The Unicorn's Shadow Nov 02 2020 Bringing hard data to the way we think about entrepreneurial success, this bold call to action draws on the latest scientific evidence to dispel the most pervasive startup myths and light a path to entrepreneurship for those eclipsed by the hype. When you think of a successful entrepreneur, who comes to mind? Bill Gates? Mark Zuckerberg? Or maybe even Jesse Eisenberg, the man who played Zuckerberg in The Social Network? It may surprise you that most successful founders look very different from Zuckerberg or Gates. In fact, most startup origin stories are very different from the famous "unicorns" that have achieved valuations of over \$1 billion, from Facebook to Google to Uber. In The Unicorn's Shadow: Combating the Dangerous Myths that Hold Back Startups, Founders, and Investors, Wharton School professor Ethan Mollick takes us to the forefront of an empirical revolution in entrepreneurship. New data and better research methods have overturned the conventional wisdom behind what a successful founder looks like, how they succeed, and how the startup ecosystem works. Among the issues he examines: Which founders are most likely to succeed? Where do the best startup ideas come from? What's the most foolproof way of securing the funding needed to take a company to the next level? Should your sales pitch really be something out of Hollywood? What's the best way to grow and scale your company and create a thriving culture that won't hinder expansion? Mollick argues that entrepreneurship is too important, both for society and for the individuals who start companies, to be eclipsed by the shadows of unicorns. He shows we can democratize entrepreneurship—but only by following an evidence-based approach that puts to rest the false narratives that surround it.

Nelson to Vanguard Nov 21 2019 Nelson to Vanguard is the third volume in D K Browns bestselling series on warship design and development looks at the Royal Navys response to the restrictions placed on it by the Washington Naval Treaties in the inter-war years, and analyses the fleet that was constructed to fight the Second World War. He focusses on the principal pre-war developments such as the first purpose-built aircraft carriers and the growing perception of the threat of air attack to warships. All the wartime construction programmes are covered, such as the massive expansion in escort ships to counter the U-boat menace, and the development of the amphibious warfare fleet for the D-Day landings in 1944. Full analysis is also provided of the experience of wartime damage, as well as the once top secret pre- and post-war damage trials. Illustrated throughout with a superb collection of contemporary photographs and numerous line drawings, this now classic work is required reading for naval historians and enthusiasts.

ABC of Servicing and Maintaining Your Honda Unicorn* Oct 25 2022 *You are probably reading this bit because you ride a bike and you want to know how it works. Or maybe you wish to learn a thing or two about motorcycle maintenance. Better still, you probably wish to attempt servicing and maintaining your bike, all by yourself (the DIY way). This is the book for you then. To most of us, motorcycle maintenance is cleaning the bike and taking it for a service frequently. But there is actually much more to it than cleaning and oiling. It involves performing a specific set of tasks that need to be carried according to a specific schedule. But any of this information is not readily available and is too technical for the regular bike owner. This book aims to provide all that necessary information in the most straightforward simple fashion. It has been written specifically to serve an absolute beginner to motorcycle maintenance and the whole Do It Yourself (DIY) ethic. This book tries not just to show how easy motorcycle maintenance is but also to show how much fun it actually can be.

Allied Aircraft of D-Day* Jun 21 2022 *The 1944 Allied invasion of France was a combined effort, with land- and sea-based forces supported by a huge aerial task force, which included legendary aircraft such as the Spitfire, Mosquito, Dakota and Mustang. The force comprised the RAF, its commonwealth allies and the USAAF, which resulted in an eclectic mix of gliders, heavy bombers, fighters, ground-attack aircraft and transport aeroplanes. Illustrated with over 170 color images of modern-day surviving and restored aircraft, this book features many of the aircraft types that were involved in the operations surrounding the Normandy invasion, including the aircraft that flew on D-Day itself.

Crisscross Aug 31 2020 Fast-moving police procedural set in political Washington, D.C., with two reluctant and incompatible homicide detectives becoming entangled in the nether world of abortion clinic bombers, radical plotters, bank scam artists and a host of other subterranean miscreants, all drawn to the nation's capital. Central to the tale is a mysterious wrought-iron swastika discovered by the detectives after the estranged wife of a Democratic congressman turns up dead. What, if anything, is its significance? The tale takes the reader from the grit and

grime of Washington's streets to the wilds of West Virginia and back, as the two mismatched detectives attempt to reconcile their deep differences and solve a murder at the same time.
