*Isotope Methods for Dating Old Groundwater* May 14 2021 This guidebook provides theoretical and practical information for using a variety of isotope tracers for dating "old" groundwater, i.e. water stored in geological formations for periods ranging from about 1000 to one million years. Theoretical underpinnings of the methods and guidelines for their use in different hydrogeological environments are described. The guidebook also presents a number of case studies providing insight into how various isotopes have been used in aquifers around the world. The methods, findings and conclusions presented in this publication will enable students and practicing groundwater scientists to evaluate the use of isotope dating tools for specific issues related to the assessment and management of groundwater resources. In addition, the guidebook will be of use to the scientific community interested in issues related to radioactive waste disposal in geological repositories.

**Chavin and the Origins of Andean Civilization** Sep 29 2022

This is the first detailed up-to-date account in English of Chavin and its precursors. Based on the author's intimate knowledge of unprecedented discoveries made over the past two decades, including his own excavations at Chavin and elsewhere, it places special emphasis on the unique character of early Andean civilization and the distinctive processes responsible for its development. A wealth of photographs, drawings and maps accompany the text, including for this expanded edition a new section of color plates.

**Engineering and Design** Oct 31 2022 This manual provides guidance on evaluating the condition of the concrete in a structure, relating the condition of the concrete to the underlying cause or causes of that condition, selecting an appropriate repair material and method for any deficiency found, and using the selected materials and methods to repair or rehabilitate the structure. Guidance is also included on maintenance of concrete and on preparation of concrete investigation reports for repair and rehabilitation projects. Considerations for certain specialized types of rehabilitation projects are also given.

**Women In The Cities Of Asia** Nov 27 2019 Women in Asia are on the move. The migration of women from village to city has increased dramatically in the past decade, and many of these new migrants are young single women seeking jobs. In several Asian countries, women migrants now outnumber men by a substantial margin. Along with the physical movement from rural to urban areas come new roles

*Bright Boulevards, Bold Dreams* Sep 17 2021 In *Bright Boulevards, Bold Dreams*, Donald Bogle tells—for the first time—the story of a place both mythic and real: Black Hollywood. Spanning sixty years, this deliciously entertaining history uncovers the audacious manner in which many blacks made a place for themselves in an industry that originally had no place for them. Through interviews and the personal recollections of Hollywood luminaries, Bogle pieces together a remarkable history that remains largely obscure to this day. We discover that Black Hollywood was a place distinct from the studio-system-dominated Tinseltown—a world unto itself, with unique rules and social hierarchy. It had its own talent scouts and media, its own

watering holes, elegant hotels, and fashionable nightspots, and of course its own glamorous and brilliant personalities. Along with famous actors including Bill “Bojangles” Robinson, Hattie McDaniel (whose home was among Hollywood’s most exquisite), and, later, the stunningly beautiful Lena Horne and the fabulously gifted Sammy Davis, Jr., we meet the likes of heartthrob James Edwards, whose promising career was derailed by whispers of an affair with Lana Turner, and the mysterious Madame Sul-Te-Wan, who shared a close lifelong friendship with pioneering director D. W. Griffith. But Bogle also looks at other members of the black community—from the white stars’ black servants, who had their own money and prestige, to gossip columnists, hairstylists, and architects—and at the world that grew up around them along Central Avenue, the Harlem of the West. In the tradition of Hortense Powdermaker’s classic *Hollywood: The Dream Factory* and Neal Gabler’s *An Empire of Their Own*, in *Bright Boulevards, Bold Dreams*, Donald Bogle re-creates a vanished world that left an indelible mark on Hollywood—and on all of America.

**Auditory Analysis and Perception of Speech** Oct 07 2020

*Auditory Analysis and Perception of Speech* documents the proceedings of a symposium on Auditory Analysis and Perception of Speech co-sponsored by the Academy of Sciences of the USSR and the Swedish Academy of Engineering Sciences, held in Leningrad, August 21-24, 1973. The purpose of the meeting was to advance the theory of speech perception in relation to auditory theory and speech signal models with some outlooks into the problem of automatic speech recognition. The book contains papers that were presented during the last three of the five sessions held. Session III on vowel perception includes studies on the variability of the code in connected speech; an auditory model of the perception of quasistationary vowels; and vowel processing at higher levels of the brain. Session IV on consonant perception includes papers that cover topics such as property detection.

**Voicing Modes** Jun 22 2019 Introduction. Modes are often at first understood in relation to a parent scale. While this can be helpful as a starting point and for developing muscle memory, in practice it doesn't always point the player to the right chord tones in relation to the sound. In other words, it doesn't help make the changes. To use modes to make the changes, one must be able to relate the scale shape to a chord voicing - a chord voicing that outlines the essential few tones in a sea of seven notes. These voicings can vary depending on the amount of color desired. The color desired is dependent on musical style/genre, and whether or not the chord is functional in a progression or static in its modality. These essential tones are not always 1,3,5,7 (tertian harmony - stacked in 3rds). While most chords in jazz and improv-based music are expressed in one of four tertian-voicing archetypes (Major, Minor, Dominant, or Diminished) - this is a false tetrachotomy. There are more than four. To capture some other sounds that many composers intend, especially in compositions written in the last 50 years (and in Classical music, 150 years) one must add a few other archetypes. While those indicated in this book are not exhaustive, they will open your ears to other ways of expressing harmony while still staying true to the key center. While exploring other ways to voice the modes, keep in mind that these are not just for comping and soloing. Feel free to use them as a starting point for composition and reharmonization. The use of "pivot voicings" instead of just pivot chords can open up your understanding of harmonic relationships in multiple ways. Enjoy exploring. -Noel P. S. This book is way more fun if you use a looper pedal. Second edition notes: Typo corrections, clarifications, TAB added to all etudes Third edition notes: Additional etudes, expanded modal subs section, added blues chapter More more info, charts, videos, and free web app: <http://noeljohnston.com/voicingmodes.ph>

**SEBS 30 Root Development and Function** Jun 14 2021 First published in 1987 this book looks at root development and functions. Besides affecting the development of roots directly, the physical environment also influences the organisms associated with roots and thus affects their function. The papers presented in this volume pay equal attention to root development and root function in relation to the whole range of environmental factors including temperature, light, water, aeration, gravity and the mechanical strength of the soil. Consideration is also given to the effects of some of these factors on mycorrhizae and nitrogen-fixing bacteria. The final chapter reviews some of the main themes raised in the volume and indicates the way that research at the cellular and tissue levels may progress in the future.

Isotope Hydrology Aug 05 2020 Within the realm of the newly evolving discipline of environmental sciences, the stable-isotope methodology is being used to an ever-increasing extent, especially in the study of the water cycle and of paleo-climatology. This book introduces the rules of the game, by reviewing the natural variability of stable isotopes in the hydrosphere, describing the physico-chemical basis of isotope fractionation, and applying this knowledge to natural waters as they move through the hydrologic cycle from the ocean to the atmosphere, the biosphere and the lithosphere. There is a special focus on the processes at the surface?atmosphere and land?biosphere?atmosphere interfaces, since these are the sites of major changes in isotope composition. In response to the increasing awareness of our changing climate, a discussion on the global view of the changing water cycle, in the past and future, winds up the presentation.
