Management Fashions Dec 25 2021 Using the theory of management fashions proposed in the 1990s by Eric Abrahamson, Krzysztof Klincewicz analyzes the changing popularity of management concepts accompanied by solutions. Among these are management bestsellers, consulting services, software systems, "methodologies," and approaches to organizational change, training courses, professional certifications and even new corporate positions. The book presents the phenomena of management fashions as being the key driver for the development of the management knowledge industry, consisting of consulting companies, computer firms, publishing houses, professional institutes, and other organizations involved in the launching and the promotion of new management techniques. The author supplements the existing body of knowledge by focusing on the supply-side of management fashions, particularly the strategies and marketing techniques of solution vendors, and proposes a model of relations between management ideas and tangible solutions, explaining how bestselling ideas are turned into objects and institutions. The empirical research described in this volume involves multiple methods, including discourse volume analysis and qualitative historical techniques. Included also is a comprehensive overview of the recent relevant developments in sociology, marketing, and organization sciences, in which the author draws on the heritage of praxiology by taking a meta-level perspective on the propositions of management science. Krzysztof Klincewicz is lecturer at the School of Management, Warsaw University, and researcher at the School of Innovation Management, Tokyo Institute of Technology. His research interests combine organization theory, social sciences, and new technologies, with the focus on strategies of high-tech companies. He is certified chartered marketer of the British Chartered Institute of Marketing, and has numerous years of working experience in business development management for IT companies in Poland, Finland, and in the UK.

This book addresses that need and, more importantly, demonstrates HOW organizations can make The Management Shift to a new way of thinking and working.
