Hidden Transcripts and the Arts of Resistance Apr 17 2021 The essays in this volume develop the highly suggestive insights and theory of James C. Scott—especially those related to patterns of domination and subordination, the role of religion in supporting or opposing the powerful, and the "arts of resistance" by the subordinated—to tackle key issues in the interpretation of Jesus and Paul. All the contributors implicitly or explicitly assume a stance sympathetic with subordinated peoples of the past and present. While all pursue primarily critical literary, historical and social analysis on New Testament texts in historical contexts, some also examine historical or contemporary comparative materials. In addition, some even find Scott useful in critical self-examination of our own scholarly motives, stances, and approaches in relation to texts and their uses. --From publisher's description.

When Shyima Hall was eight years old, her impoverished parents sold her to pay a debt. Two years later, the wealthy family she was sold to moved to Orange County, California, and smuggled her with them. That's when an anonymous call from a neighbor brought about the end of Shyima's servitude—but her journey to true freedom was far from over. A volunteer at her local police department since she was a teenager, Shyima is passionate about helping to rescue others who are in bondage. Hidden Pictures Jan 27 2022 Nancy, Bess, and George must find the truth behind a photographic mystery in this nineteenth book of the Nancy Drew Diaries, a fresh approach to the classic mystery series. Nancy and her friends are spending the weekend in a small mountainside town called Shady Oaks. The local museum is displaying a never-before-seen collection from famous nature photographer, Christopher DeSantos. So the usually sleepy town is now filled with tourists. But it's not just the dramatic lighting of the old black and white photographs that people have come to see. Newspapers all over the country have picked up the story of two visitors who went missing in Shady Oaks only to turn up in the old DeSantos photographs, seemingly frozen in time. What's more, there was a rumor that DeSantos was cursed by his former partner after a disagreement. Now everyone is wondering if the legend is real. Nancy, Bess, and George are convinced that there is another explanation to be found. But it quickly becomes clear that someone is making sure they don't find it. The Hidden Children of France, 1940-1945 Sep 22 2021 Interviews with eighteen Jewish "hidden children" of France and Belgium, telling the story of their survival during World War II. The history of France's "hidden children" and of the French citizens who saved six out of seven Jewish children and three-fourths of the Jewish adult population from deportation during the Nazi occupation is little known to American readers. In *The Hidden Children of France*, Danielle Bailly (a hidden child herself whose family travelled all over rural France before sending her to live with strangers who could protect her) reveals the stories behind the statistics of those who were saved by the extraordinary acts of ordinary people. Eighteen former "hidden children" describe their lives before, during, and after the war, recounting their incredible journeys and expressing their deepest gratitude to those who put themselves at risk to save others. Danielle Bailly is one of the surviving "hidden children." She was Professor of Linguistics at Paris Diderot University until 1998. Since then she has worked as a consultant and researcher. Betty Becker-Theye is Professor Emeritus and former Dean of the College of Fine Arts and Humanities at the University of Nebraska at Kearney and Adjunct Professor of Modern Languages at the University of Maine Hutchinson Center. She is the author of *The Seducer as Mythic Figure* in Richardson, LaClos, and Kierkegaard.

Hidden History of Natchez Jul 21 2021 Since prehistory, the bluffs of Natchez have called to the bold, the cruel and the quietly determined. The diverse opportunists who heeded that call have left behind more than three hundred years of colorful and tragic stories. The Natchez Indians, who inhabited the bluffs at the time of European contact, made a calculated but ultimately catastrophic decision to massacre the French who had settled nearby. William Johnson, a Black man who occupied a tenuous position between two worlds, found wealth and status in antebellum Natchez. In the wake of Union occupation, thousands of the formerly enslaved became the city's protective garrison. Join authors Ryan Starrett and Josh Foreman and rediscover the people who toiled and bled to make Natchez one of the most unique and interesting cities in America.

Natural Born Heroes Oct 31 2019 NATIONAL BESTSELLER • From the bestselling author of *Born to Run* comes a book that inspires us to unleash the extraordinary potential of the human body and climb, swim, skip, throw, and jump our way to heroic feats. "Redefines the heroic ideal, establishing heroism as a skill set rather than a virtue."—NPR Books Christopher McDougall's journey begins with a story of remarkable athletic prowess: On the treacherous mountains of Crete, a motley band of World War II Resistance fighters—an artist, a shepherd, and a poet—abducted a German commander from the heart of the Axis occupation. To understand how, McDougall retraces their steps across the island that birthed Herakles and Odysseus, and discovers ancient techniques for endurance, sustenance, and natural movement that have been preserved in

unique communities around the world. His search takes us scrambling over rooftops with a Parkour crew in London, foraging for greens with a ballerina in Brooklyn, tossing heavy pieces of driftwood on a Brazilian beach with the creator of MovNat—and, finally, to our own backyards. “McDougall traveled to Crete to examine the physical and mental capacity of Greek war heroes [and] studied natural movement, endurance, and nutrition to understand how regular people are capable of extraordinary athletic feats.... We can all adapt the tools of the athletes featured.” —Real Simple Look for Christopher McDougall's new book, *Born to Run 2*, coming in December!

Hidden Self-Harm Feb 25 2022 This practical and accessible book of case studies takes a new look at self-harm, focusing particularly on the under-explored area of 'hidden' self-harming behaviour. These behaviours may not be immediately identifiable as self-harm by counsellors, therapists or their clients, but Maggie Turp shows how recognition and understanding of hidden self-harm can improve practice with those affected. The author begins by discussing extracts from infant observation studies that reflect on the role of maternal care in encouraging the tendency towards self-care. A series of detailed case studies follows, including a client who has a serious eating disorder, a client who abuses recreational drugs, works excessively to the detriment of his mental and physical health and sustains a series of unconsciously invited 'accidents', and one caught up in 'self-harm by omission', who fails to 'take care' and delays seeking vital medical care. The clinical accounts highlight the importance of attending to the client as a whole person and of building on the self-caring tendency that has prompted him or her to seek help in the form of counselling or psychotherapy. Written from a psychoanalytic perspective, but using straightforward language, *Hidden Self-Harm* is a valuable resource for social workers, psychologists, teachers, nurses and lay helpers as well as for counsellors and psychotherapists.

This short summary and analysis of *Born to Run* by Christopher McDougall includes:

Historical context Chapter-by-chapter overviews Detailed timeline of key events Important quotes Fascinating trivia Glossary of terms Supporting material to enhance your understanding of the original work About *Born to Run* by Christopher McDougall: Christopher McDougall's New York Times–bestselling *Born to Run* brought the underground sport of distance running to the forefront of American conversation, spurring trends like barefoot running and chia seeds' recognition as a superfood. Centering around two long-distance races, the second of which McDougall intends to run, the book is written in a distinctly Gonzo journalism–style. The author focuses on the Tarahumara, an ancient tribe of runners that lives isolated in Mexico's Copper Canyons, but he also pulls in plenty of other characters, past and present, and explores the biological reasons we are all born to run. The summary and analysis in this ebook are intended to complement your reading experience and bring you closer to a great work of nonfiction.

Hidden Lives Feb 02 2020 On Third World streets or First World televisions, Latin America's children are seen but seldom listened to. Child labourers, street children and shanty town kids are portrayed in the West as helpless victims, passive, big-eyed and hungry, besieged by poverty and violence. However, this text argues that if you talk to the children themselves a different picture emerges - one of children as active, energetic and resourceful fighters, struggling to improve their lives, get an education, and earn a living. The book explores the lives of children through their own eyes and voices. It argues that child participation is both a right and a necessity if child-centred social programmes are to succeed. More broadly, harnessing the energy of children could help the region tackle pressing environmental and social problems. Duncan Green talks to children across the continent, watching them at work and play, on the streets or in the home. He interviews children in Brazil, Jamaica, Peru, Columbia, Honduras and Nicaragua, as well as teachers, welfare workers and other adults involved in their lives. He provides comprehensive background research to support his findings, while photographs illustrate the text.

Killing the Hidden Waters Jun 19 2021 From the introduction to the new edition: "I'll tell you where I went wrong. The faucet in the kitchen always becomes the reality we believe, and the periodic droughts, one of which for much of the nineties savaged the West, remain a fantasy. This happens each and every day as the water roars from the faucet and the skies remain dangerously blue." —Charles Bowden In the quarter-century since his first book, *Killing the Hidden Waters*, was published in 1977, Charles Bowden has become one of the premier writers on the American environment, rousing a generation of readers to both the wonder and the tragedy of humanity's relationship with the land. Revisiting his earliest work with a new introduction, "What I Learned Watching the Wells Go Down," Bowden looks back at his first effort to awaken people to the costs and limits of using natural resources through a simple and obvious example—water. He drives home the point that years of droughts, rationing, and even water wars have done nothing to slake the insatiable consumption of water in the American West. Even more timely now than in 1977, *Killing the Hidden Waters* remains, in Edward Abbey's words, "the best all-around summary I've read yet, anywhere, of how our greed-driven, ever-expanding urban-industrial empire is consuming, wasting, poisoning, and destroying not only the resource basis of its own existence, but also the vital, sustaining basis of life everywhere."

Hidden and Devalued Feminized Labour in the Digital Humanities Jan 15 2021 Hidden and Devalued Feminized Labour in the Digital Humanities examines the data-driven labour that underpinned the Index Thomisticus—a preeminent project of the incunabular digital humanities—and advanced the data-foundations of computing in the Humanities. Through oral history and archival research, Nyhan reveals a hidden history of the entanglements of gender in the intellectual and technical work of the early digital humanities. Setting feminized keypunching in its historical contexts—from the history of concordance making, to the feminization of the office and humanities computing—this book delivers new insight into the categories of work deemed meritorious of acknowledgement and attribution and, thus, how knowledge and expertise was defined in and by this field. Focalizing the overlooked yet significant data-driven labour of lesser-known individuals, this book challenges exclusionary readings of the history of computing in the Humanities. Contributing to ongoing conversations about the need for alternative genealogies of computing, this book is also relevant to current debates about diversity and representation in the Academy and the wider computing sector. Hidden and Devalued Feminized Labour in the Digital Humanities will be of interest to researchers and students studying digital humanities, library and information science, the history of computing, oral history, the history of the humanities, and the sociology of knowledge and science.
