Programming in C Sep 02 2022 Beginning with the basics of computers, the book provides an in-depth analysis of various constructs of C. The key topics include iterative and decision-control statements, functions, recursion, arrays, strings, pointers, structures and unions, and file management. It deals separately with the fundamental concepts of linked lists - the preferred data structure for dynamic allocation of memory. The book also includes a chapter on different searching and sorting algorithms and analysis of time and space complexity of algorithms.

THE DISAPPOINTING 5 Mar 04 2020 Akash Malhotra is the poster child of a teenage rebel. He drinks alcohol, smokes cigarettes, and is an all-round anti-social. But he is not the only one with problems. His best friend, Dhruv Kapoor, thinks the answer to all his problems is bullying others, particularly the school 's smartest boy, Robin Alberto. His other best friend, Sunayna Mahapatra, who thinks she is too mature for things like teenage romance, is also up for a huge surprise. Akash also has another secret: his relationship with the school 's most popular girl, Bindya Shah. Akash thinks his life couldn 't get any crazier; until he comes face-to-face with a young homeless boy and uncovers the dangerous world of child trafficking. Oh, and he is pretty sure his mother is hiding a dark family secret... Will Akash and his friends survive the trials and tribulations of teenage life? or will they be consumed by them? One thing is for certain: they will not go down without a fight.

Syllabus Dec 01 2019 How redesigning your syllabus can transform your teaching, your classroom, and the way your students learn Generations of teachers have built their classes around the course syllabus, a semester-long contract that spells out what each class meeting will focus on (readings, problem sets, case studies, experiments), and what the student has to turn in by a given date. But what does that way of thinking about the syllabus leave out—about our teaching and, more importantly, about our students ' learning? In Syllabus, William Germano and Kit Nicholls take a fresh look at this essential but almost invisible bureaucratic document and use it as a starting point for rethinking what students—and teachers—do. What if a teacher built a semester 's worth of teaching and learning backward—starting from what students need to learn to do by the end of the term, and only then selecting and arranging the material students need to study? Thinking through the lived moments of classroom engagement—what the authors call “ coursetime ” —becomes a way of striking a balance between improv and order. With fresh insights and concrete suggestions, Syllabus shifts the focus away from the teacher to the work and growth of students, moving the classroom closer to the genuinely collaborative learning community we all want to create.

Zoology for Degree Students (For B.Sc. Hons. 3rd Semester, As per CBCS) Jun 26 2019 This textbook has been designed to meet the needs of B.Sc. (Hons.) Third Semester students of Zoology as per the new UGC Model Curriculum - Choice Based Credit System (CBCS). Comprehensively written, it explains the essential principles, processes and methodology of Chordata, Physiology and Biochemistry. This textbook is profusely illustrated with well-drawn labelled diagrams, not only to supplement the descriptions, but also for sound understanding of the concepts.

Entrepreneurship Education Aug 09 2020 The book provides an overview of developments in the field of entrepreneurship education, with special reference to global perspectives on innovations and best practices, as well as research in the emerging economy context. It focuses on various experiments in curriculum design, review and reform in addition to the innovative processes adopted for developing new content for entrepreneurship courses, in many cases with an assessment of their impact on students' entrepreneurial performance. Further, it discusses the pedagogical methods introduced by teachers and trainers to enhance the effectiveness of students' learning and their development as future entrepreneurs. It explains the various initiatives generally undertaken to broaden the scope of entrepreneurship education by extending it beyond regular students and offering it to other groups such as professionals, technicians, artisans, war veterans, and the unemployed. The book is a valuable resource for researchers and academics working in the field of entrepreneurship education as well as for trainers, consultants, mentors and policy makers.

Computer Graphics May 18 2021 Many Books on Computer Graphics (C.G) are available in the market but they tend to be dry and formal. I have made this book the most lucid and simplified, that A student feels as if a teacher is sitting behind him and guiding him. It can be used as a textbook also for all graduates and postgraduates programs of DU, GGSIPU, JNU, JNTU, UPTU, GNDU, VTU, RGPV, and Nagpur Universities of India

Self-Help to ICSE Semester 2 Topicwise Revision Chemistry Book Class 10 (Subjective & Objective Format) Jan 26 2022 Just as a guide leads an inquisitive traveller to his goal and while escorting him, narrated the salient features of the object, so does a good guide-book offers the students all the essential information for easy comprehension of the subject to prepare for the Final-Based Examination of Semester-II. 'Self-Help to I.C.S.E. Semester 2 Topic wise Revision Book of Chemistry Class 10th' has been specially written meticulously to contain a comprehensive knowledge of Chemistry in detail. Its main objective is to prepare the young scholars aspiring for brilliant success in the I.C.S.E. Examination. The material in the text includes chapters incorporating all the divisions of this branch of science. It has been laboriously enriched with the informative summary of each chapter at the outset important points, Expected questions and answers and previous years' questions besides noteworthy suggestions for important questions. The contents of this book have been extensively interspersed with diagrams for accurate practical insight. If studies attentively, 'Self-Help to I.C.S.E. Semester 2 Topic wise Revision Book of Chemistry Class 10th' will greatly help the students in acquiring the fullest knowledge of the subject. It not only inspires you to become budding scientists, scholars and doctors but also helps to sharpen you focus, concentration, creativity and inquisitiveness. The authors feel indebted in their task to the original masters of the subject and their predecessors in the field who as authors have given their most valuable contribution in helping students acquire a robust grip on this branch of science. All new suggestions for further embellishment of this Self-Help will be considered not only useful but will also be highly appreciated and incorporated in subsequent editions.

Mathematics - I Semester-I (RTM) Nagpur University Sep 29 2019 "Mathematics - I" is as per the latest prescribed Syllabus RTMNU Nagpur with a major focus on Differential and Multivariable Calculus, Matrices, First Order and Higher Order Ordinary Differential Equations. The text is lucid and brimming with examples for further ease of students. The practice quotient is high as well so that the reader further understands the topics which have been deftly explained.

Aspirations – Semester books Class 5 Semester 2 Mar 28 2022 Term Book

Handbook for Teaching Introductory Psychology Jun 06 2020 Like its predecessors, Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from Teaching of Psychology (TOP), the official journal of the Society for the Teaching of Psychology, Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One, "Issues and Approaches in Teaching Introductory Psychology," contains 52 articles on critical issues, such as: how to approach the course; understanding students' interests, perceptions, and motives; students' existing knowledge of psychology (including their misconceptions); a comparison of introductory textbooks and tips on how to evaluate them; test questions and student factors affecting exam performance; an overview of different forms of feedback; giving extra credit; and how to deal with academic dishonesty. Section Two consists of 37 articles that present demonstrations, class and laboratory projects, and other techniques to enhance teaching and learning in both the introductory, as well as advanced courses in the discipline. This section is organized so as to parallel the order of topics found in most introductory psychology textbooks. Intended for academicians who teach the introductory psychology course and/or oversee grad assistants who teach the

course, all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology.

Hues Class 5, Semester 2 Apr 28 2022 1. An integrated semester series for Classes 1 to 5, comprising two semester books for each class. 2. The books are mapped to the National Curriculum Framework. 3. The series focus on developing the 21st century skills of critical thinking, creativity, communication and collaboration through reading texts that are value-centric, as well as activities, exercises and projects that develop life skills along with application and analytical thinking. 4. The subjects included in Classes 1 & 2 (Semester 1 and 2) are English, Mathematics, Environmental Studies (EVS) and General Knowledge 5. The subjects included in Classes 3 to 5 (Semester 1 and 2) are English, Mathematics, Science, Social Studies and General Knowledge

The Impact of the 4th Industrial Revolution on Engineering Education Jul 20 2021 This book gathers papers presented at the 22nd International Conference on Interactive Collaborative Learning (ICL2019), which was held in Bangkok, Thailand, from 25 to 27 September 2019. Covering various fields of e-learning and distance learning, course and curriculum development, knowledge management and learning, real-world learning experiences, evaluation and outcomes assessment, computer-aided language learning, vocational education development and technical teacher training, the contributions focus on innovative ways in which higher education can respond to the real-world challenges related to the current transformation in the development of education. Since it was established, in 1998, the ICL conference has been devoted to new approaches in learning with a focus on collaborative learning. Today, it is a forum for sharing trends and research findings as well as presenting practical experiences in learning and engineering pedagogy. The book appeals to policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, and other professionals in the learning industry, and further and continuing education.

Applied Calculus Jul 08 2020

Computational Collective Intelligence. Technologies and Applications Feb 01 2020 The two volumes set LNCS 7653 and 7654 constitutes the refereed proceedings of the 4th International Conference on Computational Collective Intelligence, ICCCI, held in Ho Chi Minh City, Vietnam, in November 2012. The 113 revised full papers presented were carefully reviewed and selected from 397 submissions. The papers are organized in topical sections on (Part I) knowledge integration; data mining for collective processing; fuzzy, modal, and collective systems; nature inspired systems; language processing systems; social networks and semantic web; agent and multi-agent systems; classification and clustering methods; modeling and optimization techniques for business intelligence; (Part II) multi-dimensional data processing; web systems; intelligent decision making; methods for scheduling; collective intelligence in web systems – web systems analysis; advanced data mining techniques and applications; cooperative problem solving; computational swarm intelligence; and semantic methods for knowledge discovery and communication

A Practical Book of Industrial Pharmacy – I (As Per PCI Syllabus, B. Pharm, 5th Semester) Sep 21 2021 This book, “ A Practical Book of Industrial Pharmacy – I (As Per PCI Syllabus, B. Pharm, 5th Sem) ” was written by four different authors in accordance with the B. Pharm fifth-semester PCI curriculum. The primary purpose of this book is to provide readily accessible methods and procedures for conducting Industrial Pharmacy-I practicals in the fifth semester of B. Pharm, with a focus on facilitating subject comprehension. It contains 15 experiments based strictly on the PCI curriculum. It includes the practicals that will provide a sound knowledge about performing preformulation studies on the powders. Also performing the practicals will help the students to understand the methodologies involved in the preparation of tablets, capsules, ointments and creams. Furthermore, they will also be learning how to evaluate the formulations so prepared which will be helpful if they prefer working in pharmaceutical industries. Industrial pharmacy-I practical helps the students in having a profound knowledge of operating sophisticated equipments which will be also being used in pharmaceutical industries starting from the preformulation, manufacturing and till the evaluation.

Radical Teaching in Turbulent Times Dec 25 2021 From 1966 to 1970, historian Martin Duberman transformed his undergraduate Princeton seminar on American radicalism. This book looks closely at the seminar, drawing on interviews with former students and colleagues, conversations with Duberman, and abundant archival material in the Princeton archives and the Duberman Papers. The array of evidence makes the book a primer on how historians gather and interpret evidence while at the same time shining light on the tumultuous late 1960s in American higher education. This book will become a tool for teaching, inspiring educators to rethink the ways in which history is taught and teaching students how to reason historically through sources.

A Textbook of B.Sc. Mathematics Solid Geometry Dec 13 2020 This Textbook of B.Sc Mathematics is for the students studying Third year First semester in all universities of Telangana State. The revised syllabus is being adopted by all the universities in Telangana State, following Common Core model curriculum from the academic year 2016 - 2017 based on CBCS (Choice Based Credit System). This book strictly covers the new curriculum for Semester V (3rd year, 1st semester-Elective). Solutions are provided for the questions of Practical Question Bank. Key for the exercise problems appended at the end.

Mathematics - II Semester-II (RTM) Nagpur University Oct 30 2019 "Mathematics - II" is as per the latest prescribed Syllabus RTMNU Nagpur with a major focus on Integral, Multivariable and Vector Calculus, Statistics and Finite Differences. The text is lucid and brimming with examples for further ease of students. The practice quotient is high as well so that the reader further understands the topics which have been deftly explained.

The Internet of Things Feb 12 2021 Internet of Things: Connecting Objects puts forward the technologies and the networking architectures which make it possible to support the Internet of Things. Amongst these technologies, RFID, sensor and PLC technologies are described and a clear view on how they enable the Internet of Things is given. This book also provides a good overview of the main issues facing the Internet of Things such as the issues of privacy and security, application and usage, and standardization.

Oswal-Gurukul Chapterwise Objective + Subjective Science Stream : ISC Class 12 for Semester II 2022 Exam Sep 09 2020

Hues Class 5, Semester 1 May 30 2022 1. An integrated semester series for Classes 1 to 5, comprising two semester books for each class. 2. The books are mapped to the National Curriculum Framework. 3. ICSE Final Revision Guide for subjects: Term I Class 10 2021 Examination Nov 11 2020

Sharks on Campus Aug 28 2019 "Brain drain 1: Exodus of trained youth to developed societies; today 's NRIs. Brain drain 2: Illiterate rural poor due to lack of schools or their accessibility. Brain drain 3: Absconders from schools or drop outs for earning livelihoods. Brain drain 4: Untaught, untrained, valueless and corruption savvy youth from colleges and universities. " Only 30% of students are employable, none is worthy. " Such comments are due to fraudulent educators of youth – the fourth brain drain, which is the subject of this book. Can the galloping placebo culture be expelled from universities? The youth is corrupted for life by academicians, who have no values. Bitter truths, stranger than fiction, are found in the forty-one articles of this book, which cover some aspects of education in our universities and it also suggests some reforms. The author represents the fifth brain drain: Obstruction of useful talents by evil forces and their stolen futures."

Fundamentals of Microelectronics Aug 01 2022 Fundamentals of Microelectronics, 2nd Edition is designed to build a strong foundation in both design and analysis of electronic circuits this text offers conceptual understanding and mastery of the material by using modern examples to motivate and prepare readers for advanced courses and their careers. The books unique problem-solving framework enables readers to deconstruct complex problems into components that they are familiar with which builds the confidence and intuitive skills needed for success.

Tools for Teaching May 06 2020 This is the long-awaited update on the bestselling book that offers a practical, accessible reference manual for faculty in any discipline. This new edition contains up-to-date information on technology as well as expanding on the ideas and strategies presented in the first edition. It includes more than sixty-one chapters designed to improve the teaching of beginning, mid-career, or senior faculty members. The topics cover both traditional tasks of teaching as well as broader concerns, such as diversity and inclusion in the classroom and technology in educational settings.

Management Principles and Applications (For Sem.- 3rd, Utkal University, Odisha) Aug 21 2021 This book presents the subject matter tailor-made for the latest syllabus as per CBCS Odisha to enable its students to study the course material through a single book without having to refer to multiple sources and comprehend the subject in simple, understandable language.
