**CORPORATE CONFLICT MANAGEMENT** Sep 02 2022 The classic view on conflict has always been that conflict in any form is harmful and should be avoided at all cost. However, modern scholars and the corporate world at large are fast realizing that conflict is not as lethal as considered to be and if maintained within certain parameters, it can actually boost a company's growth. This text tells exactly how and when a conflict can be translated into a successful process and when it should be checked before it spells trouble for the company. The book covers cases from all the essential areas of conflict and analytically discusses every aspect while striking a clear balance between theory, concept and application. This book is an attempt to expose readers to varied perspectives, to challenge their individual positions and ideologies, and to inspire, inform and train them in the field. The volume is designed for the postgraduate students of management as well as those pursuing similar professional courses. Besides, professionals and anyone keen on learning the various aspects of conflict and its management will find this book immensely useful. **KEY FEATURES** ? Transcultural Realities Oct 30 2019 Transcultural Realities is an important collection of essays written by an outstanding cast of critical scholars who discuss the importance of transculture in interdisciplinary contexts. The primary goal of the contributors is to help the reader to understand that a state of "community" or "harmony" cannot be achieved in the world until we are all ready to accept different cultural forms, norms, and orientations. In this book, transculture is defined as a form of culture created not from within separate spheres, but in the holistic forms of diverse cultures. It is based on the principle that a single culture, in and of itself, is incomplete and requires interaction and dialogue with other cultures.

**School Leadership** Jul 08 2020 Recognizing the importance of good leadership to the achievement of educational excellence, the second edition of this handbook synthesizes a large body of school leadership literature and explores the subject from three perspectives: the person, the structure, and the skills. Part I examines characteristics of today's educational leaders; effective leadership styles and qualities; administrator training, hiring, and induction methods; and the scarcity of female and black school leaders. Part II looks at the organizational supports underlying school leadership. This section examines the balance of authority between the central office and the school site, the team approach to management, the decision-making context, and the components of school climate. Part III highlights leadership abilities needed by today's school administrators. Besides knowing how to manage the school's instructional program and staff, administrators must be able to communicate in today's more open, sharing organization; build coalitions of community groups; make meetings more productive; and manage time, stress, and conflict more effectively. Concerned about integrating theory with practice, the book offers many practical suggestions for using the information presented. Accompanying each chapter are extensive bibliographical references that appear at the end of the volume. (MLH)
