ECSCW 2005 Dec 26 2021 The emergence and widespread use personal computers and network technologies have seen the development of interest in the use of computers to support cooperative work. This volume presents the proceedings of the ninth European conference on Computer Supported Cooperative Work (CSCW). This is a multidisciplinary area that embraces the development of new technologies grounded in actual cooperative practices. These proceedings contain a collection of papers that reflect the variegated research activities in the field. The volume includes papers addressing novel interaction technologies for CSCW systems, new models and architectures for groupware systems, studies of communication and coordination among mobile actors, studies of cooperative work in complex settings, studies of groupware systems in actual use in real-world settings, and theories and techniques to support the development of cooperative applications. The papers present emerging technologies alongside new methods and approaches to the development of this important class of applications. The work in this volume represents the best of the current research and practice within CSCW. The collection of papers presented here will appeal to researchers and practitioners alike, as they combine an understanding of the nature of work with the possibility offered by new technologies.

ILO Focus Jul 29 2019

Financial Modelling in Practice Oct 31 2019 *Financial Modelling in Practice: A Concise Guide for Intermediate and Advanced Level* is a practical, comprehensive and in-depth guide to financial modelling designed to cover the modelling issues that are relevant to facilitate the construction of robust and readily understandable models. Based on the authors extensive experience of building models in business and finance, and of training

others how to do so this book starts with a review of Excel functions that are generally most relevant for building intermediate and advanced level models (such as Lookup functions, database and statistical functions and so on). It then discusses the principles involved in designing, structuring and building relevant, accurate and readily understandable models (including the use of sensitivity analysis techniques) before covering key application areas, such as the modelling of financial statements, of cash flow valuation, risk analysis, options and real options. Finally, the topic of financial modelling using VBA is treated. Practical examples are used throughout and model examples are included in the attached CD-ROM. Aimed at intermediate and advanced level modellers in Excel who wish to extend and consolidate their knowledge, this book is focused, practical, and application-driven, facilitating knowledge to build or audit a much wider range of financial models. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Design, User Experience, and Usability. Practice and Case Studies Sep 22 2021 The four-volume set LNCS 11583, 11584, 11585, and 11586 constitutes the proceedings of the 8th International Conference on Design, User Experience, and Usability, DUXU 2019, held as part of the 21st International Conference, HCI International 2019, which took place in Orlando, FL, USA, in July 2019. The total of 1274 papers and 209 posters included in the 35 HCII 2019 proceedings volumes was carefully reviewed and selected from 5029 submissions. DUXU 2019 includes a total of 167 regular papers, organized in the following topical sections: design philosophy; design theories, methods, and tools; user requirements, preferences emotions and personality; visual DUXU; DUXU for novel interaction techniques and devices; DUXU and robots; DUXU for AI and AI for DUXU; dialogue, narrative, storytelling; DUXU for automated driving, transport, sustainability and smart cities; DUXU for cultural heritage; DUXU for well-being; DUXU for learning; user experience evaluation methods and tools; DUXU practice; DUXU case studies.

Business Innovation and ICT Strategies Jan 15 2021 This book investigates the real process of unleashing the power of Information and Communications Technology (ICT) through Open Innovation and strategic choices. It covers the most important aspects of ICT in a nutshell and details the road to the future through business innovation. ICT, of which telecom and IT constitute the core, is currently permeating and transforming every sphere of life, ranging from commerce, manufacturing, education and healthcare, to agriculture, banking, governance, media and entertainment. Today, telecommunication and ICT, in general, are essential to a country's economic development and competitiveness as recognized both by the World Bank and the Asian Development Bank. Due to the powerful, disruptive and rapid forces unleashed by ICT tsunami, organisations not only struggle to harness the potential of ICT but can also be overwhelmed by the changes, complexity, competition and regulatory environment it brings up. This book provides a clue to organisations on how to sustain and succeed by leveraging ICT in absence of extensive in-house expertise across the breadth and depth of these areas. The driving theme of the book is about opening up organizational and business models, by presenting an integrated roadmap to a future with ICT, by co-opting, cooperating and competing with other organisations. Constructing the right strategy and building the necessary social capital for open innovation through collaboration with partners, government, academia and users (Quadruple Helix Model) are essential steps in such a process.

Parents with Mental and/or Substance Use Disorders and their Children Sep 30 2019 This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Drug use during pregnancy with focus on antidepressants Aug 02 2022 Background: More than half of pregnant women use at least one prescribed

medication during pregnancy, and almost all pregnant women use some kind of over-the-counter medication. Depression is one of the most common diseases in the world today, also during the peripartum period. The prevalence of pregnant women using antidepressant medication is increasing. General knowledge about the use of medication during pregnancy needs to improve. The overall aim of the studies on which this thesis is based is therefore to examine different aspects of medication use during pregnancy, with a focus on antidepressants. Material and methods: Study I was a questionnaire study where 850 pregnant women were asked about their perceptions on medication use during pregnancy. In Study II, plasma samples from 200 women were obtained at gestational weeks 10-12 and 25, and screened for drugs. The results of the analysis were compared with medication use noted in antenatal medical care records. Study III was a national register-based cohort study including 262,329 pregnant women, and their first child born in 2012-2015. Maternal obstetric and neonatal outcomes were studied in three groups: women diagnosed with depression and who had redeemed an antidepressant before becoming pregnant and women who were diagnosed with depression and who had redeemed an antidepressant both before and during pregnancy, were compared with each other and with women who had neither been diagnosed with depression nor been prescribed antidepressants. Study IV was a pharmacokinetic study that included 81 pregnant women with ongoing antidepressant medical treatment. Antidepressant drug and metabolite concentrations were measured throughout pregnancy. Participants were genotyped for enzymes involved in antidepressant drug metabolism, i.e. CYP2D6 and CYP2C19. Results and conclusions: The majority of pregnant women in our study considered the use of medication during pregnancy as either "probably harmful" or "harmful", and this perception was associated with non-use of medication. The women had high confidence in health care professionals when seeking advice about medication. There was a good coherence between reported drug intake in antenatal care records and presence of the drug in the pregnant women's blood. For drugs prescribed for continuous use the coherence was 100%; thus, the reported use of medication in antenatal records is reliable. Women with major depressive disorder and antidepressant medication prior to becoming pregnant were at increased risk for adverse obstetric and neonatal outcomes compared with women without major depressive disorder. Continuation of antidepressant medication during pregnancy somewhat increased the risk of adverse obstetric and neonatal outcomes. The dose-adjusted concentrations of sertraline and citalopram and their metabolites, did not change significantly throughout pregnancy. Observed concentrations of escitalopram, mirtazapine and venlafaxine did not appear to change.

Information Systems Research May 31 2022 *Information Systems Research: Relevant Theory and Informed Practice* comprises the edited proceedings of the WG8.2 conference, "Relevant Theory and Informed Practice: Looking Forward from a 20-Year Perspective on IS Research," which was sponsored by IFIP and held in Manchester, England, in July 2004. The conference attracted a record number of high-quality manuscripts, all of which were subjected to a rigorous reviewing process in which four to eight track chairs, associate editors, and reviewers thoughtfully scrutinized papers by the highly regarded as well as the newcomers. No person or idea was considered sacrosanct and no paper made it through this process unscathed. All authors were asked to revise the accepted papers, some more than once; thus, good papers got better. With only 29 percent of the papers accepted, these proceedings are significantly more selective than is typical of many conference proceedings. This volume is organized in 7 sections, with 33 full research papers providing panoramic views and reflections on the Information Systems (IS) discipline followed by papers featuring critical interpretive studies, action research, theoretical perspectives on IS research, and the methods and politics of IS development. Also included are 6 panel descriptions and a new category of "bright idea" position papers, 11 in all, wherein main points are summarized in a pithy and provocative fashion.

eWork and eBusiness in Architecture, Engineering and Construction Sep 10 2020 Biannually since 1994, the European Conference on Product and Process Modelling in the Building and Construction Industry has provided a review of research, given valuable future work outlooks, and

provided a communication platform for future co-operative research and development at both European and global levels. This volume, of special interest to

Be Familiar with English in Focus 3 English Idioms in Use for EFL Jul 01 2022 The e-book *Be Familiar with English in Focus 3-English Idioms in Use for EFL Learners* is addressed to offer EFL learners about English idioms in fun ways to create meaningful learning that can be put directly in daily life activities. Perhaps, this e-book can improve learners' proficiency in using English idioms with a plethora of expression. I hope this e-book has purposeful for everyone, particularly non-native students. The necessity of English as one of the foreign languages studied in Indonesian schools brings this book forward. In this opportunity, the writer has made some endeavour to develop the students' understanding of English idioms use through this e-book. Perhaps, these contents are able to build their receptive and productive skills as well as explore their creative thinking to apply English idioms as the media of communication, both in verbal and written. The clear and up-to-date colour photos assist the learners to learn idioms in their natural context which makes it easier to remember them in every single topic of idioms that they have learned. Overall, this e-book discusses both my experiences and how the well-known idioms use in everyday life. You will find this e-book is worth learning as a challenge for EFL learners who are eagerly studying English idioms with a great sense of enjoyment structure and lively images. Definition in each idiom and how to use it properly are already covered systematically in this e-book. I hope a simple method of English idioms in this e-book will be revealed which you can easily learn to use as EFL learners.

Land Use in Australia May 19 2021 *Land Use in Australia: Past, Present and Future*, is a compilation of invited chapters from Australia's leading specialists in land use policy and planning and land management. Chapters present many widely recognised issues involved in Australia's land use policy and planning, including limited understanding and poor awareness of: the rich history of poor decisions on land use planning and management across different levels of government; the discontinuities between providers of national biophysical information; the tools, data and information to improve national land use decision-making outcomes; the poor synthesis and integration between science to policy to natural resource management and resource condition; the benefits of land use practitioners engaging in connection, cooperation, mutual inquiry and collective social learnings. The aims of the book are threefold: 1) provide a review of the current status of land use policy and planning in Australia; 2) provide a resource to inform and influence the development of land use policy and planning; and 3) provide a sound contribution to Australia's public-private land use debates in the future. The audience for the book includes government and non-government land management agencies from state and national bodies, universities and researchers.

The Cultural/Subcultural Contexts of Marijuana Use at the Turn of the Twenty-First Century Apr 29 2022 Learn why marijuana use has increased in the new millennium According to the Substance Abuse and Mental Health Services Administration, marijuana is the most commonly used illicit drug. *The Cultural/Subcultural Contexts of Marijuana Use at the Turn of the Twenty-First Century* takes a close look at present cannabis use trends in the new millennium by providing the latest research findings and most current case studies. Age and ethnographic data are presented in detail always with a constant focus on the unique subcultural contexts in today's society. This examination explores the most pressing issues in marijuana use, including the increased popularity of blunt smoking, the social ramifications of marijuana use in gangs and Southeast Asian youth, and alternative delivery systems for medical marijuana. *The Cultural/Subcultural Contexts of Marijuana Use at the Turn of the Twenty-First Century* discusses various aspects of marijuana being the drug of choice in today's culture, including the different subgroups of age, economic status, and ethnic background. The book provides a comprehensive view of the people, reasons for use, varied ways of ingesting the drug, and marijuana use "rituals." Extensive references, charts, tables, and figures are included to enhance clarification of research findings. *The Cultural/Subcultural Contexts of*

Marijuana Use at the Turn of the Twenty-First Century discusses the latest research findings on: the growth of marijuana use in different social groups during the 1990s medical marijuana blunt smoking and marijuana use rituals as settings for informal social controls marijuana use among minorities marijuana use in youths and young adults marijuana use among gang members adult use production, distribution, and administration of non-smokable marijuana The Cultural/Subcultural Contexts of Marijuana Use at the Turn of the Twenty-First Century is insightful, valuable, and is certain to become a reference source for researchers, educators, students, and policy advocates.

[Handbook of Service User Involvement in Mental Health Research](#) Oct 24 2021 Handbook of Service User Involvement in Mental Health Research In recent years, the need for patient and public involvement in medical research has been accepted around the world. Patient groups are gaining power and demanding their right to influence the direction of research, while funding bodies are increasingly regarding patient involvement as a requirement for grant applications. However, current knowledge on how to involve service users in mental health research is sparse and dispersed. This book provides clear guidance on best practice in this area, with practical advice based on experience in countries around the world. Handbook of Service User Involvement in Mental Health Research describes the background and principles underlying the concept of service user involvement in mental health research; it provides relevant practical advice on how to engage with service users and how to build and maintain research collaboration on a professional level. The book highlights common practical problems in service user involvement, suggesting ways to avoid pitfalls and common difficulties. Combines the theoretical aspects of service user involvement in research with specific examples, as well as with general practical guidelines Represents the views of service users, in a powerful combination with the views of other mental health professionals Considers the different perspectives and needs of the stakeholders concerned Includes a step by step guide on best practice in successful service user involvement. Handbook of Service User Involvement in Mental Health Research is written for psychiatrists and other medical professionals managing people with psychiatric disorders, as well as for researchers in the mental health field who want to develop projects with service user involvement. It is vital reading for funding bodies requesting service user involvement, and - importantly - is written for those service users who are interested in becoming involved in research.

Closing the Feedback Loop Jun 07 2020 Enhanced transparency, accountability, and government or donor responsiveness to people needs are imperative to achieve better and more sustainable development results on the ground. The rapid spread of new technologies is transforming the daily lives of millions of poor people around the world and has the potential to be a real game changer for development. Improved accountability and responsiveness are critical for reaching the goals of eliminating extreme poverty and promoting shared prosperity with a focus on improving the well-being of the most vulnerable and marginalized groups in society. Within the broader political economy context, many questions remain unanswered about the role that new technologies can play to act as an accelerator for closing the accountability gap. Within this context, this report brings together new evidence from leading academics and practitioners on the effects of technology-enabled citizen engagement. The report aims to address the following four main questions: how do new technologies empower communities through participation, transparency, and accountability?; are technologies an accelerator for closing the accountability gap - the space between supply (governments, service providers) and demand (citizens, communities, civil society organizations) that must be bridged for open and collaborative governance?; under what conditions does this occur?; and what are the experiences and lessons learned from existing grassroots innovators and donor-supported citizen engagement and crowdsourcing programs, and how can these programs be replicated or scaled up?. The report presents a theoretical framework about the linkages between new technologies, participation, empowerment, and the improvement of poor people's human well-being based on Amartya Sen's capability approach. The book provides rich case studies about the different factors that influence whether or not information and communication technology (ICT)-enabled

citizen engagement programs can improve the delivery and quality of public services to poor communities. The report analyzes in depth both the factors and process of using new technologies to enhance the delivery of primary health services to pregnant women in Karnataka, India, and of several community mapping and crowdsourcing programs in Guinea, Haiti, Kenya, Libya, Sudan, and other countries.

Microsoft Windows Server 2003 Unleashed May 07 2020 An introduction to Microsoft's new network operating system, Windows .NET Server 2003, furnishes detailed instructions for migrating to Windows .NET Server from other operating systems and provides helpful guidelines on planning, installation, migration, and troubleshooting, as well as system configuration, tips and tricks, and implementation techniques. Original. (Advanced)

Adolescent Literacies Feb 13 2021 Showcasing cutting-edge findings on adolescent literacy teaching and learning, this unique handbook is grounded in the realities of students' daily lives. It highlights research methods and instructional approaches that capitalize on adolescents' interests, knowledge, and new literacies. Attention is given to how race, gender, language, and other dimensions of identity--along with curriculum and teaching methods--shape youths' literacy development and engagement. The volume explores innovative ways that educators are using a variety of multimodal texts, from textbooks to graphic novels and digital productions. It reviews a range of pedagogical approaches; key topics include collaborative inquiry, argumentation, close reading, and composition.ÿ

New Directions in Reference Dec 14 2020 Librarians work in an environment of constant change created by new technology, budget restraints, inflationary costs, and rising user expectations. *New Directions in Reference* examines how they can use new and innovative methods to design and deliver traditional reference services in a wide range of settings. The book's contributors relate first-hand experiences in libraries large and small, public and academic, and urban and rural dealing with a variety of changes, including virtual reference, music reference, self-service interlibrary loan, e-mail reference, and copyright law.

Contemporary Perspectives in E-Learning Research Mar 17 2021 E-learning is at an exciting point in its development; its potential in terms of research is great and its impact on institutional practices is fully recognised. This book defines e-learning as a field of research, highlighting the complex issues, activities and tensions that characterise the area. Written by a team of experienced researchers and commented upon by internationally recognised experts, this book engages researchers and practitioners in critical discussion and debate about the findings emerging from the field and the associated impact on practice. Key topics examined include: access and inclusion the social-cultural contexts of e-learning organisational structures, processes and identities technical aspects of learning research - using tools and resources approaches to learning and teaching practices and associated learning theories designing for e-learning and the management of educational resources professional roles and identities the evolution of e-assessment collaboration, motivation and educational evaluation. *Contemporary Perspectives in E-Learning Research* provides a synthesis of research, giving readers a grounding in contemporary e-learning scholarship whilst identifying the debates that make it such a lively and fast-moving area. A landmark text in an evolving field, this book will prove invaluable for all researchers, practitioners, policy makers and students who engage with e-learning.

Persistent Work-related Technology Use, Recovery and Well-being Processes Apr 05 2020 The aim of this work is to provide insight into the process of employee recovery and well-being in regard to work-related ICT use during after-hours. Therefore, we discuss (1) theories that help us to understand the determinants and outcomes of this behavior, (2) our core concepts recovery and well-being, and (3) previous empirical findings on

ICT use after hours for work purposes. On the basis of literature review, we propose a new conceptual overall framework of ICT use after hours for work purposes with the focus on employee recovery and well-being processes. Thereby, we posit ICT use after hours for work purposes as potential stressor, resource, or demand (see action theory by Hacker, 1998, 2003; Frese and Zapf 1994), depending on many personal and environmental factors, but primarily on cognitive appraisals (see transactional model of stress by Lazarus and Folkman 1984). This three-way division enables us to propose various linear and non-linear associations to focused outcomes. We conclude with an overall discussion on further research concerning the identified research gaps.

Input Matters in SLA Nov 24 2021 This volume bridges the gap between theory and practice by bringing together well-known and new authors to discuss a topic of mutual interest to second language researchers and teachers alike: input. Reader-friendly chapters offer a range of existing and new perspectives on input in morphology, syntax, phonetics and phonology.

CORDIS Focus Jun 27 2019

Handbook on the Use of Administrative Sources and Sample Surveys to Measure International Migration in CIS Countries Jul 21 2021 Migration is a powerful driver and important consequence of economic, political and social change, and there fore needs to be adequately measured and understood. However, the improvement of statistical systems to measure migration has been a slow process because of weak coordination between migration statistics producers, discrepancies in the applied definitions, and challenges related to data collection. The objective of this handbook is to guide statisticians and other professionals in producing and using data on international migration from administrative sources and household surveys in the CIS region. It describes the key concepts and definitions for the measurement of international migration. It also provides practical information on the sources of administrative data and their use, and highlights the related methodological and organizational challenges.

Research Handbook on Street-Level Bureaucracy Feb 25 2022 When the objectives of public policy programmes have been formulated and decided upon, implementation seems just a matter of following instructions. However, it is underway to the realization of those objectives that public policies get their final substance and form. Crucial is what happens in and around the encounter between public officials and individual citizens at the street level of government bureaucracy. This Research Handbook addresses the state of the art while providing a systematic exploration of the theoretical and methodological issues apparent in the study of street-level bureaucracy and how to deal with them.

Cognate Vocabulary in Language Acquisition and Use Jun 19 2021 This book brings together linguistic, psycholinguistic and educational perspectives on the phenomenon of cognate vocabulary across languages. It discusses extensive qualitative and quantitative data on Polish-English cognates and their use by learners/users of English to show the importance of cognates in language acquisition and learning.

SharePoint 2003 User's Guide Sep 03 2022 * Provides a "real world" view and best practices around using SharePoint 2003 technologies to meet business needs. * Seth Bates was the technical reviewer for both of Scot Hillier's books. * Lists the most common deployment scenarios of SharePoint technologies and the ways to best leverage SharePoint features for these scenarios.

Eminent Domain Use and Abuse Aug 29 2019 This book is a comprehensive analysis of the U.S. Supreme Court decision in *Kelo v. City of New London*. It addresses the controversial and important question of when eminent domain may constitutionally be used to take property for projects that are not publicly owned and operated facilities, such as schools and town halls. The volume captures and conveys the context within which this debate is taking place as well as offers guidance concerning the *Kelo* decision itself and how it may be used.

Statistics in Focus Jan 03 2020

Neuropsychology and Substance Use Aug 22 2021 Substance use continues to be a major public health problem, and the ramifications of this are manifold. For instance, at present, on a yearly basis, the total economic cost of substance misuse is literally hundreds of billions of dollars. These costs are related to a number of factors, including, but not limited to, treatment and prevention, reduced job productivity and/or absenteeism, interdiction by the criminal justice, and incarceration. There are many more psychosocial consequences of substance misuse, and these have been well-documented over the past four to five decades; in contrast, with the exception of alcohol, the effects of substance misuse on the brain have received attention only in the past 10 to 15 years. An emerging body of literature has reported on the effects of various drugs on neuropsychological functioning, including benzodiazepines, cocaine, marijuana, MDMA, methamphetamine, nicotine, and opioids. Despite the fact that the neuropsychological consequences of many drugs of abuse are well-documented, to our knowledge, no one had previously published an edited volume that focused exclusively on this issue. Based on this fact, we decided to create a volume that would review the available literature regarding on this topic. *Neuropsychology and Substance Misuse: State-of-the-Art and Future Directions* explores cutting-edge issues, and will be of interest to clinical neuropsychologists who require the latest findings in this increasingly important area of neuropsychology.

Encyclopedia of Human Computer Interaction Aug 10 2020 Esta enciclopedia presenta numerosas experiencias y discernimientos de profesionales de todo el mundo sobre discusiones y perspectivas de la la interacción hombre-computadoras

Space, Time, and the Use of Language Dec 02 2019 Does temporal language depend on spatial language? Many parallels between spatial and temporal expressions, and many examples of metaphorical processes, seem to prove this. But how are expressions such as before and after, in front and behind actually used in natural discourse - does their application reflect a conceptual dependency relation? The book addresses this question from an innovative perspective, drawing together earlier findings from various directions and supplementing them by empirical investigations.

Gradually a new picture emerges: The concepts of space and time are represented in language usage in various systematic ways, reflecting how we understand the world - and at the same time reflecting how our concepts of space and time differ fundamentally.

Focus Groups Mar 29 2022 Physicians, health researchers, and nurses make extensive use of focus groups. Thus, researchers and readers need access to the realm of applications of focus group methodology in the wide variety of medical and health sciences. In this second installment of a two-volume examination of ten recent years (1998-2007) of focus group studies and research literature, author Graham R. Walden turns his attention from the arts, humanities, and non-medical sciences to the medical and health sciences, concentrating on a broad range of studies in books, book chapters, and journal articles that are available in English. Focus Groups, Volume II: A Selective Annotated Bibliography: Medical and Health Sciences covers over 500 articles on a multitude of topics in the medical and health sciences, such as the health profession and the practice of medicine, public health, and several different bodily systems and types of diseases. The annotations in this bibliography describe the content of a source document to help the reader discern whether pursuit of the full text is appropriate or desirable. This book offers significant benefits to all medical personnel; graduate and undergraduate students; professional focus group practitioners; and individuals seeking increased awareness of studies that have been conducted in the health arena.

FOGSI Focus: Use of Adjuvants in Infertility Oct 04 2022 Fertility specialists are constantly looking for ways to improve the chances of pregnancy through IVF or other assisted reproductive techniques (ART). 'Adjuvant' or 'add-on' therapies are procedures or medications which are added to IVF treatment to try and improve the chances of success. This book is a practical guide to the use of adjuvants in infertility for clinicians and trainees. Divided into ten sections, the text begins with an overview of the rationale for additional therapy in IVF. The next section examines different types of adjuvant therapy and their pros and cons. Topics include medical nutrition therapy, nutraceuticals, antioxidants, micronutrients, and reactive oxygen species. Each of the following sections covers adjuvant use for improving a specific fertility issue - PCOS, ovarian reserve, uterine blood flow, endometrial receptivity, embryo implantation, and male subfertility. The final sections discuss the impact of thyroid autoimmunity on the outcome of ART, and the use of surgery as an adjuvant in infertility. Key points Practical guide to the use of adjuvants in infertility Covers various types of adjuvant and their use for different fertility issues Includes discussion on surgery as an adjuvant Highly illustrated with clinical photographs and diagrams

Integrated Approaches in Information Technology and Web Engineering: Advancing Organizational Knowledge Sharing Oct 12 2020 Provides a collection of authoritative articles from distinguished international researchers in information technology and Web engineering.
