childlike and adult behaviors. A well-designed debate program, he concludes, nurtures the intellect while providing a setting in which teens learn to make better behavioral choices, ones that will shape relationships in their personal, professional, and civic lives.

**Learning-Driven Schools** Sep 17 2021 Many teachers are trained to approach their work with a set of teaching strategies and lessons that changes little over time. Because they are focused on how they teach, rather than on how their students learn, they use the same techniques day after day, making no adjustments for students' different learning needs. In Learning-Driven Schools: A Practical Guide for Teachers and Principals, Barry Beers shows how teachers can plan, teach, and assess for student learning--and how principals can support teachers in their efforts. The book includes \* An overview of the research on knowledge retention; \* Real-life samples of lesson plans that address state and local standards; \* Strategies on accurately assessing student learning; \* Advice for teachers on addressing the needs of struggling, intermediate, and advanced students at the same time; and \* Advice for administrators on conducting effective classroom observations. A rallying cry and how-to guide rolled into one, this book is an invaluable resource for anyone passionate about learning. Having served as a veteran teacher and principal himself, Barry Beers brings his own experience and understanding to bear on the essential task of ensuring that student learning remains the clear focus of our schools.

**Death Waits in the Dark** Jan 10 2021 It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.
