*The Organizational Learning Cycle* Dec 11 2020 *The Organizational Learning Cycle* was the first book to provide the theory that underpins organizational learning. Its sophisticated approach enabled readers to not only understand how, but more importantly why, organizations are able to learn. This new edition takes the original concepts and theories and shows how they might, and are, being put into action. With five new or completely revised chapters, Nancy Dixon describes the kind of infrastructure organizations need to put in place; there are examples of knowledge databases, whole systems in the room processes and after-action reviews originating from organizations that are making real progress with these ideas. A clearer relationship between organizational learning and more participative forms of organizational governance is drawn, along with responsibilities that employees need to take on to enable, and partake in, collective learning. With new case material from BP, the US Army, Ernst and Young, and the Bank of Montreal, for example, this book shows how you can make use of the collective reasoning, intelligence and knowledge of the organization and channel it into its ongoing and future development.

*Academic Films for the Classroom* Mar 14 2021 Exploring a realm of film often dismissed as campy or contrived, this book traces the history of classroom educational films from the silent era through the 1980s, when film finally began to lose ground to video-based and digital media. It profiles 35 individual academic filmmakers who played a role in bringing these roughly 100,000 16mm films to classrooms across North America, paying particular attention to auteur John Barnes and his largely neglected body of work. Other topics

include the production companies contributing to the growth and development of the academic film genre; the complex history of post-Sputnik, federally-funded educational initiatives which influenced the growth of the academic film genre; and the denouement of the genre in classrooms and its resurgence on the Internet.
