Raiders from the Sea Nov 24 2021 The Special Boat Service was a small force during World War II, never more than about 300 men. But that did not stop it from inflicting great damage on the enemy. In the Mediterranean arena and in the Aegean, which the Germans controlled after the fall of Greece and Crete, this small commando force kept up a constant campaign of harassment, thus pinning down enemy forces and preventing their joining other fronts. They travelled by night to their targets, using submarines, small surface vessels or canoes, with the commanders of the vessels often putting themselves in danger in order to help the men carry out their dangerous and secret missions. They were reliant on the co-operation of the fiercely independent Greeks and in particular the Cretans, all working together in their common objective against the German invaders. John Lodwick took part in the SBS Mediterranean campaign and writes from personal experience with the panache and verve of the squadron itself. For it is more than the story of the remarkable men who made up the force: men such as Anders Lassen, 'the Dreadful Dane' who was awarded a posthumous VC, Fitzroy Maclean, Eric Newby, Jock Lapraik, and Lord Jellicoe, who commanded the squadron for almost two years and who contributed a memorable foreword to this memoir. Strong, determined individuals, together the men of the Special Boat Service formed a deadly, cohesive fighting force which contributed much to the war in the Mediterranean and to whom John Lodwick's book is an excitingly readable tribute.

The Archaeology of Vernacular Watercraft Oct 12 2020 This volume presents multiple idiographic, archaeological studies of vernacular watercraft from North America and the Caribbean. Rather than attempt to synthesize all vernacular types, this volume focuses on ship construction data recovered through archaeological investigations that has been used to make inferences about culture. This collection of case studies, including many examples from cultural resource management and graduate student theses, presents a thematic exploration of cultural adaptation as expressed through ship construction.

Diary of a U-Boat Commander Sep 30 2019 Captain Karl von Schenk of the Kaiser's Navy is a stereotypical German nobleman - supremely self-confident, touchy about the divisions of class and any infringement on his place. He thinks he is handsome, has a suitably manly physique, an excellent singing voice, and a facility with writing. His wartime service related in his diary is a series of triumphs over harrowing circumstances, bringing his boat back in spite of the best efforts of the Royal Navy to stop him. His one vulnerability is a young lady he meets on leave in Bruges, Belgium. Although she is the trophy girlfriend of a German colonel who could cause him much harm if he were to find out, von Schenk pursues his Zoe with Teutonic straightforwardness. And both he and the reader are entirely blind-sided by the unexpected thunderclap that puts an end to the sweet affair. Stephen King-Hall, a Royal Navy officer during the war and writing as "Etienne", penned this book as if he had simply discovered it on a surrendered submarine. In fact, some editions of the book list the author as "anonymous." King-Hall's knowledge of naval affairs lend authority to this yarn of men that go to the sea in ships that sink... on purpose.

SBS - Silent Warriors Jul 29 2019 THE SUNDAY TIMES BESTSELLER 'A terrific book ... It really is one of the most enjoyable histories I've read in many a year' JAMES HOLLAND 'Riveting ... A brilliant account' DAILY MAIL THE FIRST AUTHORISED HISTORY OF THE SBS. Britain's SBS - or Special Boat Service - was the world's first maritime special operations unit. Founded in the dark days of 1940, it started as a small and inexperienced outfit that leaned heavily on volunteers' raw courage and boyish enthusiasm. It went on to change the course of the Second World War - and has served as a model for special forces ever since. The fledgling unit's first mission was a daring beach reconnaissance of Rhodes in the spring of 1941. Over the next four years, the SBS and its affiliates would carry out many more spectacular operations in the Mediterranean, the Atlantic, the Channel and the Far East. These missions - including Operation Frankton, the daredevil attempt by the 'Cockleshell Heroes' to paddle up the Garonne river and sink Axis ships in Bordeaux harbour - were some of the most audacious and legendary of the war. Paddling flimsy canoes, and armed only with knives, pistols and a few sub-machine guns, this handful of brave and determined men operated deep behind enemy lines in the full knowledge that if caught they might be executed. Many were. Yet their many improbable achievements - destroying enemy ships and infrastructure, landing secret agents, tying up enemy forces, spreading fear and uncertainty, and, most importantly, preparing the ground for D-Day - helped to make an Allied victory possible. Written with the full cooperation of the modern SBS - the first time this ultra-secretive unit has given its seal of approval to any book - and exclusive access to its archives, SBS: Silent Warriors allows Britain's original special forces to emerge from the shadows and take their proper and deserved place in our island story.

SBS Dec 26 2021 The men of the SBS are the maritime equivalent of their counterparts in the SAS; they are the elite of the British Special Forces and also the most secretive. Although SAS activity has been extensively documented, the SBS has remained in the state it prefers - a shadowy silhouette, with identities protected and missions kept from public view. Formed during the Second World War, when they took part in many daring raids (one of which was filmed as The Cockleshell Heroes), they were active in the jungle campaigns in the Far East, in the Falklands, the Gulf War and Bosnia. Since this seminal book was published in 1997, John Parker has been privy to much more inside information about the SBS's original operations and he brings the book right up to date with accounts of their exploits in East Timor, Somalia, Sierra Leone, Kosovo and most recently in Iraq.

The Silent Service Oct 31 2019 One of the great untold stories of the British services is that of the Royal Navy Submarine Service which entered the fray in World War I with 100 underwater craft. Through World War II, where submariners' prospects of returning safely from a mission were only 50:50, the Falklands conflict and the sinking of the *Belgrano*, to present-day elite machines, the Silent Service has played an enormous part in British defence. John Parker's in-depth investigation is very much personality led with diaries from the early part of the century to substantial first-person testimony from survivors of wartime heroics (when many VCs were won).
