**AACN Procedure Manual for Critical Care** Sep 23 2019 AACN Procedure Manual for Critical Care offers comprehensive coverage of procedures unique to the critical care environment. This edition is thoroughly revised, updated, and expanded to reflect the current state of critical care nursing practice. Information is presented in a highly illustrated step-by-step format with supporting rationales for each step of every procedure. This resource also emphasizes evidence-based practice and provides complete coverage of the latest clinical studies. Each procedure is organized in a consistent, step-by-step format with categories that include: prerequisite nursing knowledge, equipment, patient and family education, patient assessment and preparation, procedure, expected outcomes, unexpected outcomes, patient monitoring and care, and documentation. Each procedure is supported by research-based data. Advanced practice procedures are noted with a special AP icon indicating that these procedures should be done only by qualified personnel. 19 new procedures discuss topics such as combitube insertion and removal, transesophageal echocardiography, and patient controlled analgesia. A new Quick Tips feature - located in the Special Considerations column for quick reference - highlights key words and key concepts for each procedure. A new web-enhanced feature at the beginning and end of each procedure directs readers to online supplement materials such as additional art and photographs. Web links connect users to hundreds of continually updated web sites that contain information relevant to critical care nursing practice. 200 new line drawings clearly illustrate important techniques and bring key procedures to life.

Edition. This in-depth nursing care planning guide features 31 detailed nursing diagnosis care plans and 63 disease/disorder care plans that are keyed to specific expected outcomes and interventions. With updated content and the most recent NANDA-I® nursing diagnoses, NIC® interventions, and NOC® outcomes, it reflects the latest nursing taxonomies and evidence-treatment protocols. The most in-depth care plans of any nursing care planning book foster clinical reasoning and promote effective clinical decision-making. 31 nursing diagnosis care plans provide detailed interventions with rationales and documentation guidelines for the most common NANDA-I® nursing diagnoses. 63 in-depth disease/disorder care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. UNIQUE! Care plan format with a focus on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiation between independent and collaborative nursing actions, provides a comprehensive and practical care planning tool. In-depth patient teaching content, with each disorder care plan, concluding with a "Deficient Knowledge" diagnosis with extensive discharge teaching information, serves as a guideline for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this growing population group. Nursing and collaborative diagnoses are linked to actions and rationales. Body system organization makes content easy to locate.
