From Them to Us Oct 09 2020 Inclusive education has become a phrase with international currency shaping the content of conferences and national educational policies around the world. But what does it mean? Is it about including a special group of disabled learners or students seen to have 'special needs' (them) or is it concerned with making educational institutions inclusive, responsive to the diversity of all their students (us)? In this unique comparative study, the editors have brought together an international team of researchers from eight countries to develop case-studies which explore the processes of inclusion and exclusion within a school or group of schools set in its local and national context. The study includes classroom observation, the experiences of the school day of students and interviews with staff, students, parents and school governors. Through an innovative juxtaposition of the case-studies and commentaries on them, differences of perspective within and between countries are revealed and analysed. The study arose from a dissatisfaction with previous research, which presents 'national perspectives' or seeks findings that have global significance. This book avoids such simplification and draws attention to the problems of translation of practice across cultures. The editors start from an assumption of diversity of perspective which like the diversity of students within schools can be viewed as problematic or as a resource to be recognized and celebrated.

Reimagining Special Education Mar 02 2020 "As the COVID-19 era continues to expose inequities, inefficiencies, and areas of need across our education system, leaders and educators have a unique opportunity to press pause and reimagine school. Now is the time to take the lessons of 2020 and turn them into action: by closely examining the "old ways," letting go of practices that don't serve students, and creating new routines and environments that meet the needs of every learner. Education professionals need to investigate critical questions: Which established routines and practices have always worked in school? Did those practices really work for all students? What hasn't worked so well? What would it look like to rethink school in a way that eliminates practices that keep some students struggling while others thrive? Explore the answers to these questions--and more--in this forthcoming release, a visionary guide to the reimagined school from inclusion experts Jenna Rufo, Ed.D., and Julie Causton, Ph.D"--

Lesson Study in Inclusive Educational Settings Dec 11 2020 Lesson Study has been shown to be a systematic way of building teachers' knowledge by allowing them to share their knowledge with each other. While much has been written about the benefits of Lesson Study in science and mathematics education, this book analyses its impact on education for children with special needs. It studies the ways in which the Lesson Study process is implemented in different educational contexts in the Netherlands, Singapore, the UK, and Sweden--countries which propagate more inclusive learning environments regardless of varying degrees of student capacities. In addition to making transcultural comparisons regarding concepts, procedures, and instruments in the use of Lesson Study in these four countries, this book will provide practice-based suggestions for teachers to formulate collaborative lesson plans.

An Ethnographic Study of a Special Education School Feb 10 2021 The purpose of this study was to describe, using the tools of ethnography and qualitative research, selected events in the history of a public special education school and its school culture. The year of the study, 1994-1995, the school served 125 students with cerebral palsy and other disabilities affecting some or all of their physical, sensory, and cognitive abilities. Study participants included faculty and staff, former students, parents, school administrators, and others identified with the school and in the Nashville community during the 1994-1995 school year. In-depth interviews with study participants, on-site observations, semi-structured interviews with informants, document, and archival research were used to create five collective tales based on stories of those who knew the school best between 1975 and 1995. This is a story of one special education school's founding, success, and survival. In recent years, the local school system closed 5 of 7 special education schools, its own K-12 school enrollment declined, and rumors it too would soon close. The story presents a saga of success and survival as the school faced a new social construction of schooling called the "inclusive schools movement." By applying institutional theory to the study of organizations, this study offers an explanation of how one special education school survived the inclusion movement by adapting to societal demands and by maintaining certain environmental elements considered important to school survival. This study provides a number of stories which serve as evidence of how the continuum of services for students with disabilities continues to work as inclusion efforts in some public schools often go awry. This study investigated (1) events beginning with the school's founding in 1975, (2) school success and survival using institutional theory and organizational analysis, and (3) the school as a model day school in special education's continuum or Cascade of Services. At the time of this study, the inclusive schools movement was believed to be responsible for declining enrollments at Harris-Hillman, increasing numbers of students with disabilities being placed in other public and private schools, and rumors the school would soon be closed. Study results offer a collection of stories from one educational setting over two decades. Discussion of these stories is followed by study conclusions that provide support for special education schools and a continuum of service and placement options for students in need of special settings with appropriate curricular content and instruction. It is a unique story of a special education school and its history over 20 years between 1975 and 1995.

Special Education Design and Development Tools for School Rehabilitation Professionals Oct 28 2019 Educators who work with students with disabilities have the unique challenge of providing comprehensive and quality educational experiences for students who have a wide range of abilities and levels of focus. Pedagogies and educational strategies can be applied across a student population, though they tend to have varied success. Developing adaptive teaching methods that provide quality experiences for students with varied disabilities are necessary to promote success for as many of these students as possible. **Special Education Design and Development Tools for School Rehabilitation Professionals** is a comprehensive research publication that examines special education practices and provides in-depth evaluations of pedagogical practices for improved educational experiences for students with disabilities. Highlighting a range of topics such as bilingual education, psychometrics, and physical education, this book is ideal for special education teachers, instructors, rehabilitation professionals, academicians, school administrators, instructional designers, curriculum developers, principals, educational software developers, researchers, and students.

Special Education for Today's Teachers Jun 28 2022 Are you prepared to serve and teach all students? The second edition of "Special Education for Today's Teachers: An Introduction" not only will provide a solid foundation for being a teacher in today's classroom, but also will help you to truthfully answer this question. The challenges we

face today in special education require highly qualified, reflective practitioners who use research-based strategies in the classroom and who are excited about the success and future of students. This book will help prepare you to meet these requirements and find the solutions that will lead you to that success. A focus on Professionalism "My Profession, My Story" vignettes highlight teachers, their life experiences, dispositions, and attitudes, and how all of these factors relate to daily teaching practice and the profession. "The Real World: Challenges and Solutions" Chapter 16: Continuing a Successful Career: Professionalism, Collaborative Support, and Professional Development Addresses the CEC Knowledge and Skill Standards, CEC code of Ethics, and PRAXIS Standards A focus on Effective Instructional Application "Can You Help Me with This Student?" features present a scenario or case study in which a teacher is facing a difficult situation with a student and show how this challenge could be resolved. "Technology for Access" features are integrated throughout the text. Chapter 5: Effective Teaching in a Well-Managed Classroom A focus on Reflection Chapter 1: Teaching Students with Special Needs: Professional Roles and Responsibilities "Reflective Exercises" margin notes engage readers through thought-provoking questions that extend the content of the narrative. "Reflect Upon" focus questions at the beginning of each chapter serve as not only an advance organizer for the reader, but also a point of consideration related to the topics covered in the chapter.

The History of Special Education Dec 31 2019 This comprehensive volume examines the facts, characters, and events that shaped this field in Western Europe, Canada, and the United States. From the first efforts to teach disabled people in early Christian and Medieval eras to such current mandates as Public Law 94-142, this study breaks new ground in assessing the development of special education as a formal discipline. "The History of Special Education" presents a four-part narrative that traces its emergence in fascinating detail from 16th-century Spain through the Age of Enlightenment in 17th-century France and England to 18th-century issues in Europe and North America of placement, curriculum, and early intervention. The status of teachers in the 19th century and social trends and the movement toward integration in 20th century programs are considered as well. -- From product description.

ILTS Special Education General Curriculum (163) Exam Secrets Study Guide Jun 24 2019 ***Includes Practice Test Questions*** ILTS Special Education General Curriculum (163) Exam Secrets helps you ace the Illinois Licensure Testing System, without weeks and months of endless studying. Our comprehensive ILTS Special Education General Curriculum (163) Exam Secrets study guide is written by our exam experts, who painstakingly researched every topic and concept that you need to know to ace your test. Special Education Needs and Inclusion May 04 2020

Final Report of the Interim Study Committee on Special Education/School Finance Jun 16 2021

What Really Works in Special and Inclusive Education Aug 19 2021 As teachers around the world deal with the challenges of inclusive education, they must find effective ways of enhancing their classroom teaching methods. What Really Works in Special and Inclusive Education presents teachers with a range of evidence-based strategies they can immediately put into practice in their classrooms. This unique book will be an invaluable resource for educators who may not have the time or the inclination to engage with theory-heavy research, but who wish to ensure that their teaching strategies are up-to-the-minute and proven to be the most effective best practices. Each of the 27 strategies that this book comprises has a substantial research base, a strong theoretical rationale and clear guidelines on their implementation, as well as cautionary advice where necessary. In this new second edition, David Mitchell, a leading writer in special and inclusive education, continues to break new ground with revised and updated strategies based on evidence from the most recent studies in the field. From the myriad of related research available, only those studies with genuine potential for improving the practices of teachers and schools have been included, with the aim of facilitating high-quality learning and social outcomes for all learners in schools. Updates to this new edition include: four new chapters, on response to intervention, universal design for learning, inter-agency cooperation and one on the Finnish education system over 350 new references an even wider international focus, including evidence drawn from Asia references to recent developments in neuroscience a new companion website, with extra case studies, links to further reading, journal articles and videos, and an interactive quiz, at www.routledge.com/cw/mitchell This book will be essential reading for anyone with a vocational or academic interest in evidence-based special educational needs teaching strategies, whether a student in initial teacher education or a qualified classroom teacher, teacher educator, educational psychologist, special needs coordinator, parent, consultant or researcher. David Mitchell is an Adjunct Professor in the College of Education, University of Canterbury, Christchurch, New Zealand, and a consultant in inclusive education. 'This is the book I wish I had written, synthesizing an enormous literature focused on special needs students. It is robust, it is readable, and it is your right-hand resource. A stunner of a book.' –Professor John Hattie, University of Melbourne, author of Visible Learning

Single Case Research Methodology Jan 12 2021 In this anticipated new edition of Single Case Research Methodology, David L. Gast and Jennifer R. Ledford detail why and how to apply standard principles of single case research methodology to one's own research or professional project. Using numerous and varied examples, they demonstrate how single case research can be used for research in behavioral and school psychology, special education, speech and communication sciences, language and literacy, occupational therapy, and social work. This thoroughly updated new edition features two entirely new chapters on measurement systems and controversial issues in single subject research, in addition to sample data sheets, graphic displays, and detailed guidelines for conducting visual analysis of graphic data. This book will be an important resource to student researchers, practitioners, and university faculty who are interested in answering applied research questions and objectively evaluating educational and clinical practices.

Experiencing Special Educational Needs and Disability Oct 21 2021 Covering a wide range of special educational needs and disabilities this book examines the perspectives of teachers, teaching assistants, children and parents with a focus on specific educational aspects, such as curriculum and pedagogy. Referencing recent policy changes in the special needs and inclusive education context, the book offers an introduction to the special needs and inclusive education field for teachers, SEN Coordinators and other allied professionals (e.g. speech and communication therapists, educational psychologists) as well as parents and policy makers, by: * Examining the lived experience of parents, teachers and children/young people with special educational needs/ disability in education * Illustrating some of their experienced tensions and how they deal with them * Exploring the significance of these experiences for policy and practice The book features 12 engaging case studies that are based on in-depth interviews with parents, teachers or teaching assistants and children or young people, exploring their experiences as regards their education. These accounts emphatically highlight positive models of practice as well as negative practices to avoid. In this way the book contributes to the professional learning of teachers and allied professionals. "A critical part of understanding any complex social phenomenon is to listen (really listen) to the views of the stakeholders - the children and young people, the parents and the professional educators. In this thoughtful book, Brahm Norwich, a leading scholar in the field of Disability and Special Educational Needs, faithfully presents these views through 12 insightful case studies. The stories told are direct and share the tensions, dilemmas, balances and dynamics of life. It is a very thought provoking book and an excellent addition to the field." Dr. Graeme Douglas, Professor of Disability and Special Educational Needs, University of Birmingham, UK "An invaluable book about the importance of getting to know each and every child, comprising up to date case studies that contextualise the experiences of 12 learners

identified with special educational needs." Professor Lani Florian, Bell Chair of Education, University of Edinburgh, UK "In the era of person-centred planning, this book is a timely and essential key text for both general and specialist practitioners working for children and young people with special educational needs and/ or disability. The structured case study format provides accessible, comprehensive and detailed insights across a range of ages and types of educational placement. Whilst evidence from the individual experiences of children, their families and teachers are its main substance, the book also draws together case study themes, including advice directly given by parents and teachers to the readers. Professor Norwich is to be highly commended for providing this original, scholarly and useful research to the international field of special education." Professor Kevin Woods, Professor of Educational and Child Psychology, University of Manchester, UK "In his new book of 12 case studies of children and young people with a range of special educational needs and disabilities (SEND), Brahm Norwich skilfully presents the perspectives of the young people themselves, their parents, and the teachers and teaching assistants who support them. These careful, illuminating accounts bring to life the realities, complexities, challenges - and also the positive aspects - of the young people themselves and those that care and support them. They remind us all of the importance of seeing each child as an individual. Required reading for all who work with children with SEND." Professor Geoff Lindsay, Centre for Educational Development, Appraisal and Research (CEDAR), University of Warwick, UK

Arts Integration and Special Education Jul 06 2020 Arts Integration and Special Education contributes to research, policy, and practice by providing a theory of action for studying how linguistic, cognitive, and affective student engagement relates to arts integrated learning contexts and how these dimensions of engagement influence content area and literacy learning. Arts Integration and Special Education connects the interdisciplinary framework in human development and linguistics, special education, and urban education with primary action research by special educators trained in arts integration, working in an inclusive urban charter school with middle school age students. Upper elementary to middle-grade level student learning is relatively understudied and this work contributes across fields of special education and urban education, as well as arts education. Moreover, the classrooms in which the action research occurs are comprised of students with a diverse range of abilities and needs. The book's interdisciplinary model, which draws on developmental and educational psychology, special education, and speech/language pathology research and practice, is the first to posit explanations for how and why AI contexts facilitate learning in students with language and sensory processing disorders, and those at-risk for school failure due to low socioeconomic status conditions.

Exceptional Learners Feb 22 2022 Exceptional Learners is an outstanding introduction to the characteristics of exceptional learners and their education, emphasizing classroom practices as well as the psychological, sociological, and medical aspects of disabilities and giftedness. In keeping with this era of accountability, all discussions and examples of educational practices are grounded in a sound research base. With hundreds of new references added to the 12th edition, the authors are committed to bringing the most current and credible perspectives to bear on the ever-increasing complexity of educating students with special needs in today's schools. The authors have written a text that reaches the heart as well as the mind, promoting a conviction that professionals working with exceptional learners need to develop not only a solid base of knowledge, but also a healthy attitude toward their work and the people whom they serve, and constantly challenge themselves to acquire a solid understanding of current theory, research, and practice in special education and to develop an ever more sensitive understanding of exceptional learners and their families. Note: This is the standalone book if you want the book with access to MyEducationLab Pegasus order: ISBN 0132659239 / 9780132659239 Exceptional Learners: An Introduction to Special Education with MyEducationLab Pegasus Package consists of: 0132598515 / 9780132598514 MyEducationLab Pegasus -- Access Card 0137033702 / 9780137033706 Exceptional Learners: An Introduction to Special Education

Disability Classification in Education Sep 19 2021 This edited volume examines current disability classification systems, the dilemmas educators face in categorizing students with special needs, and alternative options based on recent challenges and trends.

Research and Evaluation Methods in Special Education Jan 24 2022 This excellent resource provides an approach to research and evaluation that helps educators better understand and address the needs of students with various disabilities.

Research and Evaluation Methods in Special Education Nov 02 2022 This text will enable readers to use tools to design, conduct and report research in a way that transforms, when appropriate, the delivery of special education.

The SAGE Handbook of Special Education May 16 2021 The second edition of The SAGE Handbook of Special Education provides a comprehensive overview of special education, offering a wide range of views on key issues from all over the world. The contributors bring together up-to-date theory, research and innovations in practice, with an emphasis on future directions for the role of special education in a global context of inclusion. This brand new edition features: " New chapters on families, interagency collaboration and issues of lifelong learning " The UN Convention on the Rights of Persons with Disabilities " Policy reform proposals " Equity and social justice in education " The impact of new thinking on assessment " Issues and developments in classification " The preparation and qualifications that teachers need The Handbook's breadth, clarity and academic rigour will make it essential reading for researchers and postgraduate students, and also for practitioners, teachers, school managers and administrators.

New Perspectives in Special Education Oct 01 2022 It is now widely believed in many Western countries that the segregation of students with special educational needs is problematic, and that wherever possible these students should be educated alongside their peers in regular education settings. There has been a general move towards integrating special and regular education into one system that caters for a much wider range of students. But the outcomes in various countries have been very different. This book describes and evaluates these outcomes. The book provides both quantitative and qualitative information, analysing the similarities and differences between integration practices in six Western countries.

English as a Foreign Language for Deaf and Hard of Hearing Learners Jul 26 2019 This book outlines best practice and effective strategies for teaching English as a foreign language to D/deaf and hard of hearing (DHH) students. Written by a group of researchers and experienced practitioners, the book presents a combination of theory, hands-on experience, and insight from DHH students. The book brings together a variety of tried and tested teaching ideas primarily designed to be used for classroom work as a basis for standby lessons or to supplement courses. Placing considerable emphasis on practical strategies, it provides educators and practitioners with stimulating ideas that facilitate the emergence of fluency and communication skills. The chapters cover a wide range of interventions and strategies including early education teaching strategies, using sign -bilingualism in the classroom, enhancing oral communication, speech visualization, improving pronunciation, using films and cartoons, lip reading techniques, written support, and harnessing writing as a memory strategy. Full of practical guidance grounded in theory, the book will be a useful resource for English teachers and all those involved in the education of deaf and hard of hearing learners across the world; including researchers, student teachers, newly qualified teachers, school supervisors, and counsellors.

Effective Assessment for Students With Special Needs Sep 27 2019 Discover what assessment methods you should be using, and how, when, and where they should be administered to ensure appropriate services are selected for all exceptional students.

Inclusive Special Education Nov 29 2019 Much has been written about special education and about inclusive education, but there have been few attempts to pull these two concepts and approaches together. This book does just that: sets special education within the context of inclusive education. It posits that to include, effectively, all children with special educational needs in schools requires an integration of both concepts, approaches, and techniques. It has never been more timely to publish a book that helps professionals who work with schools, such as psychologists, special education professionals, and counselors, to identify effective practices for children with special needs and provide guidelines for implementing these in inclusive schools.

Attitudes and Attitude Change in Special Education Aug 26 2019 Twelve papers address issues of attitudes towards handicapped persons. The authors were invited to summarize and critically evaluate the literature in their area of expertise, including their own research. Contributions touch on measurement and methodological issues as well as other topics. The following papers are included: "Attitudes and Attitude Change in Special Education" (R. Jones and S. Guskin); "Perspectives and Issues in the Study of Attitudes" (H. Triandis, J. Adamopoulos, D. Watts); "Approaches to the Measurement of Attitude" (R. Dawes); "Sociometric Research in Special Education" (D. MacMillan and G. Morrison); "Classroom Learning Structure and Attitudes toward Handicapped Students in Mainstream Settings: A Theoretical Model and Research Evidence" (D. Johnson and R. Johnson); "Attitudes toward Mentally Retarded Children" (J. Gottlieb, L. Corman, R. Curci); "Attitudes toward the Learning Disabled in School and Home" (B. Reid); "Children's Attitudes toward Emotionally Disturbed Peers" (C. Chiba); "Attitudes toward the Physically Disabled" (J. Siller); "Attitudes of Educators toward the Handicapped" (J. Jamieson); and "Modifying Attitudes toward the Handicapped: A Review of the Literature and Methodology" (A. Towner). (CL)

Policy, Provision and Practice for Special Educational Needs and Disability Jan 30 2020 This book showcases the diverse nature of policy, provision and practice for special educational needs and disability (SEND) across different international settings. Situated across a backdrop of varied international policies relating to inclusion, the book offers insights into the rhetoric of SEND policy and practice across a range of settings to contribute to our understanding of SEND provision. It explores the complexities, concerns and challenges experienced by staff, pupils, parents and carers in contemporary education settings. Chapters draw on contemporary empirical research and are structured around four parts: special education needs and disability within policy; stakeholder perceptions and experiences of SEND provision; meeting the needs of SEND children; and moving towards inclusive practice. The volume will challenge thought, stimulate critique and provoke debate in the field of special educational needs both locally and globally and will be of great interest to researchers and postgraduate students in the field of inclusive education, special needs education and comparative education.

Research in Special Education, Directory of Current Projects Sep 07 2020

Teachers' Stance Towards Learning Disabilities Mar 26 2022 Teachers' ways of thinking and understanding affect the way in which they shape their teaching practice. Knowing the beliefs and perceptions behind teacher action give us valuable insights into what occurs in the classroom. On the example of Korea, this book investigates the

stance (Haltung) that teachers - particularly special education teachers - take about how and why their students are failing and how they might be helped.

Special Needs in the Classroom Mar 14 2021 A source of ideas for teacher educators who wish to improve teachers' skills in dealing with pupil diversity in mainstream schools. Particular emphasis is given to teacher development, both pre-service and in-service. In addition, the book provides practical guidelines based on the UNESCO Teacher Education Resource Pack.

The History of Inclusion in the United States Apr 02 2020 As a significant term, inclusion came into use relatively recently in the long history of special education in the United States. Since the 1800s, when children with disabilities first were segregated for instruction in public schools, professionals and parents have called for more equitable, "normal" treatment of these students, and for closer contact with their nondisabled peers. Through the years, the central issues of the discussions between educators and parents have focused on who should be considered disabled and who should bear responsibility for planning and providing for their education. The History of Inclusion in the United States traces the antecedents of this ongoing debate to answer questions about what inclusion is, how it came to be, and where it might go. In this comprehensive study, author Robert L. Osgood reveals how the idea of inclusion has evolved into broader realms of thought and practice. In its earliest manifestations, educators dwelled upon the classroom setting itself, wondering whether "disabled" children belonged there; if not, why not; and if so, how this could be accomplished? By the late 1960s, the scope of the discussion had shifted to assess the comprehensive structures of special education and its relationship with general education. The History of Inclusion seamlessly follows this progression into the present decade, in which current educational policy questions the need for any sort of separate "special education" in principle and structure.

Evidence-Based Practices Apr 26 2022 This volume focuses on evidence-based practices (EBPs), supported, sound research studies documenting their effectiveness with a target population. As such, EBPs have significant potential to improve the outcomes of learners with learning and behavioral disorders.

Gace Special Education General Curriculum Secrets Study Guide Dec 23 2021 ***Includes Practice Test Questions*** GACE Special Education General Curriculum Secrets helps you ace the Georgia Assessments for the Certification of Educators, without weeks and months of endless studying. Our comprehensive GACE Special Education General Curriculum Secrets study guide is written by our exam experts, who painstakingly researched every topic and concept that you need to know to ace your test. Our original research reveals specific weaknesses that you can exploit to increase your exam score more than you've ever imagined. Handbook of Research on Critical Issues in Special Education for School Rehabilitation Practices Jul 30 2022 Rehabilitation professionals working with students with disabilities and the families of those students face unique challenges in providing inclusive services to special education student populations. There needs to be a focus on adaptive teaching methods that provide quality experience for students with varying disabilities to promote student success and inclusivity. Critical issues within these practices span autism, diverse students, gifted education, learning disabilities, behavioral and emotional disorders, and more. With having many different types of students with vastly different situations, it is important for rehabilitation professionals to understand the best practices and learning systems for special education students who have a wide range of needs and challenges. The Handbook of Research on Critical Issues in Special Education for School Rehabilitation Practices focuses on the issues and challenges rehabilitation professionals face in special education and how they can provide inclusive and effective services to diverse student populations. This book highlights topics such as culturally responsive teacher preparation, artificial intelligence in the classroom, universal design, inclusive development, and school rehabilitation and explores the effects these newfound practices in education have on various types of students with disabilities. This book is essential for special education teachers, administrators, counselors, practitioners, researchers, academicians, and students interested in the new methods, theories, and solutions for the best practices in inclusive and effective special education.

Exploring Opportunities And Challenges Of Special Needs Education Nov 09 2020 The focus of this qualitative study is to explore the opportunities and challenges of special needs education at Adama town. The cornerstone of students with disabilities is the availability of special needs. To identify the major opportunities and challenges of special needs education at Adama town the study used the following research questions: What are the opportunities of the special needs education in the educational system? What are the major challenges of special needs education? What are the roles of parents, teachers, and educational leaders in the special needs education processes? For any child with disability, special education involves inter- and intra-personal changes that affect future well-being. Unfortunately, the majority of children with disabilities are less likely to be fully accessed to special needs education. To date, very little research about the opportunities and challenges of special needs education in the study area exists. This research report will add to the body of knowledge about the opportunities and challenges of special education and corresponding roles of parents, teachers and educational officers.

Social and Dialogic Thinking and Learning in Special Education May 28 2022 Drawing on a three-year post-critical ethnography, this volume counters deficit-based notions of disability to present a new social and dialogic theory of thinking and learning for students with significant support needs. Dismantling ideas around ableism/disableism, Social and Dialogic Thinking and Learning offers a uniquely theoretical and conceptual contribution to special education and capability research. Illustrating how students exhibit varied practical, social, and creative abilities, possess agency and perform identity, chapters present a challenge to the restrictive ways in which disability is constructed through prescriptive forms of teacher-student interaction and instruction. The text ultimately offers a powerful re-imagining of how educators and researchers can perceive, observe, and respond to students beyond current institutional and cultural norms. This text will benefit researchers, academics, and educators with an interest in inclusion and special educational needs, disability studies, and the theories of learning more broadly. Those specifically interested in educational psychology and the study of severe, profound, and multiple learning difficulties will also benefit from this book.

Deconstructing Special Education Aug 31 2022 In the second edition of this text, the authors critically examine the intellectual foundations of special education and consider the consequences on their influence for professional and popular thinking about learning difficulties.
